NARCOTICS EVICTION PROGRAM

DATE ISSUED:
03/18/19

DATE EFFECTIVE:
03/18/19

REVISION NUMBER:

PAGE:
1 of 4

PURPOSE

To initiate action in civil court towards identified narcotics operations in privately owned buildings, commercial establishments and rental apartments owned by the New York City Housing Authority.

SCOPE

The Narcotics Eviction Program involves a cooperative citywide effort between this Department and the respective District Attorney's Office with a goal of evicting drug dealers from dwellings and commercial locations through the initiation of proceedings in civil court. In practice, all narcotics related arrests/seizures made inside locations, and effected by members assigned to a narcotics borough, are reviewed by the District Attorney's Office for potential eviction proceedings. Incidents where there is a summary narcotics related arrest, or incidents of found narcotics/drug paraphernalia, found within a building by patrol personnel, requires the preparation of a precinct **COMPLAINT REPORT (PD313-152)**. This report serves as a mechanism for follow up by the affected command.

PROCEDURE

When a uniformed member of the service, other than a member assigned to a narcotics borough, effects an arrest for any narcotics related offense, or finds narcotics/drug paraphernalia within a building:

UNIFORMED MEMBER OF THE SERVICE

1. Comply with appropriate Department procedures, prepare precinct **COMPLAINT REPORT (PD313-152)**, in addition to any other required reports.
2. Include in "Details" section of the **COMPLAINT REPORT** any information or observations that may indicate that a narcotics operation is involved.

COMMANDING OFFICER/ EXECUTIVE OFFICER/ SPECIAL OPERATIONS LIEUTENANT

3. Review **COMPLAINT REPORTS**, determine if the presence of a narcotics operation is indicated, based upon the information contained on the **COMPLAINT REPORTS** as well as other factors (i.e., previous incidents, community complaints, etc.).
4. Initiate further review of incident if the circumstances indicate that a narcotics operation is present.

SPECIAL OPERATIONS LIEUTENANT

5. Review facts and circumstances of incident.
6. Determine if appropriate for inclusion into the Narcotics Eviction Program.
7. Direct the concerned officer or designee to obtain all related information regarding the incident/location, if incident is determined to be appropriate for inclusion into the Narcotics Eviction Program.
 - a. Include such items as copies of the **COMPLAINT REPORT**, **ON LINE BOOKING SYSTEM WORKSHEET (PD244-159)**, **PROPERTY CLERK INVOICE (PD521-141)**, community complaints, and any other information that would substantiate the determination and be supportive of civil action.

SPECIAL OPERATIONS LIEUTENANT (continued)

 - a. Include a short cover letter, briefly describing the incident and location, identity of tenant of record and/or subject, if known.
9. Maintain file copies for reference and future review.

NOTE

The Narcotics Eviction Program Coordinator, Office of the District Attorney, will determine if the facts substantiate action in civil court. Determination of building ownership, along with all notifications required by statute, will be effected by the District Attorney's Office. Copies of all notification letters will be directed to the respective precinct for inclusion in its files.

10. Advise Narcotics Eviction Program Coordinator, as appropriate, of any other incidents regarding either the building owner or the submitted location.
11. Document information in the appropriate file.

DIRECTOR, POLICE LABORATORY

12. Ensure that all found/investigatory controlled substances are maintained at the Police Laboratory or Property Clerk's Office for a minimum of three months from the date of the incident.

NOTE

Requests for laboratory analysis pursuant to civil or criminal court proceedings will be effected by the District Attorney's Office, and handled in the normal manner. When such request is made, the Police Laboratory will test up to felony weight, as applicable.

SPECIAL OPERATIONS LIEUTENANT

13. Ensure that an effective liaison is maintained with the Narcotics Eviction Program Coordinator regarding ongoing efforts in this area.
14. Maintain appropriate contact with concerned narcotics borough regarding locations involved in this initiative.
15. Bring to the attention of the Precinct Management Team (PMT) appropriate efforts or initiatives relating to the Narcotics Eviction Program at the command.

UNIFORMED MEMBER OF THE SERVICE

16. Respond to all narcotics eviction related cases, including civil and criminal court, or District Attorney's Office for case preparation, as directed and notified by the Appearance Control Unit.

SPECIAL OPERATIONS LIEUTENANT

17. Contact the Narcotics Eviction Program Coordinator if any observations indicate renewed illicit activity when an eviction order has been obtained or the subject premise has been otherwise vacated.

NOTE

In instances such as described above, the command should establish liaison with the building owner/tenant group and emphasize the common goal of placing a desirable tenant in the location.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
214-02	03/18/19		3 of 4

COMMANDING OFFICER/COUNTERPART 18. Include initiatives taken towards these locations as a topic for Precinct Management Team (PMT) meetings as appropriate.
19. Ensure that there is both an effective information exchange and cohesive effort between precinct and narcotics borough personnel as it relates to this effort.

ADDITIONAL DATA When considering the circumstances of an incident, it should be noted that an eviction can be brought upon direct or circumstantial evidence that the premise is used for an illegal narcotic business.

EXAMPLES OF DIRECT EVIDENCE include:

- a. Observations of the direct sale of narcotics, OR
b. Inculpatory statements by occupants regarding the sale of narcotics.*

EXAMPLES OF CIRCUMSTANTIAL EVIDENCE, which supports most eviction proceedings, include:

- a. Recovery of an amount of narcotics inconsistent with personal use (typically 1/8 of an ounce or more) OR,
 - b. Recovery of cutting agents, scales, strainers, pestles, empty or new glassine envelopes or vials, plastic bags, rubber stamps, drug records, and other items associated with the preparation, manufacture, packaging, or storage of narcotics.

Recovery of evidence that lacks indications of a business operation, and is more consistent with mere personal use of narcotics, would not support an eviction and should not be forwarded to the District Attorney's Office. Cases that pertain to narcotics activity outside of homes and stores (i.e., stairwells, hallways, street, etc.) would not support action unless there is evidence linking the activity to interior premises. Questions regarding this area may be directed to the respective District Attorney's Office.

PURPOSE

To protect life and property and preserve the peace when involved in the enforcement of eviction warrants or other civil process.

SCOPE

Uniformed members of the service should be cognizant that incidents to which they respond may be the outgrowth of a civil process. The authority to break and enter pursuant to purely civil process such as repossession, evictions and civil commitments is given to the city marshal/sheriff. The only assistance which the police must render to a marshal is the general mandate of the New York City Charter to preserve the peace and protect life and property.

PROCEDURE

When requested to assist in the execution of an eviction warrant or other civil process:

DESK OFFICER

1. Assign uniformed member of the service to assist at location involved.

UNIFORMED MEMBER OF THE SERVICE

2. Respond to location and examine identification of city marshal/sheriff and if eviction is involved, examine warrant.

NOTE

The role of a uniformed member of the service when called to the scene of an eviction or other civil process situation is to preserve the peace and prevent the commission of a crime. The execution of a warrant of eviction is the sole responsibility of the city marshal/sheriff. Where a forced entry is authorized, a city marshal/sheriff is required to do so in the least disruptive way. Uniformed members of the service will not assist in breaking a door or damaging other property to effect a warrant of eviction. The city marshal is responsible for this action, when necessary and authorized.

IF SUBJECT OF AN EVICTION OR OTHER CIVIL PROCESS REFUSES TO ALLOW ENTRY OR LEAVE VOLUNTARILY:

UNIFORMED MEMBER OF THE SERVICE

3. Notify desk officer and request response of a patrol supervisor, before any further action is taken.

PATROL SUPERVISOR

4. Respond to scene and assess situation.

NOTE

If subject of eviction warrant or other civil process appears to be emotionally disturbed comply with P.G. 221-13, "Mentally Ill or Emotionally Disturbed Persons."

 - a. Name and shield number of city marshal/sheriff
 - b. Time of entry into tenant's premises
 - c. Location of tenant's premises in building
 - d. Name of tenant
 - e. Note if tenant is present or not
 - f. Whether city marshal/sheriff or landlord/representative will be responsible for the tenant's property.
 - (1) If the landlord/representative endorses the eviction warrant indicating that he takes responsibility for the property in the premises, the eviction is complete.
 - (2) If the landlord/representative does not take responsibility for the property in the premises, the city marshal must arrange for removal.

NOTE

NOTE If a rotation tow operator unjustifiably refuses a “Driveway Tow” assignment, the desk officer shall forward a **REPORT OF VIOLATION (PD672-151)** to the Department of Consumer Affairs. 9. Ensure **PROPERTY CLERK INVOICE WORKSHEETS** are entered into the Property and Evidence Tracking System.

ADDITIONAL DATA A licensed tow operator who removes a vehicle pursuant to this section may collect the appropriate charges from the owner or other person in control of such vehicle, payable before the vehicle is released. This form MUST be signed by the owner/lessee of the property, prior to removal of the vehicle.

Administrative Code 19-169.1 does not permit owners/lessees of the same property to have this statute enforced against each other.

If a private tow operator, not in the Rotation Tow Program, removes a vehicle, it must be taken directly to his storage facility. Within thirty minutes of the vehicle's arrival, the tow operator must notify the precinct in which the storage facility is located, of all information contained on the authorization form, including the name of the person who signed the form. The desk officer will record this information in the Command Log.

If the registered owner or other person in control of the vehicle arrives at the scene prior to the removal of the vehicle, and such vehicle is connected to any apparatus for removal, the vehicle shall be disconnected from such apparatus and such registered owner or other person in control of such vehicle shall be allowed to remove the vehicle from the premises without interference upon payment of a reasonable service fee of not more than one-half of the charge allowed for removal as provided in Administrative Code Section 19-169.1, subdivision (g), for which a receipt shall be given.

PREMISES OPEN TO THE PUBLIC - Owners of property open to the public have a diminished expectation of privacy. Uniformed members of the service may enter a fenced in backyard/driveway if it is clearly open to the public. ADDITIONAL DATA

Uniformed members of the service equipped with a Body-Worn Camera (BWC) are reminded that the activation, and use, of a BWC is mandatory during enforcement situations (e.g., arrests, issuance of summons returnable to Criminal Court or to the Office of Administrative Trials and Hearings, etc.).

BWCs may also be activated during a non-enforcement situation at the members own discretion, as long as the activation is not prohibited (e.g., performance of administrative duties or non-enforcement functions, routine activities within Department facilities, etc.). For a complete list of mandatory and prohibited BWC uses, uniformed members of the service should refer to P.G. 212-123, "Use of Body-Worn Cameras."

Additionally, uniformed members of the service are also permitted, but are not required, to use Department smartphones/tablets to photograph and/or video record these situations. Uniformed members of the service should be aware that the recording/photographing of these situations may help to provide overall context to the enforcement encounter (e.g., that the location was open to the public, a bouncer was allowing the public entry, the noise could be heard from a distance, etc.). Subject to tactical and safety considerations, as well as overall situational awareness, uniformed members of the service are permitted, but are not required, to use Department smartphones/tablets to photograph or video record these situations.

**ADDITIONAL
DATA**

OPERATIONAL CONSIDERATIONS

All pawnbrokers **MUST** keep records using the Department approved Electronic Reporting System of items pledged (sold or pawned).

- a. Records include the date, time of transaction, photo of item pledged (sold or pawned), etc.
- b. The approved Department Electronic Reporting System has all of the applicable categories, and all electronically collected data **MUST** be uploaded daily, by the pawnbroker.

Second-hand dealers that deal in certain types of property (e.g., precious metals, electrical appliances [excluding kitchen appliances], electronic equipment, computers or their component parts, etc.) **MUST** keep records of these transactions using the Department's approved Electronic Reporting System.

- a. Records include the date, time of transaction, photo of item pledged (sold or pawned), etc.
- b. Second-hand dealers not dealing in items listed above are not required to upload information into the Department's approved Electronic Reporting System. Manual records in the **SECOND-HAND ARTICLES STORE LOG** must still be maintained.

The seller's pedigree information is not required for the electronic record but must be recorded in **SECOND-HAND ARTICLES STORE LOG**.

Pawnbrokers and/or second-hand dealers can sometimes unknowingly serve as a "fence" for unscrupulous criminals to sell their stolen products. Members assigned to perform functions relating to pawnbroker and second-hand dealer inspections are reminded that these inspections are designed to uncover administrative violations. They are not for the purpose of uncovering criminal activity.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
214-38	08/27/18		4 of 4

ADDITIONAL DATA *(continued)*

All pawnbrokers and second-hand dealers are required to report on all articles pawned, purchased, or sold. Pawnbrokers and second-hand dealers who actively upload all transactions to the Department's authorized Electronic Reporting System are exempt from the requirement of manually filling out and preserving logs for inspection provided all relevant information (e.g., pedigree information, etc.) is included. By actively uploading their transactions on a daily basis, participating stores are allowing their records to be reviewed via the Electronic Reporting System. Stores are required to upload the day's transactions by the end of each day.

A routine visit to pick up slips from the **SECOND-HAND ARTICLES STORE LOG**, or a canvass and follow up by investigators, field intelligence officers, community affairs officers, neighborhood coordination officers, etc., does not constitute an inspection.

LEGAL CONSIDERATIONS

Both pawnbrokers and second-hand dealers are licensed by the New York City Department of Consumer Affairs. Additional licenses may be required based on the nature of the business contained therein.

The focus of inspections is to ensure compliance with current administrative rules and regulations, and to encourage the development of a mutually cooperative relationship between pawnbrokers and second-hand dealers, and this Department. When conducting inspections, members of the service are reminded that such inspections are limited to the public areas of the premises. Entry and inspections of non-public areas is only permissible with consent or a search warrant.

For questions about reporting requirements, rules and restrictions imposed on pawnbrokers and second-hand dealers, members of the service may contact the Legal Bureau for guidance. Additionally, members may refer to Legal Bureau Bulletin Vol. 47, No. 3, "Enforcement Action Regarding Pawnbrokers and Second-Hand Dealers."

DEFINITIONS

ELIGIBILITY – All commercial establishments either licensed or required to be licensed by State or City agencies, including but not limited to the New York State Liquor Authority (SLA), are subject to inspection at any time the establishment is open to the public. An establishment may be included in a M.A.R.C.H. Property crimes beyond the reasonable control of the establishment or other crimes, if security and other staff acted properly and assisted with police investigations, will not be used as the sole criteria for inclusion in a M.A.R.C.H. Operation.

DEFINITIONS (continued)

- f. Are not related by consanguinity (blood) or affinity (marriage) and who are, or have been, in an intimate relationship regardless of whether such persons have lived together at any time.

NOTE

A common sense standard regarding the totality of the circumstances involving the relationship should be used to determine if an “intimate relationship” exists. Factors a member of the service may consider in determining whether a relationship is an “intimate relationship” include but are not limited to: the nature or type of relationship (the relationship between the involved parties does not have to be sexual in nature to be considered “intimate”); the frequency of interaction between persons; and the duration of the relationship. Neither a casual acquaintance nor ordinary fraternization between two individuals solely in a business, educational, or social context shall be deemed to constitute an “intimate relationship.” If unable to determine if the relationship in question is an “intimate relationship,” the member of the service concerned will request the response of the patrol supervisor.

Additional factors that may assist in determining the intimacy of a relationship include, but are not limited to: amount of time spent together in either a work or leisure related capacity, shared expenses and/or finances; extent of interaction with family members, etc.

All members of the service are reminded that their primary responsibility is to ensure the immediate and future safety of all parties involved in domestic violence incidents.

FAMILY/HOUSEHOLD (EXPANDED DEFINITION) INCLUDES SUBDIVISIONS “A” THROUGH “F” ABOVE, AND PERSONS WHO:

- g. Are currently living together in a family-type relationship.
h. Formerly lived together in a family-type relationship.

A family/household thus includes: “common-law” marriages, same sex couples, registered NYC domestic partners, different generations of the same family, siblings, in-laws, persons involved in “intimate relationships”, and persons who live or have lived together in a family-type relationship.

PROCEDURE

Upon making a reasonable determination that a child has been, is believed to be, or may be abused, neglected or maltreated:

WHEN IMMINENT DANGER TO CHILD’S LIFE OR HEALTH EXISTS:

UNIFORMED MEMBER OF THE SERVICE

1. Request response of patrol supervisor.

NOTE

Uniformed members providing a police escort for ACS caseworkers to households where guns, drugs, etc. may be present and/or violent incidents have been reported, must request the response of the patrol supervisor to their location.

UNIFORMED MEMBER OF THE SERVICE (continued)

2. Remove child from home, with consent of parents, or person legally responsible for care, if reasonable cause to believe continued presence therein presents an imminent danger to the child's life or health.
3. Direct member to take the child into protective custody without permission if reasonable cause to believe that continued presence of the child in the home is imminently dangerous to life or health and there is not sufficient time to apply for a court order.

NOTE

An emergency removal without a court order may be performed by the following persons: peace officer, police officer, an agent of a duly incorporated Society for the Prevention of Cruelty to Children, a designated employee of a city or county Department of Social Services. The Family Court Act Sec. 1024 and Social Service Law Sec. 417 give ACS the same powers of removal as police officers. Once any authorized person decides to conduct an emergency removal, no member of this Department will revoke that decision.

The presence of diplomatic immunity on any person present, or the residence itself, shall not be a factor in the emergency removal analysis. Members of the service are reminded that such incidents require the commanding officer/duty captain to directly supervise the removal and comply with P.G. 212-56, "Diplomatic Incidents" including the required notifications.

IF PROBABLE CAUSE EXISTS THAT A CRIME HAS BEEN COMMITTED AGAINST A CHILD BY A FAMILY MEMBER:

UNIFORMED MEMBER OF THE SERVICE

4. Arrest perpetrator, if present, for appropriate offense(s) and comply with the pertinent provisions of P.G. 208-36 "Family Offenses/Domestic Violence."

NOTE

The perpetrator arrested will not be eligible for a Desk Appearance Ticket (DAT). The non-abusing parent/legally responsible person will be encouraged to contact Safe Horizon for services to assist child. Members of the service should recognize that there is a strong correlation between child abuse and domestic violence; therefore, when a uniformed member of the service responds to the scene of suspected child abuse, the member of the service will look for indicators of domestic violence or other family offenses such as the existence of an order of protection, abuse of spouse, parent, etc. If an existing order has been violated, the member will take appropriate action (i.e., effect an arrest or prepare COMPLAINT REPORT WORKSHEET [PD313-152a]).

5. Prepare a **New York State Domestic Incident Report (DCJS-3221)** in ALL cases in which a member of the service responds to OR is apprised of an offense, altercation, disturbance, conflict or dispute involving members of the same family/household, including any allegation of child abuse, neglect or maltreatment.
- a. If prepared in response to a radio run, include ICAD Incident number on form.

PATROL SUPERVISOR

UNIFORMED MEMBER OF THE SERVICE

7. Remove child to Child Advocacy Center (CAC) (see "*ADDITIONAL DATA*," P.G. 215-01, "*Children or Minors Requiring Care and/or Shelter*," for addresses of Child Advocacy Centers) or command, except if medical attention is required, in which case immediately take child to appropriate hospital facility.

 - c. ACS Instant Response Team (IRT) Coordinator.

NOTE

*In cases referred to a detective squad (e.g., homicides or special victims' cases), the assigned detective will notify the IRT hotline. Police officers are mandated to report child abuse and neglect to the New York State Central Registry of Child Abuse. Notification to the ACS IRT hotline **DOES NOT** substitute for the required notification to the State Central Registry. Police personnel will continue to notify the State Central Registry in accordance with step "8" of this procedure.*

*If child was removed from other than residence and parent/person legally responsible for care has not been notified, the desk officer will direct uniformed member of the service to respond to residence, if located within precinct, to serve **NOTICE** or affix **NOTICE** to door, if necessary. If residence is not located within precinct of occurrence, but within New York City, the desk officer will have the resident precinct notified to serve the **NOTICE** or affix **NOTICE** to door, if necessary. In all instances, where parent/legally responsible person was not personally served and **NOTICE** was affixed to the door, the member concerned will mail a copy of the **NOTICE** to the residence within twenty-four hours. In addition, the member serving or mailing the **NOTICE** must also prepare the **AFFIDAVIT**. the Miranda rights; they only need to be advised of such rights. However, if the parent/guardian objects to the questioning or requests an attorney for the juvenile, no questioning should occur even if the juvenile is willing to answer questions. A juvenile may be requested to provide pedigree information at the location designated for interrogation PRIOR to advising the juvenile of their constitutional rights.

If the parent/guardian cannot be notified, a juvenile MAY be questioned ONLY after:

- a. Every reasonable effort has been made to notify parent/guardian
- b. Determining the necessity for questioning at this time
- c. Considering the age, apparent intelligence of the juvenile, and the ability of the juvenile to understand the Miranda Warnings.

Every reasonable effort taken to notify a parent/guardian must be documented by the desk officer in the appropriate Department record.

If the juvenile MUST be questioned, the officer MUST be prepared to testify that a "good faith" attempt was made to have a competent adult (e.g., relative, clergyman, teacher, etc.), other than law enforcement personnel, present during questioning; that the juvenile and the competent adult were advised jointly of the Miranda Warnings; that they understand these rights; and the effect of a waiver on these rights.

Precinct Detective Squad/Burglary/Robbery Apprehension Modules will enhance any case made against a violent youth offender. They will identify, locate, and apprehend any accomplices in gun-related cases or acts of violence.

When it becomes necessary to deliver a juvenile to the appropriate facility designated by the Administration for Children's Services (ACS), the arresting/assigned officer, in an effort to expedite the intake process, MUST contact the Admissions Unit PRIOR to delivering the juvenile, and provide them with the juvenile's name, address, date of birth, and parent/guardian's name.

The juvenile's statement as to age may be in conflict with the records maintained at the ACS designated facility. To resolve any differences regarding the age of the juvenile, arresting/assigned officer shall ask to examine the following primary reference documents maintained at the ACS designated facility:

- a. Family Court - Remand Order Form C-23B
- b. Family Court - Order Directing Detention of Respondent Form 3-11
- c. Criminal Court - Securing Order Form 299
- d. Supreme Court - Securing Order Form 299.

File folders may also contain photographs of the juvenile and will be made available for examination.

When there are no court records on file at the ACS designated facility, or available records are inconclusive regarding the age of the juvenile, ACS designated facility officials will accept delivery of the juvenile for detention.

Should the court records at the ACS designated facility establish that the juvenile was 18 years of age or older at the time the offense was COMMITTED, they will be returned to the borough Court Section facility, borough of arrest, for processing as an adult.

In addition, in all juvenile delinquent arrest cases, the arresting officer will provide the complainant with a copy of completed form, JUVENILE DELINQUENT ARREST COMPLAINANT'S NOTIFICATION TO APPEAR (PD277-120).

In those instances where a juvenile is charged with both a Vehicle and Traffic Law (VTL) and a non-VTL misdemeanor (such as a Penal Law misdemeanor) arising from the same incident, an appearance ticket returnable to the appropriate court will be issued for one of these offenses, if eligible. The totality of circumstances should be evaluated in deciding for which offense to issue an appearance ticket.

Arresting officers must call the Juvenile Desk and confer with an analyst before beginning the arrest process to ensure that all available information regarding the juvenile is provided and additional resources (e.g., Juvenile Crime Squad, Law Department, Deputy Commissioner, Public Information, Internal Affairs Bureau, other investigative units, etc.) are notified or dispatched in a timely manner.

4. Bring juvenile to appropriate area designated for interrogation of juveniles.
 - a. Confer with desk officer to ascertain designated location when unknown.
 - b. Have female police officer or other qualified female present, if juvenile is a female.
5. Notify parent/guardian that juvenile is in custody and location of juvenile.
6. Do not question until arrival of parent/guardian.

7. Advise at the same time, juvenile AND parent/guardian of rights as stated in **MIRANDA WARNINGS FOR JUVENILE INTERROGATIONS (PD244-1413)** prior to interrogation.
 - a. The juvenile may be questioned if he/she waives their rights in the presence of the parent/guardian. The parent /guardian does not have to separately waive the Miranda rights; they only need to be advised of such rights. However, if the parent/guardian objects to the questioning or requests an attorney for the juvenile, no questioning should occur even if the juvenile is willing to answer questions.

NOTE

If the parent/guardian cannot be notified, a juvenile MAY be questioned ONLY after:

- a. *Every reasonable effort has been made to notify parent/guardian*
- b. *Determining the necessity for questioning at this time*
- c. *Considering the age, apparent intelligence of the juvenile, and the ability of the juvenile to understand Miranda Warnings.*

HANDCUFFING/RESTRAINING STUDENTS WITHIN SCHOOL FACILITIES FOR ARREST OR AS AN EMOTIONALLY DISTURBED PERSON AND USE OF ALTERNATIVE RESTRAINTS/VELCRO CUFFS

DATE ISSUED:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
01/08/20	01/08/20		1 of 5

PURPOSE

To set forth a policy for the handcuffing/restraining of students within New York City public schools to ensure the safety of members of the service and students being taken into custody for an arrest or, when being safeguarded as an emotionally disturbed person.

SCOPE

HANDCUFFING/RESTRAINING POLICY FOR STUDENTS:

The safety of all persons involved is the predominant factor in determining if a student should be restrained and which type of restraint used. When operating in a school environment, the minimum level of restraint necessary should be utilized to secure the student who is being restrained for an arrest or being safeguarded as an emotionally disturbed person. Members of the service should confer and coordinate with school administrative staff, including the principal, dean, teachers and guidance counselor in instances where it may be necessary to restrain a student, when possible and when appropriate and consistent with personal safety, to reduce or eliminate the necessity to use force.

Absent exigent circumstances, handcuffs/alternative restraints/Velcro cuffs should NOT be placed on a student while in a classroom, cafeteria, or area where other students are located. Members of the service should coordinate with school officials to have the student removed to a semi-private location (e.g., principal's office, school security office, etc.) when possible.

When it is necessary to handcuff students 16 years of age and above, metal handcuffs will be used. Alternative restraints will **NOT** be utilized for students sixteen years of age and above.

RESTRAINING STUDENTS UNDER 12 YEARS OF AGE:

Metal handcuffs should not be used on students less than twelve years of age without prior approval of the neighborhood coordination sergeant, patrol sergeant or school safety supervisor, whenever possible. Metal handcuffs will only be used as a last resort when other means of restraint are not effective and the student, members of the service or others, would face a risk of bodily harm if metal handcuffs were not used.

The Department is committed to recognizing that handcuffing students in a school facility has unique and sensitive aspects. Incidents that are not criminal but are related to school discipline only, are generally not a police matter, but fall under the purview of school officials. Members of the service will ordinarily defer to school officials for appropriate action when incidents committed by students are related only to school discipline. School actions could include parent conferrals, referral to guidance counselors, suspension and/or initiation of mediation procedures. Incidents committed by students within schools that are

SCOPE (continued)

low level, non-violent misdemeanor crimes or violations may also be referred to school officials for appropriate action, after a review of the incident by members of the service and a conferral with the school principal/designee.

For the safety of all concerned, the Department's policy is to rear handcuff students who are arrested in a school facility unless mitigating circumstances dictate not to. Consideration should be given to a student's age or special needs status when determining how a student is restrained. A decision may be made not to rear handcuff or use restraints when such special circumstances exist.

Verbal commands, constructive restraint or alternative restraints should be strongly considered or attempted prior to utilizing metal handcuffs.

A student less than twelve years of age will **NOT** be handcuffed to a restraining bar, chair, railing, or other fixed objects and must be kept under constant observation by uniformed member of the service/school safety agent at all times.

Precinct commanding officer/executive officer/duty captain will investigate and prepare a report on **Typed Letterhead** when metal handcuffs are utilized on a student less than twelve years of age, and include a determination regarding the necessity and appropriateness of utilizing metal handcuffs. This report will be forwarded to the Chief of Patrol along with a copy to the Commanding Officer, School Safety Division.

DEFINITIONS

CONSTRUCTIVE RESTRAINT – Physical control, with no restraining device employed, using the minimal amount of physical force necessary to control movement in order to ensure the safety of the student (i.e., for use on a student who is obeying all commands).

ALTERNATIVE RESTRAINT – A Velcro restraining device that is an alternative to metal handcuffs when taking a student into custody, who poses a possible safety risk, risk of flight, and/or non-compliance. Only those members of the service trained in the use of Velcro restraining devices may use these alternative restraints. Alternative restraints will not be utilized for students sixteen years of age or older. All school safety agents carry and are trained in the use of alternative restraints/Velcro cuffs.

SPECIAL EDUCATION STATUS – Students with physical, intellectual, or emotional disabilities. Students may have one or more types of disabilities. Students with special education status may be attending any New York City public school.

PROCEDURE

- UNIFORMED MEMBER OF THE SERVICE**
1. Notify, confer, and coordinate actions with School Safety Division personnel and the principal/designee, prior to taking police action, or when responding to a student experiencing emotional issues in a public school facility, unless exigent circumstances exist.
 - a. If conferrals with School Safety personnel or the principal/designee are not possible prior to effecting an arrest due to exigent circumstances, then a notification of the arrest MUST be made to School Safety Division personnel and school principal/designee as soon as practical after the arrest has been effected, or a student has been restrained for emotional issues.
 - b. During a conferral with the principal/designee and School Safety Division personnel, discussions should include the option of referring low level non-violent criminal incidents and violations of law committed by a student in a school facility, to school officials for appropriate action in lieu of arrest or a summons.
- UNIFORMED MEMBER OF THE SERVICE/ SCHOOL SAFETY AGENT LEVEL I-III**
2. Inform school personnel of the decision to effect an arrest and the basis of that decision unless physical resistance, flight or other factors render such procedure impractical.
 3. Remove student, if possible, to a semi-private location (e.g., principal's office, school security office, etc.).
 4. Inform student of authority and cause for arrest, unless physical resistance, flight or other factors render such procedure impractical.
 5. Use appropriate level of restraint, as applicable (e.g., constructive restraint, alternative restraints/Velcro cuffs, or metal handcuffs), based on factors described in ADDITIONAL DATA statement under heading "OPERATIONAL CONSIDERATIONS."
 6. Request neighborhood coordination sergeant, or if unavailable, patrol supervisor to respond to the scene, whether being taken into custody for an arrest or being safeguarded as an emotionally disturbed person.
 7. Keep the student under constant supervision regardless of level of restraint used.
 8. DO NOT remove student from a school to a Department facility if, upon investigation, it is determined that the incident involves the commission of a violation.
- NEIGHBORHOOD COORDINATION SERGEANT/ PATROL SUPERVISOR/ SUPERVISOR OF SCHOOL SECURITY**
9. Respond to location and verify that probable cause exists to support the arrest or to supervise the restraining of a student for emotional issues.
 10. Assess the type of restraint used and direct change in level of restraint, as appropriate.
 11. Advise school administrator to contact their Legal Department, if school administrator objects to arrest.
 12. Notify precinct commanding officer/executive officer/duty captain, whenever metal handcuffs are utilized to restrain a student less than twelve years of age for any period of time.

- PRECINCT COMMANDING OFFICER/ EXECUTIVE OFFICER/ DUTY CAPTAIN**
13. Investigate and prepare a report on **Typed Letterhead** when metal handcuffs are utilized on a student less than twelve years of age, and include a determination regarding the necessity and appropriateness of utilizing metal handcuffs.
- a. Forward **Typed Letterhead** to the Chief of Patrol, along with a copy to the Commanding Officer, School Safety Division.
- NEIGHBORHOOD COORDINATION SERGEANT**
14. Meet with principals of schools located within the command at the beginning of each school year to discuss school conditions, and to apprise them of the Department's handcuffing/restraining policy.
- SCHOOL SAFETY AGENT LEVEL I-II**
15. Be aware of all police action taken on school grounds and document any police action taken on **SCHOOL SAFETY DIVISION CRIMINAL INCIDENT REPORT (PD313-147)**.
- SCHOOL SAFETY AGENT LEVEL III/ SUPERVISOR OF SCHOOL SECURITY**
16. Verify that **SCHOOL SAFETY DIVISION CRIMINAL INCIDENT REPORTS** are prepared as required.
- ADDITIONAL DATA**
- OPERATIONAL CONSIDERATIONS**
- Constructive restraint or alternative restraints/Velcro cuffs may be utilized when it is necessary to take a student into police custody. Nothing in this procedure prevents a member of the service from removing restraints from a student or moving to a lower level of restraint (i.e., from metal handcuffs to alternative restraints or, from alternative restraints to constructive restraint) when the incident has stabilized and the student is no longer a danger to themselves or others.*
- The safety of all persons involved is the predominant factor in determining if a student should be restrained, and if restrained, which method is utilized. It is incumbent on the member of the service to use a reasonable belief standard in determining the level of restraint. Factors that may be considered in making this determination include the following:*
- a. *Age of the student (generally a student who is less than twelve years of age; however, students under the age of sixteen may be eligible for alternative restraints, dependent upon circumstances)*
 - b. *Physical stature of the student*
 - c. *Type of offense/nature of incident (including use of weapons)*
 - d. *Presence of student's parent/guardian*
 - e. *Special education status*
 - f. *The reputation of the student with school authorities (including whether the student has a history of emotional or behavioral difficulties)*

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
215-13	01/08/20		5 of 5

ADDITIONAL DATA (continued)

- g. *The student's demeanor and compliance with instructions given by school staff, parents, and members of the service*
- h. *Whether the student is demonstrating behavior that may cause imminent harm to themselves or others*
- i. *Whether there is possible risk of escape*
- j. *Medical, mental, physical and/or emotional condition/limitation of the student, if known.*

*If a juvenile has been arrested and removed from a school to a Department facility for arrest processing, a notification must be made to the Juvenile Crime Desk. The Juvenile Crime Desk will assist supervisors in making a determination as to whether that juvenile should be released on a **JUVENILE REPORT SYSTEM WORKSHEET (PD377-159A)** or, if the juvenile should be processed as a Juvenile Delinquent as per P.G. 215-09, "Offense Committed by a Juvenile Under 17 Years of Age (Other than a Juvenile Offender or Adolescent Offender)."*

LEGAL CONSIDERATIONS

Whether probable cause to arrest exists will be determined by the Police Department. While the desires of school personnel (principals, teachers, etc.) may be considered by the member of the service in determining whether an arrest is warranted, the views of school personnel are NOT controlling. In the event a conflict arises between a member of the service who wishes to effect an arrest of a student and school personnel, the member of the service will request the response of the neighborhood coordination sergeant or, if unavailable, the patrol supervisor.

The final decision as to whether to take a student into custody for a criminal offense and the method of restraint rests with the ranking uniformed police supervisor present at the scene.

Under no circumstances will school personnel be permitted to interfere with an arrest.

ADDITIONAL DATA

LEGAL CONSIDERATIONS

When a uniformed member of the service wishes to investigate a school-related crime, the principal/designee must permit the interviewing of school staff, or other non-student witnesses/victims. These individuals, however, may not be compelled to submit to such questioning.

When a uniformed member of the service wishes to question a student in school regarding a school-related crime, the principal/designee will make every reasonable effort to contact the student's parent/guardian. If notification is made, the principal/designee, or member of the service, shall consult with the parent/guardian about how the parent/guardian wishes to proceed. If the parent/guardian does not object, the principal/designee must allow the student to be questioned. If the parent/guardian cannot be reached, the principal/designee must permit the uniformed member of the service to question the student under the following circumstances:

- a. *If the parent/guardian of a student who is suspected of committing a crime cannot be reached, the uniformed member of the service may not question the student unless the member feels there is a continued threat of imminent danger. In such cases, the member of the service shall determine whether or not to proceed with questioning the student and will consult with principal/designee, as appropriate.*
- b. *If a parent/guardian of a student who is not a suspect (i.e., victim or witness) cannot be reached, a uniformed member of the service may not question the student unless there are exigent circumstances warranting proceeding with the questioning. In such cases, the member of the service shall determine whether or not to proceed with questioning the student and will consult with principal/designee, as appropriate.*
- c. *In cases where questioning is conducted without parental notification, the principal or designee may be present during the questioning. The principal or designee, however, may not compel a student to submit to questioning.*

Imminent danger or exigent circumstances may include, but are not limited to, an active investigation of a violent crime including homicide, arson, robbery, sex offenses, weapons possession, or assault where there are reasonable grounds to believe that a current or former student is a suspect, or has information concerning the investigation, that is necessary to protect the health or safety of students or others.

*Where it is clear that a student is a suspect in a crime, and such questioning may elicit incriminating statements, Miranda warnings must be issued. If the student is sixteen years old or younger, **MIRANDA WARNINGS FOR JUVENILE INTERROGATIONS (PD244-1413)** should be read while the principal/designee or parent/guardian is present. Questioning should be done in a manner which is least disruptive to the school and the student's education to the maximum extent possible, consistent with personal safety.*

When a uniformed member of the service wishes to access student information from NYC Department of Education records for the purposes of an investigation or arrest, a uniformed member of the service must obtain a court order or subpoena, unless there is a health or safety emergency, or written consent of the student's parent/guardian, or written consent of the student, if eighteen years of age or older. Absent such court order or subpoena, or exceptions above, principals or other school staff will not release student information. This includes NYPD school safety agents.

A health or safety emergency is a situation that presents imminent danger (as described above) or requires the immediate need for information to avert or defuse unusual conditions or disruptions.

SEARCH PROTOCOLS FOR SCHOOL SAFETY AGENTS

DATE ISSUED:
05/20/19

DATE EFFECTIVE:
05/20/19

REVISION NUMBER:

PAGE:
1 of 3

PURPOSE

To establish the protocols for the search of students, their possessions, and their lockers by School Safety Division personnel.

SCOPE

A student's possessions and person may be searched by a school safety agent provided that school officials have reasonable suspicion to believe that the search will turn up evidence that the student has violated or is violating either the law or school rules and regulations. The extent or the scope of the search must be reasonably related to the objective of the search and not excessively intrusive in light of the age and sex of the student and the nature of the infraction.

PROCEDURE

When conducting searches of students, their possessions, or their lockers:

SEARCH OF STUDENTS AND THEIR POSSESSIONS (BAGS, CLOTHING, ETC.)

SCHOOL SAFETY AGENT

1. Conduct searches of students and their belongings only on behalf of principals or their designee, except if an emergency condition exists. (See ADDITIONAL DATA statement under heading, "EMERGENCY SEARCHES OF STUDENTS AND THEIR POSSESSIONS").
2. Bring the student to a location designated by the principal or designee, if it is determined that a search is warranted.
3. Inform the student that there are reasonable grounds to believe that they have violated or are violating the law or school rules and regulations.
4. Question the student as to whether he/she has anything in their possession **not** permitted in school, prior to conducting the search. If the student acknowledges that he/she is in possession of contraband, ask the student to remove it from their person or belongings.

SCHOOL PRINCIPAL/ DESIGNEE

5. Remove the item, which is believed to be evidence of the student violating a law or school rules and regulations, if student refuses to remove same when asked by principal/designee.

SEARCH OF LOCKERS

SCHOOL SAFETY AGENT

6. Inform the principal or designee when there is reasonable suspicion that a student's locker contains contraband.
7. Search locker, only at the direction of principal or designee, except if an emergency condition exists. The principal or designee must be present while the search of the locker is conducted. (See ADDITIONAL DATA statement under heading, "EMERGENCY SEARCHES OF LOCKERS").

WHEN A STUDENT IS FOUND TO BE IN POSSESSION OF CONTRABAND

SCHOOL SAFETY AGENT

8. Notify the command concerned, if item is a violation of law, and follow appropriate procedure for the invoicing of property and arrest of student(s).
9. In non-arrest circumstances, request precinct personnel to respond to take custody of the contraband and invoice items seized.
10. Take control of and invoice the property under Department of Education procedures, if item is a violation of school rules and regulations **only**.

ADDITIONAL DATA

LEGAL CONSIDERATIONS

Nothing in this procedure supersedes the rights and responsibilities of uniformed members of the service regarding search and seizure under applicable provisions of the Criminal Procedure Law.

SEARCH GUIDELINES

If the student declines to remove the item or denies possession of any contraband, a search may be conducted at the direction of the principal/designee. To the maximum extent possible, if the search involves contact with the student, the search shall be conducted by a school safety agent of the same gender as the student being searched. In situations where a student's gender is not immediately apparent or a student objects to the gender of the school safety agent assigned to perform the search, the school safety agent's supervisor will assign a school safety agent of the gender requested by the student, consistent with school safety agent safety and resource availability. Consistent with the privacy concerns of the student, only those school safety agents reasonably necessary to conduct the search should be present for the search. Under no circumstances shall school safety agents conduct searches for the purpose of determining gender. Additionally, school safety agents shall not ask questions about a student's anatomy without a reasonable basis for doing so. Refer to P.G. 203-10, "Public Contact – Prohibited Conduct."

Under no circumstances will a strip-search of a student be conducted.

EMERGENCY SEARCHES OF STUDENTS AND THEIR POSSESSIONS

An emergency condition is an incident that requires immediate intervention to protect the safety and security of the school community or any person. A search may be conducted if there is reasonable suspicion to believe that a student has violated or is violating the law or school rules and procedures. Once the emergency condition is under control, the school safety agent will immediately take the student to the principal or designee and advise the principal/designee of the situation.

EMERGENCY SEARCHES OF LOCKERS

An emergency condition is one that requires immediate intervention to protect the safety and security of the school community or any person. Once the situation is under control, the principal or designee will be immediately advised of the situation.

ABANDONED INFANTS/OPERATION SAFE HAVEN

DATE ISSUED:

REVISION NUMBER:

PAGE:
1 of 3

PURPOSE

To ensure the safety of any abandoned infant and familiarize uniformed members of the service with the provisions of the Abandoned Infant Protection Act.

SCOPE

The Abandoned Infant Protection Act is designed to protect the lives of newly born infants by encouraging that they be left with a responsible person or in a safe, suitable location (a “safe haven”) rather than simply abandoned in a possibly dangerous way. The law establishes an affirmative defense to the crime of Abandonment of a Child (Penal Law 260.00) and Endangering the Welfare of a Child (Penal Law 260.10), in certain circumstances as follows:

- a. The abandoned infant appears to be not more than five days old, and,
- b. The person abandoning the child intends for the child to be safe from physical injury and to be cared for in an appropriate manner, and,
- c. The person abandoning the child indicates such intent by leaving the child with a responsible person or in a safe haven (e.g. hospital, firehouse, police precinct, etc.), and promptly notifies a responsible person of the child’s location.

NOTE

The law does not provide an affirmative defense to other charges such as assault.

ADDITIONAL DATA

*The Department must balance the need of the Department of Education to comply with the federal regulations against the privacy rights of the complainant. For this reason, members of the service who process these requests must do so in a thorough and timely manner, but report the results in a way that only relates the facts necessary for school administrators to determine if a qualifying incident has in fact occurred. The sample below provides the format best suited to this end. In the interest of efficiency, commands may utilize a pre-printed letter on **OFFICIAL LETTERHEAD** to prepare the report. Should the principal or designee request information beyond whether a qualifying incident has been reported, such as the alleged details of an incident or the progress of an investigation, the member will confer with both the detective assigned and the Deputy Commissioner, Legal Matters.*

All reports will be formatted with proper date, salutation and signature block in accordance with Department procedure for preparing correspondence. The body of the text will be prepared as such:

21. Document the Juvenile Desk – Intake Log number in the “Narrative” section of the **JUVENILE REPORT SYSTEM WORKSHEET (PD377-159A)**, or in the “Details” section of the **COMPLAINT REPORT WORKSHEET (PD313-152A)**, and the “Narrative” section of the **ON-LINE BOOKING SYSTEM ARREST WORKSHEET (PD244-159)**.

ADDITIONAL DATA

Juvenile Desk personnel will make a recommendation whether to remand or release on recognizance a juvenile based on several factors including the age of the juvenile, the offense charged, the information provided by the arresting officer, and the results of comprehensive background checks of the juvenile and their parent(s). The ultimate decision making authority, however, remains with the supervisor at the detention command. This provides the flexibility to respond to information or circumstances known only to supervisors at the field command. However, the discretion to depart from the recommendations of the Juvenile Desk should be founded on the rationale that the Department will act on the principle of “what is best for the child” balanced by appropriate measures to discourage future criminal behavior. Examples of considerations that should not impact discretion are the availability of vehicles for transport or shortage of personnel. In cases where conditions in the field necessitate a departure from the Juvenile Desk recommendation, the desk officer must confer with a Juvenile Desk supervisor. If after conferral with the Juvenile Desk supervisor, the desk officer’s decision is to not follow the recommendation of the Juvenile Desk, the commanding officer of the command of detention, will prepare a report, on Typed Letterhead, to the Real Time Crime Center explaining the reason for the non-compliance.

*School safety agents who detain and remove a juvenile to a police facility for arrest processing or for the issuance of a **JUVENILE REPORT SYSTEM WORKSHEET** and **COMPLAINT REPORT WORKSHEET**, as per P.G. 215-08, “On-Line Juvenile Report System,” are also required to comply with the above procedure. When school safety agents have removed a juvenile to a police facility for processing, they will notify the School Safety Division (SSD) Operations Center prior to calling the Juvenile Desk. The SSD Operations Center member will issue the agent a SSD Operations Center serial number for entry on a **SCHOOL SAFETY DIVISION CRIMINAL INCIDENT REPORT (PD313-147)**, if appropriate. When the detention of a juvenile takes place within school grounds, the SSD Operations Center will contact the Juvenile Desk on behalf of the arresting agent, if necessary. This process will ensure that the SSD Operations Center remains aware of all enforcement activity occurring in and around New York City public schools.*

It is not the function of the Juvenile Desk to collect or disseminate statistical data on juveniles and juvenile incidents.

PURPOSE

To provide for the appearance of arresting officers at the weekend Department of Probation intake location, at the Corporation Counsel office, when a juvenile delinquent has been taken into custody, delivered to the appropriate facility designated by the Administration for Children's Services (ACS), and the respective borough Family Court will not be in session due to the weekend or court holiday

DEFINITIONS

BOROUGH FAMILY COURT- A location in the borough of arrest where juvenile delinquents are routinely brought to be arraigned during non-holiday weekdays.

MANHATTAN CRIMINAL COURT – All weekend/holiday juvenile delinquent court processing will take place at Manhattan Criminal Court. The Manhattan Criminal Court is located at 100 Centre Street.

PROCEDURE

 - a. Be guided by P.G. 208-20, "Turnover Arrests" when re-assigning an arrest.
 - b. Ensure assigned officer is given arrest(s) which will be arraigned in Criminal Court.

NOTE

Due to the challenges that may occur when processing prisoners in two different courts (Family and Criminal Court), it is mandated that an arrest involving an adult/juvenile offender/adolescent offender and juvenile delinquent be separated and assigned to different officers (e.g., juvenile delinquent processed in Family Court; adult prisoner/juvenile offender/adolescent offender processed in Criminal Court). The assigned officer given the arrest(s) that will be arraigned in Criminal Court must re-interview the complainant/witness in order to prevent double "hearsay."

However, if a determination is subsequently made to charge the juvenile as a juvenile delinquent and not a juvenile offender, then the official arrest photograph taken at the borough court section booking facility will be deleted, and the Digital Camera Capture Station System photograph will become the official arrest photograph.

**ARRESTING
OFFICER**

5. Properly place juvenile in front of the “Photograph Background Board” prior to taking the arrest photograph.
6. Take one full frontal photograph of the juvenile utilizing the command’s Digital Camera Capture Station System, and crop the image to obtain a centered, straight-on, in-focus photograph of the juvenile.

9. Save the juvenile’s image if the requirements listed in steps “5,” “6,” “7,” and “8” are satisfied.

NOTE

The digital capture system will automatically verify the quality of the photograph taken. The member of the service will have three attempts to take a photograph that passes validation. Only after three unsuccessful attempts may a member override the validation and submit a photo. All photographs taken with the digital capture system, including DESK APPEARANCE TICKETS (DATs), are subject to this quality control procedure and must pass validation.

If the juvenile refuses to be photographed, the arresting officer will notify the desk officer. The desk officer will attempt to obtain compliance from the juvenile. If the juvenile continues to refuse to be photographed, the desk officer will confer with the Legal Bureau.

SCHOOL RELATED THREATS AT A NYC DEPARTMENT OF EDUCATION SCHOOL/PROPERTY

DATE ISSUED:
01/08/20

DATE EFFECTIVE:
01/08/20

REVISION NUMBER:

PAGE:
1 of 2

PURPOSE

To ensure a thorough investigation is conducted regarding school-related threats received at a NYC Department of Education school/property.

DEFINITION

SCHOOL-RELATED THREAT – A threat with no corroborating evidence to support that it will be carried out (e.g., jokes or statements made in anger that are expressions of feelings, or figures of speech, rather than expressions of a genuine intent to harm someone).

PROCEDURE

When a school-related threat has been made at a NYC Department of Education school/property:

UNIFORMED MEMBER OF THE SERVICE

1. Confer with School Safety Division Counterterrorism Unit prior to taking enforcement action against a student regarding school-related threats.
2. Ascertain from principal/school staff any pertinent information about student and specific details of threat.
3. Request response of patrol supervisor.

SCHOOL SAFETY DIVISION COUNTER-TERRORISM UNIT

4. Make recommendation regarding threat based on factors that are determined by the Commanding Officer, School Safety Division.
5. Comply with P.G. 215-17, “*Police Actions, Related Questioning, Arrests and Investigations at a NYC Department of Education School/Property*” when taking enforcement action in a NYC Department of Education facility, or on NYC Department of Education property.

PATROL SUPERVISOR

6. Ensure conferral was made with School Safety Division Counterterrorism Unit.
7. Confer with School Safety Division Counterterrorism Unit supervisor when:
 - a. There is disagreement with recommendation from School Safety Division Counterterrorism personnel.
8. Notify commanding officer/duty captain, if not in agreement with recommendation of School Safety Division Counterterrorism Unit supervisor.

COMMANDING OFFICER/DUTY CAPTAIN

- 9.
- 10.
11. Review circumstances of incident.
Confer with School Safety Division Counterterrorism Unit, if necessary.
Make final determination regarding action to be taken.

ADDITIONAL DATA

This procedure does not preclude a member of the service from ensuring the safety of other students and school administrators when responding to a school-related incident. In the event a member of the service develops information that a subject may be connected to terrorism, he or she must comply with P.G. 212-110, “Communications Between the Intelligence Bureau and Units in the Field Regarding Suspected Terrorist Activity.”

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
215-27	01/08/20		2 of 2

ADDITIONAL DATA *(continued)*

Threats made by students materialize in a myriad of ways (e.g., social media accounts, e-mail, phone, letter, fax, word of mouth, etc.). These communications require a thorough investigation before a student is formally charged with a crime. Presently, the School Safety Division Counterterrorism Unit is the central repository of all threats affecting the New York City school system. Their knowledge and expertise regarding the severity of threats will assist responding officers with making a final determination of whether an arrest of a student(s) is warranted, or if the incident should be referred back to the school for appropriate discipline and/or counseling. When notified, School Safety Division Counterterrorism Unit personnel will assess the exigency of the alleged threat to determine if it is a low-level, unverified threat with little substantive evidence to warrant detention, or if the threat is serious enough to support a charge based on probable cause. Furthermore, School Safety Division Counterterrorism Unit personnel will make follow-up notifications corresponding to the appropriate threat level.

When the School Safety Division Counterterrorism Unit determines that the incident in question is a low-level, unverified threat and is being referred back to the school for discipline, and/or no further investigation is needed, it is not necessary to notify the Intelligence Bureau in regard.

ADDITIONAL DATA *When an aided person is placed in care of ambulance or medical personnel at a hospital, the authority and responsibility for the medical care of the aided rests solely with hospital personnel.*

Uniformed members of the service concerned shall cooperate with ambulance/hospital personnel in every reasonable manner.

If a person is unconscious in a manhole, the uniformed member of the service concerned should immediately request the services of the Emergency Service Unit. If there is reason to believe that the victim was asphyxiated by lack of oxygen, or toxic gas in the manhole, the member WILL NOT DESCEND into the manhole unless equipped with a self-contained oxygen breathing apparatus such as a Scott Air Pack, NOT a filter mask as used by the military. If a person is unconscious in a manhole and there is reason to believe the atmosphere in the manhole is safe, the member concerned, before descending into the manhole, shall obtain a rope or similar article and tie the rope, etc., securely around his/her body. A capable person outside the manhole should hold the free end.

A member of the service (uniformed or civilian) who receives a report of a crime involving personal physical injury, death or loss of essential personal property to an innocent crime victim will notify the victim, or a dependent or surviving relative, of the State Crime Victim's Compensation Program and that additional information and applications are available at any precinct stationhouse, police service area or transit district.

Whenever a uniformed member of the service is present at the scene of an aided case that is not life threatening, and there is a difference of opinion between the aided, aided's family, or other interested parties and Emergency Medical Service (EMS) personnel relative to the medical treatment or removal of the aided to a hospital, the member concerned will IMMEDIATELY request the patrol supervisor and an EMS supervisor to respond to the scene. If the patrol supervisor is not available, the Communications Section dispatcher will automatically direct the patrol supervisor from the adjoining command to respond without delay.

The patrol supervisor will immediately respond to ascertain the facts, and if the situation is resolved, the request for the EMS supervisor will be canceled. If the situation cannot be properly resolved, the patrol supervisor will make a second request for an EMS supervisor to respond to the scene.

When responding to an aided case, and the aided is the victim of domestic violence, uniformed members concerned will ensure that photographs are taken of the visible injuries, as per Patrol Guide 208-39, "Family Offenses/Domestic Violence (Digital Photography of Visible Injuries/Damaged Property)."

NYC Well is a treatment referral program for individuals or families in need of counseling assistance outside the purview of this Department (e.g., drug/alcohol abuse, mental health related issues, the lonely and confused, etc.). Members of the service responding to aided

cases encountering such individuals or families are directed to give to them a NYC WELL PALM CARD, which contains the program's contact information. NYC Well personnel can be reached by a toll-free number, text, or via website, 24 hours a day, 7 days a week. Texting and live chat services are available in various languages. NYC Well is not intended as an alternative means by which to handle mentally ill or emotionally disturbed persons who may pose a danger to themselves or others. In such situations, members will comply with P.G. 221-13, "Mentally Ill or Emotionally Disturbed Persons."

Uniformed members of the service at the scene of an incident at which an aided is acting in a deranged, erratic manner apparently caused by a drug overdose (e.g., cocaine psychosis, angel dust, heroin overdose, etc.) will request the response of the patrol supervisor. If an ambulance is not immediately available, the supervisor will determine if aided should be removed to the appropriate hospital by utilizing an RMP or await the arrival of an ambulance. The aided is not to be brought to a police facility.

Cocaine induced psychosis or other illegal drug usage may cause violent behavior, which may be a means of self-defense against imagined persecutors. In addition to paranoia, the individual may experience visual, auditory, or tactile (e.g., bugs crawling under the skin, etc.), hallucinations, high body temperature and seizures. Since sudden death may ensue, uniformed members of the service are reminded to have such person brought to an appropriate hospital facility and NOT TO A POLICE FACILITY.

Pending arrival of an ambulance, the uniformed member should allow a sick/injured person to be treated by a doctor, emergency medical technician or paramedic, if such person volunteers his/her services, and the uniformed member reasonably believes the volunteer is a professional. The medical attention should take place, if possible, under the observation of the member concerned. When the emergency situation is under control, request identification from volunteer, including name and address, and record information in digital Activity Log and under "Details" on AIDED REPORT. The volunteer's role is limited to providing medical assistance ONLY. Determination regarding removal procedures via ambulance, Medivac, etc., will be determined by Emergency Medical Service personnel.

HOSPITAL TRANSPORTS

If the patient is initially treated in a hospital other than the one cited in the Removal Order and later released, he or she must still be transported to the hospital named in the Order. When the assigned member is informed by hospital staff that the patient is ready to be transported, he/she will notify the desk officer concerned. The desk officer will then request that an EMS ambulance be dispatched to the hospital where the patient is located for a "Kendra's Law" transfer. EMS will transport the patient and the assigned member to the hospital named on the Removal Order.

However, if the patient is admitted to the initial hospital, even though it is not the hospital named in the Order, NYPD personnel will no longer be required to accompany the patient. The assigned member will notify the desk officer of the circumstances, and that the patient has been admitted. The borough command and Operations will be notified in turn, as noted above. Operations will notify the appropriate AOT Team of the circumstances, and the AOT Team will seek to have the Removal Order vacated.

Sheriff's Department or NYPD personnel may be required to return at a later time to assist in the transport of the subject to another hospital.

In the event that the Human Resources Administration is unable to provide a vehicle, an ambulance will be requested through Communications. Except in extreme cases, Department vehicles will not be utilized for transportation purposes.

Responding members of the service will take appropriate precautions, including the wearing of plastic gloves and facial masks. Facial masks will be provided at the shelter site by the Department of Health and Mental Hygiene.

Due to the medical conditions of the patient and the Department's responsibility to minimize exposure of the patient to others, it is imperative that they be transported only to the designated Health and Hospitals Corporation facility. This includes those situations where the subject to be removed engages in conduct where an arrest is effected for other than refusal to comply with the DOHMH physician/peace officer's order. In these cases, the arrest will be made by members of this Department and P.G. 210-02 "Hospitalized Prisoners," will be followed.

OPERATIONAL CONSIDERATIONS

The Highway District Collision Technician Group and the Highway District Collision Investigation Squad investigators will maintain an open dialogue to ensure a proper and successful investigation is conducted.

A designated member of the Highway District Collision Investigation Squad will coordinate the investigation and presentation of facts to District Attorney concerned.

*When a precinct desk officer is notified that a person who sustained an apparent minor injury in a vehicle collision (**COMPLAINT REPORT** was NOT prepared) has died as a result of the collision, a **COMPLAINT REPORT** and a supplementary **Police Accident Report** will be prepared. The **COMPLAINT REPORT**, supplementary **Police Accident Report** and a copy of the original **Police Accident Report** will be forwarded to the Collision Investigation Squad concerned. Additionally, the Collision Investigation Squad concerned will also be notified by telephone.*

When making a determination as to when an extended roadway closure should be placed into effect in order to assist in a collision investigation (including the length of time a closure will remain in effect and whether or not to partially or fully close the roadway), the severity of injuries sustained by the individual(s) involved should be weighed versus other contributing factors (i.e., the time and day of occurrence, the specific type of roadway involved [e.g., arterial highway, major thoroughfare, etc.], the ability to effectively detour traffic and the need to preserve evidence at the scene). Operations Unit personnel will ensure that the Traffic Management Center is aware of any closures involving an arterial highway.

If a moving violation summons is issued and the violation resulted in a collision that caused the death or serious physical injury of someone other than the violator, the summonsing officer must write "D" for death or "SPI" for serious physical injury in the "Description/Narrative" section of the summons.

ADDITIONAL

LEGAL CONSIDERATIONS

DATA

(continued)

In accordance with Vehicle and Traffic Law, Section 1194.1 subsection (b), when requested to do so, all operators of vehicles involved in motor vehicle accidents are required to submit to a breath test for alcohol.

As there are no legal requirements to submit to a Preliminary Oral Fluid Screening Test, operators refusing to be screened may not be penalized, as would be the case if refusing a breathalyzer, and no paperwork should be forwarded to the Department of Motor Vehicles. Finally, oral fluid for the purpose of conducting the screening test may not be collected from unconscious individuals unable to consent, as this would constitute a warrantless search subjecting any evidence collected to suppression.

OPERATIONAL CONSIDERATIONS

*Report vandalism to a Department vehicle on **Typed Letterhead** to Fleet Services Division and deliver report to borough service station with vehicle.*

The Personnel Safety Desk will forward a copy of reports received to Police Academy, Driver Education and Training Unit.

Operators of Department vehicles involved in a collision are advised to stop the vehicle immediately, extinguish any cigarettes, utilize four-way flashers, raise the vehicle’s hood and utilize flares or any other warning devices. The vehicle should be moved only if its location is hazardous and likely to cause additional collisions.

*When deemed appropriate, if collision involves death or serious injury, the responding precinct commanding officer/duty captain may immediately direct that the operator and/or recorder not be assigned to duty in a Department vehicle, if such action is based upon their determination, after investigation at the scene. This immediate action, as well as any further action, will be subject to review by the members’ precinct/unit commanding officer. All proposed disciplinary action will be indicated on the **COLLISION REPORT - POLICE DEPARTMENT VEHICLE** as a recommendation.*

If Department vehicle operator is NOT assigned to precinct of occurrence, duplicate copies of all reports prepared will be forwarded to operator’s commanding officer.

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:

ADDITIONAL DATA (continued)

*If Department vehicle involved in collision is not permanently assigned to precinct of occurrence, send duplicate copies of **Police Accident Report** and **COLLISION REPORT - POLICE DEPARTMENT VEHICLE** to commanding officer concerned.*

If a collision occurs with a Department vehicle outside the confines of New York City, the operator of vehicle is to notify the Operations Unit and provide particular details of accident (i.e., vehicle number, operator information, additional occupants, if any injuries, etc.). The operator of said vehicle is to request the response of the appropriate police agency of the jurisdiction concerned in order for the completion of all necessary paperwork as required by New York State. All other Department specific required paperwork is to be completed by a uniformed supervisor of member concerned and forwarded as outlined in this procedure. When possible, member concerned is to take photographs of damage to all vehicles involved, utilizing a Department cell phone or other Department device, or by any other means available.

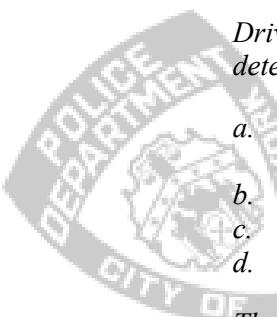

All bureaus (e.g., Detective, Transit, Housing, etc.) should designate a supervisory member of the service to review reports involving members of their command.

All bureau executive officers should review the semi-annual Department Vehicle Collision Summary report prepared by the Personnel Bureau and, where needed, develop appropriate collision reduction programs specific to their bureaus.

If the need to interview a member of the service under the provisions of P.G. 206-13, "Interrogation of Members of the Service" becomes apparent and a serious violation is alleged or sufficient justification is present, although the violation is minor, a member will be permitted sufficient time to have a representative respond prior to start of interview.

Members of the service who were involved in Department vehicle collisions in which it has been determined that the member's driving ability was a contributory factor to the incident would benefit from the Driver Education and Training Unit's "Collision Retraining Course." However, depending upon the circumstances, other corrective measures such as disciplinary action may be more appropriate. Therefore, to ensure that only those members who would benefit are scheduled for retraining, the following guidelines are offered:

Driver retraining should be implemented only if the operator of a Department vehicle is determined to be at fault due to a driving deficiency based on factors such as:

- 
- a. weather conditions which affect the road surface
 - b. loss of control
 - c. backing
 - d. fender judgment
 - e. mirror usage (vans)
 - f. avoiding obstructions, debris, potholes
 - g. braking
 - h. turn negotiation

*The precinct/unit commanding officer will be responsible for ensuring that appropriate individuals attend collision retraining within **ninety days** of the collision. These provisions will be strictly adhered to absent exigent circumstances, i.e., extended sick leave or other valid reasons preventing timely retraining.*

Commanding officers are reminded that the Driver Education and Training Unit is a tool best utilized to improve a member's overall driving performance. It should not be viewed as disciplinary action. The Commanding Officer, Driver Education and Training Unit, is available to all commanding officers for conferral whether scheduling a specific member for retraining would be appropriate.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
217-06	03/03/21		10 of 11

ADDITIONAL DATA (continued)

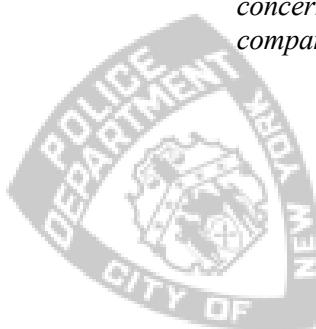

New York State Vehicle and Traffic Law section 1104(a) allows the driver of an authorized emergency vehicle, when involved in an emergency operation, to disregard regulations with certain conditions. These conditions include proceeding past a steady red signal, but only after slowing down as may be necessary for safe operation, or exceeding the maximum speed limits as long as life and property are not endangered. However, it should be noted that disciplinary action would be more appropriate than driver retraining for those members who are involved in vehicle collisions which occurred as a result of their unsafe disregard of such regulations, as opposed to the member merely having deficient driving skills.

*Amounts of property damage sustained are often unable to be determined in a timely fashion, and whether an injury has in fact occurred, or will be claimed at a future date, is often undetermined. Therefore, patrol supervisors of uniformed members of the service involved in a Department vehicle collision will prepare a MV104L. The MV104L will be prepared at the time of the collision and attached to the **Police Accident Report** prior to forwarding. Civilian members of the service involved in a Department vehicle collision will prepare MV104. PREPARATION OF POLICE ACCIDENT REPORT AT POLICE FACILITY

*Uniformed members of the service are required by law to complete a **Police Accident Report** and investigate the facts whenever any person(s)/party appears at a police facility and reports the following:*

ANY COLLISION which:

- a. *Results in serious injury or death to a person which must be investigated in accordance with P.G. 217-02, "Vehicle Collisions Which Result in Death, Serious Injury and Likely to Die, or Critical Injury"*
- b. *Results in injury to a person and the motor vehicle collision in question is being reported within five days after such collision*
- c. *Involves a commercial vehicle where the damage incurred is disabling enough to result in a vehicle being towed from the collision scene and the motor vehicle collision in question is being reported within five days after such collision.*

*Regarding the above circumstances, if the criteria as stated are met, the person/party requesting the completion of a **Police Accident Report** will be referred to the command where the collision took place. ONLY A UNIFORMED MEMBER OF THE SERVICE (UMOS) will prepare a **Police Accident Report**. The UMOS concerned will ask to view the vehicle in question (if available), and interview those claiming to be party to the collision (if present), before completing the **Police Accident Report**. In ALL cases, the UMOS must note in the "Accident Description/Officer's Notes" section of the **Police Accident Report** whether or not they had the opportunity to actually view the vehicle or interview the person(s) involved in the collision.*

*Any person(s)/party appearing in person at a police facility and requesting initial preparation of a **Police Accident Report** for a collision that does not meet the above criteria shall instead be given a copy of New York State Department of Motor Vehicles form, **Report of Motor Vehicle Accident (MV104)** to complete and submit on their own.*

REQUEST FOR COPY OF COLLISION RECORD SUBMITTED BY MAIL

If involved party opts to file a REQUEST FOR COPY OF COLLISION RECORD by mail, instruct them on what valid form of identification must be included with their request in order to receive a copy of a Police Accident Report. Any mail request not accompanied by a photocopy of a current, valid form of photo identification, i.e., driver's license, passport, etc., and a self-addressed stamped envelope, will be returned. When the request is received along with a valid form of identification, place a copy of Police Accident Report in self-addressed stamped envelope and mail to requestor.

- a. In their discretion a change is warranted and
- b. He/she is the officer of record.

Absent these criteria the member can recommend that the requesting party complete Report of Motor Vehicle Accident (MV104) and submit to the Accident Records Bureau in Albany (address on rear of form). If a Police Accident Report is amended by the uniformed member of the service the caption at the top of the form, "AMENDED REPORT" must be checked.

REQUEST FOR POLICE ACCIDENT REPORT AFTER THIRTY DAYS

MOTORIST FAILED TO YIELD RIGHT OF WAY TO PEDESTRIAN/BICYCLIST NO PHYSICAL INJURY HAS OCCURRED

UNIFORMED MEMBER OF THE SERVICE

1. Issue a Traffic Violations Bureau (TVB) summons returnable to TVB for a violation of the appropriate New York City Traffic Rule or New York State Vehicle and Traffic Law, when:
 - a. Probable cause is established that the motorist failed to yield the right of way to pedestrian/bicyclist; AND
 - b. No physical injury occurred; AND
 - c. Offense occurred in officer's presence.

NOTE

If a situation exists as described in step "1(a)" and "1(b)" BUT the responding officer did not personally observe the incident, the officer may still issue a Civil Summons Returnable to the Office of Administrative Trials and Hearings (OATH) if he/she has been informed of the violation by a reliable complainant or witness. The issuing officer must then be guided by "LEGAL CONSIDERATIONS" under the "ADDITIONAL DATA" statement in this procedure.

2. See examples of New York City Traffic Rules 4-03(a)(1)(i) and 4-04(b)(1) which may apply under "LEGAL CONSIDERATIONS" opposite the "ADDITIONAL DATA" statement below.
3. Describe details of the offense in the space provided on the front page of the Traffic Violations Bureau summons in the caption entitled "Description/Narrative," for example: "A/O observed respondent drive in crosswalk forcing pedestrian to stop to avoid vehicle."

NOTE

In cases where a responding officer did not personally observe an incident wherein a motorist failed to yield the right of way but NO collision resulted, probable cause to issue a Civil Summons Returnable to OATH, for a violation of Administrative Code Section 19-190(a), may be established based on the statement of a witness. Be guided by Patrol Guide 209-12, "Personal Service of Civil Summons Returnable to the Office of Administrative Trials and Hearings (OATH) - General Procedure - Non-CJRA Offenses."

ADDITIONAL DATA

LEGAL CONSIDERATIONS

There may be circumstances where a uniformed member of the service does NOT personally observe a collision involving a motorist and a pedestrian/bicyclist which results in a physical injury. In such circumstances, uniformed members may develop probable cause by interviewing witnesses.

In cases where a responding officer did not personally observe an incident, probable cause to issue a Civil Summons Returnable to OATH may be established based on the statement of a witness. In the “Details of Charge(s)” section of the summons, the issuing officer should indicate, for example, that he/she was “informed by John Smith, whose contact information is known to the NYPD, that he observed...” The officer must also complete the “Statement of Witness” section on the reverse side of the white (OATH) copy of the summons by requesting that the witness sign his/her name to indicate that he/she witnessed the commission of the offense and that the details entered on the summons accurately reflect that observation. If the witness refuses to provide identifying information and/or to sign the “Statement of Witness,” the issuing officer must write “REFUSED” in the caption provided for the witness signature. All information regarding the summons, including the witness’s contact information, if provided, must be documented in the officer’s digital Activity Log.

Uniformed members of the service are reminded that even though personal observation is not required to establish probable cause for a Civil Summons Returnable to OATH, personal observation is required to establish probable cause for a Criminal Court summons and other summonses. A Civil Summons Returnable to OATH is returnable to an administrative court that may only impose civil fines. Generally, hearsay is not precluded in administrative courts.

New York City Traffic Rule 4-03(a)(1)(i) – When a motorist at an intersection has a green light and a pedestrian crosses directly in front of the motorist, Traffic Rule 4-03(a)(1)(i) does not apply because the pedestrian was not lawfully in the cross walk. However, if the motorist were to turn left or right while the pedestrian crossing signal indicates crossing is permitted, a motorist who does not yield to a pedestrian crossing in the crosswalk will have violated Traffic Rule 4-03(a)(1)(i).

New York City Traffic Rule 4-04(b)(1) – When traffic control signals or pedestrian control signals are not in place or not in operation, a motorist who does not yield the right of way to a pedestrian crossing a roadway within a crosswalk when the pedestrian is in the path of the vehicle or is approaching so closely thereto as to be in danger will have violated Traffic Rule 4-04(b)(1). However, if a pedestrian suddenly leaves the curb or other place of safety and walks or runs into the path of a vehicle which is so close that it is impossible for the motorist to yield Traffic Rule 4-04(b)(1) does not apply.

OPERATIONAL CONSIDERATIONS

Determine if the pedestrian/bicyclist had the right of way at the time of the incident. When pedestrian signals are present, pedestrians must adhere to the following guidelines, according to Administrative Code Section 19-195:

- a. “Steady walking person”: Pedestrians facing this signal may proceed across the roadway in the direction of the signal, and other traffic shall yield the right of way to crossing pedestrians.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
217-18	07/01/20		5 of 5

ADDITIONAL DATA (continued)

- b. “Flashing upraised hand or flashing upraised hand with pedestrian countdown display”: Pedestrians facing either of these signals are advised that there may be insufficient time to cross the roadway. Pedestrians already in the roadway shall proceed to the nearest sidewalk or safety island in the direction of the signal. Other traffic shall yield the right of way to pedestrians proceeding across the roadway within the crosswalk toward the signal while the signal remains flashing.
- c. “Steady upraised hand”: No pedestrians shall start to cross the roadway in the direction of this signal; however any pedestrians who are already crossing the roadway while this signal is displayed shall proceed to the nearest sidewalk or safety island in the direction of the signal while the steady upraised hand signal is showing.

When there are no pedestrian traffic signals present, pedestrians and drivers must adhere to the following:

- a. Operators to yield to pedestrians in crosswalk. When traffic control signals or pedestrian control signals are not in place or not in operation, the operator of a vehicle shall yield the right of way to a pedestrian crossing a roadway within a crosswalk when the pedestrian is in the path of the vehicle or is approaching so closely thereto as to be in danger.

When determining if a violation of Administrative Code 19-190(b) has occurred, uniformed members of the service should take all contributing factors into consideration, including:

- a. Location where the pedestrian was crossing (at the corner or midblock)
- b. Whether the bicyclist was in a marked bicycle lane, if available
- c. The speed of the vehicle
- d. The presence of traffic control devices
- e. Whether the motorist was using a cellular phone or other electronic device
- f. Obstructions blocking the motorist's view (a motorist who has an obstructed view must use greater care to avoid pedestrians/bicyclists).

- a. Different property types
- b. Different property categories
- c. Different owners
- d. Property that will be delivered to different locations (e.g., Police Laboratory, Property Clerk, Bomb Squad, OCME, etc.).

When preparing a **PROPERTY CLERK INVOICE** where the items invoiced will be sent or have the potential to be sent to the Police Laboratory for laboratory analysis, the **INVOICE** will not exceed twenty line items.

Uniformed members of the service who do not have a username and/or password and members of other police agencies will sign **PROPERTY CLERK INVOICE** utilizing the digital signature device.

When a vehicle removed by the Sanitation Department or invoiced by this Department has obvious fire damage, the invoicing member will notify Fire Department borough dispatcher; however no **COMPLAINT REPORT (PD313-152)** will be prepared. A Fire Marshal will determine if arson occurred and prepare a **COMPLAINT REPORT**, if necessary.

To avoid confusion, do not use the terms "pairs" or "sets" when invoicing property (e.g., a "pair" of trousers, scissors, etc., refers to one item while a "pair" of shoes, gloves, etc., refers to two items). The term "set" (e.g., chess set, golf set, etc.) does not specifically indicate how many items within the "set." Therefore, when invoicing property, the actual number of items will be entered in the box captioned "quantity" on the **INVOICE** and no reference will be made to "pairs" or "sets."

When an investigation is being conducted, property invoiced pertaining to the case will not be released to a claimant without authorization of investigating officer.

Stamped or perforated currency will never be returned to a claimant or deposited in the Property Clerk's account in any bank under any circumstances. This currency will be forwarded to the Property Clerk who will arrange for reimbursement of the claimant.

OPERATIONAL CONSIDERATIONS

Members of the service should be aware that it is extremely important that all defendant information be listed on the REQUEST FOR LABORATORY EXAMINATION REPORT. If all defendants are not identified, it could be possible that the invoiced arrest evidence, (i.e., firearms, controlled substances, etc.) could be destroyed before the accomplices/facilitators and other co-defendants are tried. This will result in the accomplices/facilitators criminal charges being dismissed.

OCCUPIED VEHICLES HELD TO DETERMINE TRUE OWNER

**DESK OFFICER

**ADDITIONAL
DATA**

OPERATIONAL CONSIDERATIONS

When a member of the service conducts a computer check of an occupied vehicle and the response reads ILLEGAL REGISTRATION, the New York State Department of Motor Vehicles has determined that the vehicle was improperly registered to someone who was the victim of a fraud and the victim never owned the vehicle nor gave anyone permission to register the vehicle in the victim's name. Accordingly, when a uniformed member of the service encounters a motorist during a vehicle stop whose registration comes up on the computer as ILLEGAL REGISTRATION, then this motorist will be arrested and charged with Vehicle and Traffic Law Section 401(1)(a), Operating an Unregistered Vehicle. An immediate investigation should simultaneously be undertaken to determine if probable cause exists that the motorist or any other person has committed the crimes of Criminal Impersonation 2nd degree P.L. 190.25(1), Forgery 2nd degree, P.L. 170.10(2), Offering a False Instrument for Filing 2nd degree P.L. 175.30, or any robbery or larceny charge, if appropriate. If Penal Law arrests are to be made, the vehicle will be taken into custody as arrest evidence; if only a Vehicle and Traffic Law arrest is to be made, the vehicle will be taken into custody to determine its true owner.

*Whenever an arrest is effected involving a vehicle for a charge OTHER THAN those enumerated in step "10" above, the arresting officer will consult with his supervisor to determine whether the vehicle should be seized. The supervisor will communicate with an Assistant District Attorney and request an opinion to determine if the vehicle should be seized as arrest evidence. If an Assistant District Attorney is not available, the vehicle will be invoiced and secured at the stationhouse. However, no category of property will be checked, pending a determination by the Assistant District Attorney. If the Assistant District Attorney advises that the vehicle is not required as evidence, it will be released to the registered owner or his representative. If the owner cannot be located, the vehicle will be sent to the Property Clerk Auto Pound for safekeeping. If it is determined that the vehicle is to be held as evidence, the name and telephone number of the Assistant District Attorney who made the recommendation MUST be entered in the appropriate captions listed immediately above the "Remarks" section on the **PROPERTY CLERK INVOICE**.*

If a vehicle is to be safeguarded at the Property Clerk Auto Pound, the following documents will be forwarded with the vehicle:

- a. **PROPERTY CLERK INVOICE**
- b. *FINEST Printout - NYSPIN acknowledgement*
- c. *VIN Printout (including registered owner's zip code)*

OPERATIONAL CONSIDERATIONS

An OWNER WILL NOT BE NOTIFIED NOR WILL AN ALARM BE CANCELLED on the recovered vehicle until the tow operator has advised that the vehicle has been removed to storage facility.

*If the envelope with the **ROTATION TOW - OWNER NOTIFICATION** and attached copy of the **PROPERTY CLERK INVOICE** is returned by the Postal Service as non-deliverable, attach the unopened envelope to the "Property Clerk Copy" of the **PROPERTY CLERK INVOICE**. A notation will then be made on the duplicate **ROTATION TOW-OWNER NOTIFICATION** that the original was returned undelivered.*

Rotation tow operators will deliver motor vehicles and motorcycles to a designated Department auto pound. Motorcycles are stored and can be reclaimed at a designated Department auto pound. When motor vehicles are delivered to a Department auto pound, the auto pound will immediately notify an authorized third party storage facility to remove and store the motor vehicles. Claimants must initially pay, at the auto pound concerned, the NYPD Rotation Tow and storage fees, in addition to third party transfer and storage fees, to reclaim a motor vehicle/motorcycle, or to obtain a release authorization pass, PRIOR to reclaiming a motor vehicle from the third party storage facility. If a vehicle/motorcycle remains unclaimed after fifteen days, from its delivery date to a Department auto pound, the vehicle/motorcycle will be disposed of according to law.

Department of Sanitation personnel affix a numbered sticker with red lettering and red border to the outside rear of vehicles deemed eligible for Rotation Towing. Therefore, upon notification from the Department of Sanitation of the location of a vehicle eligible for Rotation Towing, the member of the service receiving the notification will immediately notify the desk officer of the following:

PATROL GUIDE

- b. Identity of Sanitation Department member making notification

The desk officer will direct a uniformed member of the service to respond to the vehicle location and make a visual inspection of the vehicle to ensure it qualifies for Rotation Towing in accordance with established criteria set forth on the rear inside cover of the **ROTATION TOWING LOG**. Neither the Department of Sanitation notification nor the affixing of a Department of Sanitation numbered sticker on a vehicle confers automatic Rotation Towing eligibility. FINAL DETERMINATION must be made by a uniformed member based upon visual inspection of the vehicle concerned.

Uniformed members conducting visual inspections of vehicles reported by the Department of Sanitation as eligible for inclusion in Rotation Towing will be guided by the following:

<u>CATEGORY</u>	<u>CLASSIFICATION</u>	<u>PROCEDURE</u>

REVISION NUMBER:

PAGE:
1 of 11

PURPOSE

To ensure that all firearms and firearm-related evidence coming into possession of the Department is properly marked, packaged, sealed, and invoiced in order to maintain a continuous chain of custody.

DEFINITIONS

FIREARM - The Department's definition of a firearm includes:

- a. Any rifle, shotgun, pistol, revolver, derringer, machine gun, etc., with or without a rifled bore
- b. Any starter's pistol, zip gun, air gun, CO₂ hand/long gun, etc
- c. Any type of homemade, modified, converted, etc., gun
- d. Any type of simulated firearm such as a toy gun, imitation pistol, etc
- e. Any type of firearm which is not detectable by a metal detector when grips, stocks, and magazines are removed
- f. Any type of firearm, or part thereof, that is untraceable (i.e., ghost gun)
- g. Any type of firearm, or part thereof, that is created using a three-dimensional printer.

CARTRIDGE - Live ammunition. A cartridge consists of a bullet (projectile), and a shell casing together as one unit. Cartridge(s) will be distinguished based upon the location from which the cartridge was recovered:

- a. Cartridge removed from the chamber of a firearm.
- b. Remaining cartridge(s) removed from a firearm other than the cartridge removed from the chamber (i.e., removed from magazine or removed from cylinder).
- c. Cartridge(s) NOT removed from a firearm but seized in connection with the recovery of a firearm from a person, object, or location AND there is no need to establish a crime scene (for example: cartridge(s) seized from a person's clothing in connection with an arrest where a firearm is recovered; OR, cartridge(s) seized from a home during an investigation where a firearm is recovered AND there is no need to establish a crime scene because all of the perpetrators are identified).
- d. Cartridge(s) NOT removed from a firearm but recovered from a crime scene where a firearm may or may not have been recovered (for example: cartridge(s) found lying in the street after a shooting; OR, cartridge(s) found lying on the floor in an apartment or automobile after a robbery).

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
218-23	03/12/20		2 of 11

DEFINITIONS (continued)

PROPERLY “MARKING” FIREARMS AND FIREARM-RELATED EVIDENCE - Members of the service will utilize a scribe or other sharp writing instrument to scratch their initials and a unique consecutive number on each firearm and each item of firearm-related evidence. For example, if at a crime scene 1 fired bullet and 3 shell casings and a semiautomatic pistol with 1 cartridge in the chamber and 4 cartridges in the magazine are recovered; then the firearm would be numbered 1, the magazine numbered 2, the cartridge in the chamber numbered 3 and the cartridges in the magazine would be numbered 4 through 7, the fired bullet would be numbered 8 and the 3 shell casings would be numbered 9 through 11. It does not matter what particular number a firearm or item of firearm-related evidence is assigned provided the same number is not used more than once. Therefore, in the above example, it also would be proper to have the fired bullet numbered 1, the 3 shell casings numbered 2 through 4, the firearm numbered 5, the magazine numbered 6, the cartridge in the chamber numbered 7 and the 4 cartridges in the magazine numbered 8 through 11.

PROPERLY “SEALING” A CONTAINER - In order to properly seal a container (other than NYPD Plastic Security Envelope), a member of the service must:

- a. Fasten the container securely with EVIDENCE TAPE in a manner to prevent loss/contamination of the evidence and to ensure that if the container is opened there would be obvious damage to the container and/or evidence tape AND sign name legibly across the border between the evidence tape and the container.
- b. An NYPD Plastic Security Envelope has adhesive on the envelope flap and does not have to be fastened with evidence tape. Seal Plastic Security Envelope by removing paper strip exposing the pre-applied adhesive and fold the top of envelope over aligning blue circles. Sign name, tax number, command and date on pre-printed line with denoted captions.

PROCEDURE

Whenever a firearm as defined above, and/or firearm-related evidence comes into the possession of a member of the service, in addition to other required actions:

OPERATIONAL CONSIDERATIONS

*Members should be aware that firearm accessories (e.g., holster, sling, gun case, etc.), that are not affixed to the firearm AND are not needed to make the firearm operable, will not be listed on the same **INVOICE** as the firearm(s) and firearm-related evidence. Instead, the accessories will be listed on a separate WORKSHEET and will be delivered direct to the Property Clerk Division. If there is more than one accessory, invoice all of the accessories on one **INVOICE** if possible, and list each accessory as a separate item on the **WORKSHEET**.*

*Members are reminded that a **PROPERTY CLERK INVOICE** will not exceed twenty line items if the **INVOICE** is being sent or has the potential to be sent to the Police Laboratory for laboratory analysis.*

FIREARMS INVOICED FOR SAFEKEEPING

*Certain firearms coming into possession of members of the service, which are categorized for "Safekeeping", should be listed on one **INVOICE** and must be delivered DIRECT to the Property Clerk Division.*

Firearms within this category are:

- a. *Property of retired, resigned, dismissed, suspended, sick or hospitalized uniformed members of the service.*
- b. *Lawfully possessed property of a deceased person.*

ADDITIONAL DATA *(continued)*

If any of the above described firearms were obtained under circumstances that indicate a valid reason for examination, ONLY the firearms that require examination will be forwarded to the Firearms Analysis Section. All of the firearms that require examination will be listed on one INVOICE, if possible. The reason for the examination will be specifically explained on the REQUEST FOR LABORATORY EXAMINATION REPORT.

DO NOT invoice firearms categorized for safekeeping that are being delivered to the Firearms Analysis Section on the same INVOICE as the firearms that are being delivered DIRECT to the Property Clerk Division.

BIOLOGICAL EVIDENCE

If firearms and/or firearms-related evidence also have bloodstains, DNA, serology, saliva, body fluids, tissue, or any other biological evidence thereon, they will be processed according to the following guidelines:

- a. DO NOT package biological evidence if it is wet; it must be air-dried before it is packaged.
- b. DO NOT package biological evidence requiring examination/analysis in a plastic security envelope or any other type of plastic bag/container. Package and properly seal EACH individual item of biological evidence requiring examination/analysis in a separate paper bag/container. Affix an orange Biohazard label to each paper bag/container.
 - (1) Write command and invoice number on the outside of each bag/container. If more than one bag/container is used, also write corresponding item number on the outside of each bag/container and mark each bag/container as "Bag 1 of ___," "Bag 2 of ___," etc.
- c. Do not mark firearms and/or firearm-related evidence if to do so would contaminate, alter, damage, etc, the biological evidence thereon. Instead, properly mark each separate firearm and firearm-related evidence container that contains DNA/biological evidence in the following manner:
 - (1) Legibly print your name in BLOCK letters.
 - (2) Legibly print the unique consecutive number that will be used to identify the item of DNA/biological evidence that will be packaged therein.
 - (3) If applicable, legibly print the Crime Scene Unit Run Number.
 - (4) Legibly print an accurate description of the item of DNA/biological evidence being placed in the container.
 - (5) If a Biological Evidence Bag is utilized, ensure there is an entry in each caption on each Biological Evidence Bag.

FIREARMS TRACES

All firearms that are delivered to the Firearms Analysis Section (FAS) are automatically traced by the Bureau of Alcohol Tobacco and Firearms (BATF), unless there is a specific request/directive that a firearm(s) trace not be conducted. The results of the automatic firearm(s) trace are not communicated/forwarded to the invoicing member. Consequently, in a routine situation, an investigator who must obtain trace information regarding a firearm should request the firearm trace information from the BATF Regional Crime Gun Center approximately two weeks after the date that the firearm(s) was delivered to FAS. Requests to trace specific firearm(s) are NOT made to the Firearms Analysis Section.

ADDITIONAL DATA (continued)

During the course of an investigation, search/seizure, arrest, etc., if there is an urgent/immediate need to trace a firearm(s), the request to trace the firearm(s) should be made DIRECT to a supervisor assigned to the Joint Firearms Task Force (JFTF). If a JFTF supervisor cannot be contacted, contact the JFTF supervisor through the Detective Bureau Wheel.

*In certain situations, an investigating officer may not want a firearm to be automatically traced by BATF because it might jeopardize an investigation or endanger someone. For example, the firearm may have been purchased by an undercover officer and the investigation is ongoing. In order to prevent an automatic firearm trace from occurring, enter “*** DO NOT TRACE***” in capital letters in the “Remarks” sections of both the INVOICE and the REQUEST FOR LABORATORY EXAMINATION REPORT.*

At any point during the investigation, when deemed appropriate by the unit commanding officer, a request to trace one or more specific firearms, previously identified as “DO NOT TRACE,” can be made by telephone DIRECT to BATF, Regional Crime Gun Center.

PROCESSING COMPUTER EVIDENCE

DATE ISSUED:
08/01/13

DATE EFFECTIVE:
08/01/13

REVISION NUMBER:

PAGE:
1 of 4

PURPOSE

To process and safeguard computer related evidence coming into the custody of this Department.

DEFINITIONS

CENTRAL PROCESSING UNIT (CPU) - A box shaped unit that houses the computer's internal hard drive, memory and central processor, commonly referred to as the "brains" of the computer. The CPU processes all of the work done by the computer, and usually is the terminus for all associated cables. The CPU generally has a numeric descriptor (i.e., 386, 486, Pentium, etc.), which represents the computing power of the unit.

MONITOR - The television type instrument on which the operations and output of the computer are displayed.

KEYBOARD - An input device resembling a typewriter.

MOUSE - A pointing device, which is also used to control the actions of the computer. It is connected to the CPU by way of a cable, and because of its shape and "tail," is commonly referred to as a "mouse."

PRINTER - Another output device that will print, similar to a typewriter, pages from the CPU. Many different types of printers exist, including dot matrix, ink-jet, and laser printers.

PERIPHERALS - There are other types of devices, which can be connected to a computer, for example, scanners, tape drives, modems, speakers, sound cards, etc. In addition, there are other types of electronic equipment that can store valuable evidentiary information. These include personal digital assistants, pocket organizers, and lap top computers.

SCOPE

The Computer Crimes Squad will provide technical assistance in properly securing computer evidence, conducting computer forensic examinations and preparing warrants. The Computer Crimes Squad will make a determination as to whether a response to the scene is required, based on the totality of circumstances presented in each case.

PROCEDURE

Whenever a uniformed member of the service seizes, or expects to seize, evidence consisting of a computer used to commit a crime, or the computer is suspected of being a device that stores evidence.

UNIFORMED MEMBER OF THE SERVICE

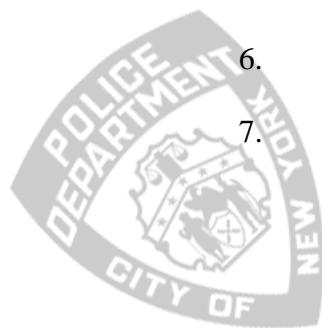

1. Notify the Computer Crimes Squad between 0600 and 2000 hours, Monday through Friday.
 - a. At all other times, contact the Office of the Chief of Detectives.

3. Properly mark all computer evidence.
 - a. Affix identifiable mark to hardware (i.e., monitor, CPUs, printers, etc.).
 - b. Label items to indicate which peripherals were connected together (i.e., Monitor 1, CPU 1, Keyboard 1), and tag all wires indicating which peripheral they were attached to and their terminus.
 - c. Count and package similar floppy disks (i.e., 3.5", 5.25", tapes, etc.) in paper envelopes and have them itemized on **PROPERTY CLERK INVOICE (PD521-141)**. However, do not remove any floppy disks, compact disks, or any other such items from computer's disk drives. These items will be secured in the drives by affixing a strip of masking tape across the drive's opening. The invoicing officer will initial the masking tape. The "Remarks" section of the **INVOICE** will contain a statement concerning the presence or absence of a disk in any of the computer's drives.
 - (1) Plastic Security Envelopes should NOT be used to package floppy disks because they can cause a discharge of static electricity, which can destroy data on the disk. In addition, DO NOT write on floppy disks using ballpoint pens because doing so can result in the destruction of data. Utilize labels or felt tip markers.
4. Invoice computers, floppy disks and related peripherals, which are to be delivered to the Computer Crimes Squad for examination, separately from other property being invoiced.
 - a. Non-computer items are to be processed in conformance with existing Department guidelines.
5. Deliver "Property Clerk" copy of **INVOICE** with computer evidence to the Computer Crimes Squad.

 - (4) What part the computer played in the offense charged
 - (5) What type of information is being sought from the Computer Crimes Squad relative to the forensic examination of evidence.

ADDITIONAL DATA

OPERATIONAL CONSIDERATIONS

Members of the service will not search any hard drives, floppy disks, CD-ROMS or other data storage devices. These items will be examined only by members assigned to the Computer Crimes Squad. Members of the service should be aware that searching directories, or perusing the computer's hard drive, may inadvertently alter or destroy important evidence.

The computer, recovered at a crime scene, may be a valuable source of evidence. To protect the evidence, and to ensure that the information retrieved from the computer can be introduced in court, the following guidelines must be followed:

- *Safeguard the computer's evidence; do not touch the keyboard, or search the hard drive, or execute any of the programs at the scene.*
- *If a modem or other telecommunications device is attached to the computer, unplug the telephone cord from the wall jack immediately to prevent access to the computer and possible destruction of evidence.*
- *If you must power the system off, do not use the on/off switch. Unplug the computer from the wall outlet only. Prior to removing the plug from the outlet, photograph the monitor screen.*
- *When transporting, be aware that data, stored on computers and floppy disks, is extremely sensitive and can be easily damaged. Package these items carefully to avoid inadvertent damage.*
- *Do not write on floppy disks with ballpoint pens. Use labels or felt tip markers.*
- *Do not place floppy disks in plastic security envelopes. This could cause a discharge of static electricity and damage the data on the disk.*

ADDITIONAL DATA

OPERATIONAL CONSIDERATIONS

There is no medical or legal reason for a uniformed member of the service, male or female, to be present in the examining room during the medical examination or evidence collection procedure. Maintenance of the chain of custody of the evidence during the examination is the sole responsibility of attending medical personnel.

If the sexual offense occurred within the previous seventy-two hours, a Sexual Offense Evidence Collection Kit should be used. Not all hospitals may use Sexual Offense Evidence Collection Kits. In such cases, take possession of any other evidence gathering container used and process in accordance with this procedure.

*A Drug Facilitated Sexual Assault Blood and Urine Specimen Collection Kit will be utilized for the collection of blood and urine when it is suspected that the victim of a sexual assault was drugged. This kit is separate from the Sexual Offense Evidence Collection Kit. The kit is composed of two gray-topped blood tubes and a urine container for the collection of specimens, and must be vouchered, on a separate **PROPERTY CLERK INVOICE**, with a separate **REQUEST FOR LABORATORY EXAMINATION REPORT** (for toxicology). If a UMOS suspects a drug facilitated sexual assault based on victim or witness statements or other evidence, inform hospital personnel and request that a kit be used. Hospital personnel will collect the blood and urine for the kit when it is suspected that it is drug facilitated, within 96 hours of when the victim last remembers having a drink. The blood and urine collected in these kits will degenerate after 24 hours, so immediate delivery to the Police Laboratory and the Office of the Chief Medical Examiner, Evidence Unit is imperative.*

*Members will ensure a copy of the **COMPLAINT REPORT** is sent to the Police Laboratory with a Sexual Offense Evidence Collection Kit or any other sexual offense evidence. The Police Laboratory will not accept a Sexual Offense Evidence Collection Kit or any other sexual offense evidence without a copy of the **COMPLAINT REPORT**.*

*Members are reminded that a **PROPERTY CLERK INVOICE** will not exceed twenty line items if the **INVOICE** is being sent or has the potential to be sent to the Police Laboratory for laboratory analysis.*

HANDLING OF RED DYE MARKED CURRENCY AND INTACT "EXPLODING" CURRENCY PACKETS

DATE ISSUED:
08/01/13

DATE EFFECTIVE:
08/01/13

REVISION NUMBER:

PAGE:
1 of 2

PURPOSE

To safely handle red dye marked currency or intact “exploding” currency packets.

PROCEDURE

When currency marked with a red dye must be handled or an intact “exploding” currency packet is found:

UPON LOCATING AN INTACT PACKET OF CURRENCY

UNIFORMED MEMBER OF THE SERVICE

1. DO NOT handle the packet.
2. Evacuate the immediate area.
3. Request the patrol supervisor, Emergency Services Unit and Bomb Squad to respond.

HANDLING OF RED DYE MARKED CURRENCY

UNIFORMED MEMBER OF THE SERVICE

4. Wear disposable gloves.
5. Work in a ventilated area.
6. Wash hands thoroughly after handling currency.
7. Indicate clearly on **PROPERTY CLERK INVOICE (PD521-141)** and Plastic Security Envelope that currency may be contaminated with CS Tear Gas.

ADDITIONAL DATA

OPERATIONAL CONSIDERATIONS

Members of the service responding to a bank robbery, or discovering a packet of banded currency thereafter, should consult with bank employees to determine if an “exploding” money packet was passed.

Do not open property envelopes containing contaminated currency unless absolutely necessary. Sealed plastic envelopes prevent dissipation of contaminated residue. Therefore, follow safety precautions if the envelope must be opened, even after long periods of time have elapsed.

Exploding currency packets release tear gas, which may result in contamination of persons and clothing to varying degrees. Since tear gas adheres to clothing, persons exposed to the gas may contaminate others in their proximity. Therefore, all persons exposed to the gas should be isolated from public contact, if possible, and afforded necessary treatment, including medical evaluation, when indicated.

FIRST AID PROCEDURES FOR EXPOSURE

SKIN

Remove the affected persons from the contaminated area to an open, upwind position. Remain calm and restrict activity. Major discomfort should disappear in fifteen to thirty minutes.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
218-37	08/01/13		2 of 2

**ADDITIONAL
DATA
(continued)**

If stinging or burning sensation on moist skin areas occurs, sit and remain quiet to reduce sweating. Expose affected areas to the air. In cases of gross contamination:

- a. Remove all contaminated clothing immediately
- b. Irrigate affected areas with copious amounts of water (at least two liters)
- c. Wash with soap and water to remove all residue
- d. Washable clothing may be laundered with soap and water
- e. Non-washable clothing may be air dried for a two-day period.

EYES

If there is burning sensation of the eyes, heavy flow of tears, or involuntary closing of eyes, keep eyes open, facing wind. DO NOT rub eyes. Tearing helps clear the eyes. If necessary, wash out eyes with cold water. Tears can be blotted away.

INHALATION

If a burning sensation or irritation of the nose occurs, breathe normally. Blow nose to remove discharge. Nasal decongestants should help if discomfort is severe. Breathing difficulties (burning sensations, chest tightness) are often accompanied by a feeling of panic. In this event, the affected person (s) should be made to relax and kept calm. Talk reassuringly to the person(s) to prevent panic. If discomfort persists or other symptoms occur, the affected person should be removed to the hospital for medical evaluation.

The improper storage, transportation or handling of fireworks could result in serious injury or even death. Caution must be maintained throughout the entire procedure from seizure to disposal. The following precautions must be adhered to for reasons of personnel safety:

- a. *No smoking within fifty feet of any fireworks.*
- b. *Handle all bags and boxes containing fireworks with care.*
- c. *The Bomb Squad should be contacted from the scene whenever large seizures are made, whenever an unusual problem arises regarding fireworks or when any question regarding safety arises.*
- d. *Large amounts of fireworks should not be stored in any Department facility. All fireworks are to be delivered to the Bomb Squad range facility as soon as practical, or as directed by the Bomb Squad after making the required notification as indicated in step "19" above. Small amounts of fireworks can safely be stored prior to transport by avoiding placement near any source of excessive heat such as radiators and portable heaters.*
- e. *Items such as "party snaps," "cracker balls," "torpedoes" or any other fireworks that explode upon impact must be separated from other fireworks. A chain reaction could occur if these sensitive items were to explode in proximity to other fireworks.*
- f. *As a general rule, no more than four bags of fireworks should be transported in an RMP. When fireworks are transported in an RMP, they should be placed in the rear seat as this is away from any source of heat or spark. Within Department passenger vans, fireworks should also be placed on the rear bench seats in accordance with the general rule of no more than four bags per seat.*
- g. *When transporting fireworks in a Department vehicle all windows should be opened a minimum of two inches to avoid toxic fumes. Fireworks should not be placed in the trunk of a vehicle.*
- h. *As a general rule, no more than twenty-five sealed bags or boxes of fireworks should be transported in a Department cargo van.*
- i. *Large seizures of fireworks, including any seizure of more than twenty-five sealed bags or boxes should be transported by a closed-body truck with a separate cab and wood cargo floor. The load must also be secured to keep it from shifting during transport. Open rack or barrier trucks will not be used for transporting fireworks.*
- j. *Prior to transporting a significant amount of fireworks, the member concerned will, in addition to other required notifications, provide a telephone notification to the New York City Fire Department through the Mayor's Citizen Service Initiative Hotline Number, "311." The Fire Department will provide appropriate fire protection apparatus to escort the shipment.*

**ADDITIONAL
DATA
(continued)**

- k. When a large seizure of fireworks is delivered to the Bomb Squad range after dark, no unloading of any trucks will take place due to safety considerations. The final decision to load or unload a particular vehicle rests solely with members of the Bomb Squad. Any such shipments will be maintained overnight inside the secure perimeter of the Bomb Squad range and will be emptied and available for pickup by the command concerned as soon as possible.

All members of the service are reminded that when handling and transporting fireworks, safety is the top priority.

ADDITIONAL DATA

OPERATIONAL CONSIDERATIONS

When invoicing property at an adjoining command, the invoicing officer will select the command where incident occurred as the invoicing command. The “Putaway” function, utilizing PETS, will be conducted at the adjoining command. During the “Putaway” process, members of the service will select the invoicing command as the location where the property will be stored.

Commanding officers of all invoicing commands will ensure that an adequate supply of PROPERTY LOGS, pre-printed serialized PROPERTY CLERK INVOICES, PROPERTY CLERK’S MOTOR VEHICLE/BOAT INVOICES and their associated WORKSHEETS are stored in the property room and made available in the event that PETS becomes inoperable. These INVOICES are not to be utilized to invoice property, motor vehicles or boats until instructed to do so by the Commanding Officer, Information Technology Systems Division. In addition, Department forms PROPERTY CLERK INVOICE WORKSHEET, PROPERTY TRANSFER RECEIPT (PD521-145), COMMAND EVIDENCE TRANSMITTAL REPORT (PD521-155), BOROUGH EVIDENCE TRANSMITTAL REPORT (PD521-156), EVIDENCE TRANSMITTAL REPORT (PD521-158), REQUEST FOR LABORATORY EXAMINATION REPORT – FIRST SHEET (PD521-165), REQUEST FOR LABORATORY EXAMINATION REPORT – SECOND SHEET (PD521-165A), and REQUEST FOR LABORATORY EXAMINATION REPORT – THIRD SHEET (PD521-165B) have been made available as form fillable PDFs on the Department Intranet.

When pre-printed serialized PROPERTY CLERK INVOICES and PROPERTY CLERK’S MOTOR VEHICLE/BOAT INVOICES are received at the command, the commanding officer will ensure that all serial numbers are accounted for. If an INVOICE is found to be missing or duplicated, a report on Typed Letterhead will be prepared and forwarded to the Property Clerk Division. The duplicate INVOICE will be marked “DUPLICATE” and forwarded with the report. A copy of the report will be filed with the remaining supply of INVOICES stored at the command. The report will then be filed when the supply of INVOICES have been exhausted. In addition, the commanding officer will investigate the circumstances of missing INVOICES and take appropriate action.

**ADDITIONAL
DATA
(continued)**

In instances where a vehicle windshield or other glass is cracked, the description of the damage will be noted in the “Comments” area. This will be useful in determining if the windshield glass can be repaired on-site (Borough Service Station or command), or if the vehicle will have to be removed to an authorized glass repair facility.

Air conditioning problems in vehicles can be caused by numerous malfunctions, some of which can be repaired by roadside repair technicians. The roadside repair technician will determine if the air conditioning can be repaired on-site or if the vehicle will need to be removed to a designated Fleet Services Division repair facility.

Technical support for mobility devices can be obtained by calling the Information Technology Bureau (ITB) Service Desk (24 hours/7 days) at (646) 610-6473. The vendor will then make an appointment to troubleshoot and fix the issue at the command. Fleet Services Division will not handle technical support for mobility tablets. Mobility tablets are assigned and labeled to the vehicle they are installed in and are not to be moved to another vehicle. When a vehicle with a tablet installed is placed permanently out of service (i.e., due to a collision, high mileage, poor condition, etc.) return the mobility tablet with the vehicle to Fleet Services Division.

USE OF PATROL KITS

DATE ISSUED:
07/01/20

DATE EFFECTIVE:
07/01/20

REVISION NUMBER:

PAGE:
1 of 4

PURPOSE

To provide instructions to members of the service in the proper maintenance, utilization, and disposal of Patrol Kit items.

SCOPE

A Patrol Kit is a collection of personal protective equipment (PPE) items housed in a white plastic first-aid type carrying case. The case bears the NYPD logo and is marked with the words "Patrol Kit" on its cover. Each Patrol Kit consists of two disposable gowns, two disposable eye/mouth shields, two pairs of heavy duty gloves, two pairs of disposable shoe covers, ten antiseptic wipes, and a disposal "biohazard" bag for use against contact with blood or other potentially infectious materials (OPIM). OPIM includes semen, vaginal secretions, and fluid from the brain, spine, chest cavity, stomach, heart and joints. Saliva or urine not visibly contaminated with blood is not considered to be OPIM. Disposable gloves and Patrol Kit items must be properly disposed of after being utilized to protect one's hands, skin and clothing from direct contact with blood, OPIM, dead human bodies, and animals which may have infectious diseases. Contaminated or damaged personal protective equipment will not be reused and will be discarded in biohazard receptacles at designated Department facilities or hospitals.

PROCEDURE

Maintain and utilize disposable gloves and Patrol Kit items as follows:

VEHICLE OPERATOR

1. Ensure that the Patrol Kit carry case is present and secure in the trunk of assigned/designated Department auto at beginning of tour.
2. Inspect contents of case to verify that all required Patrol Kit items, as listed in the SCOPE statement, are present in the quantities indicated.
 - a. Also ensure that an adequate supply of disposable gloves are available in the Department auto.
3. Make digital **Activity Log** entry indicating results of inspection.
 - a. Report missing/damaged Patrol Kit items to the patrol supervisor and promptly replace them.

NOTE

Adequate supplies of Patrol Kit items/disposable gloves should be maintained at commands at all times and stored where they will be readily accessible for use. At least one carrying case containing a Patrol Kit is to be affixed to a wall in a conspicuous, accessible location at each precinct, transit district, police service area, court section, medical district, Aviation, Crime Scene, Harbor, Mounted Unit and Highway District location.

MEMBER OF THE SERVICE

4. Utilize disposable plastic gloves and Patrol Kit items when necessary to handle persons, animals or items in a safe, sanitary manner.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
219-17	07/01/20		2 of 4

NOTE

The following are examples of when members of the service should use Patrol Kit items/disposable gloves:

- a. *Contact with blood, body fluids, secretions, excretions, etc.*
- b. *Searching dead human bodies*
- c. *Contact with hazardous materials or persons or animals having or suspected of having infectious diseases (see P.G. 212-37, "Hazardous Materials" and 205-10, "Exposure Of Members Of The Service To Infectious Diseases Or Hazardous Materials")*
- d. *Searching prisoners (disposable gloves should ordinarily be sufficient)*
- e. *Fingerprinting (disposable gloves should ordinarily be sufficient).*

Members of the service who do not have access to a Patrol Kit and are present at a scene requiring the use of a Patrol Kit may request one via the communications dispatcher. An available unit possessing the Kit will be directed to respond to the requesting member's location.

MEMBER OF THE SERVICE (continued)

5. Confer with immediate supervisor before using Patrol Kit items/disposable gloves at a parade, demonstration, etc.
 - a. Supervisor will make determination based on circumstances and advise members of proper action.
6. Avoid contact with outside surface of Patrol Kit items/disposable gloves after use if possibility of contamination exists.
7. Remove used gloves as follows:
 - a. Grasp cuff of one glove and remove by pulling glove inside out.
 - b. Place fingers inside second glove and pull inside out.
8. Handle used gloves/Patrol Kit items by uncontaminated surface and place inside plastic bag.
9. Cleanse hands with antiseptic wipe and place used wipe in plastic bag with other contaminated items.
 - a. Seal plastic bag containing contaminated Patrol Kit items/disposable gloves and antiseptic wipe.
10. Refer to the instructions contained in the plastic case housing of the Patrol Kit for information regarding the Kit's safe use and disposal.
11. Deposit only contaminated items in the thirty-two gallon biohazard receptacle lined with a red biohazard bag.

NOTE

Only items contaminated with blood or OPIM need to be disposed of in biohazard receptacles located in each command. Gloves used while fingerprinting or searching prisoners, and PPE items worn but not contaminated, may be discarded in a regular trash receptacle.

12. Wash hands, preferably with anti-bacterial or brown soap, as soon as possible after exposure.

DESK OFFICER/ CENTRAL BOOKING SUPERVISOR

13. Contact Medical Division Sick Desk supervisor to arrange for messenger to pick up regulated infectious waste.
14. Ensure that Medical Division messenger removes and seals the regulated infectious waste liner and places a new biohazard liner in the receptacle.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
219-17	07/01/20		3 of 4

NOTE

Biohazard waste liners should be closed prior to removal from the receptacle in order to prevent spillage. If the outside of a liner or container becomes contaminated, it must be placed within a second suitable liner or container. The regulated infectious waste liners must be transported in a covered, leakproof container with a biohazard label prominently displayed on the outside of the container. The Medical Division messenger shall be appropriately trained in the use of Patrol Kit items/disposable gloves and infection control procedures. Biohazard labels are available from the Quartermaster Section.

**DESK OFFICER/
CENTRAL
BOOKING
SUPERVISOR
(continued)**

15. Make a Command Log entry of facts regarding removal of biohazard waste by Medical Division messenger.

**ADDITIONAL
DATA**

Emergency situations, circumstances, and time constraints may hinder or prevent a member from properly donning Patrol Kit items/disposable gloves, thereby making the member more vulnerable to contamination from blood or other potentially infectious materials. Members who have any contact with hazardous materials, blood, or OPIM will immediately comply with P.G. 205-10, "Exposure of Members of the Service to Infectious Diseases or Hazardous Materials." In the event that a uniform item becomes significantly contaminated (e.g. soaked through with blood or OPIM), the item(s) in question will be removed as soon as possible and placed in the disposable red biohazard liner contained in the Patrol Kit. The member of the service will be allowed to shower as soon as possible.

A uniform item contaminated with small splatters of blood which have not soaked through the item may be machine washed with a non-chlorine bleach separately from other household laundry. A second wash/rinse cycle should then be used to rinse the inside of the washing machine.

Non-disposable uniform items (nameplates, shields, etc.) may be effectively decontaminated with a freshly mixed solution of one part bleach to ten parts water.

Members seeking reimbursement to replace damaged uniform items will refer to P.G. 204-07, "Lost Or Damaged Uniform."

If an Emergency Medical Service ambulance is present at the scene of an incident where members of the service have soiled Patrol Kit items/disposable gloves, such items may be disposed of in the contaminated waste container located in the body of the ambulance. However, Emergency Medical Service ambulances are not to be called to the scene merely for the disposal of soiled Patrol Kit items/disposable gloves. In cases where no ambulance is present, or a private ambulance not under the jurisdiction of Emergency Medical Service is present, or ambulance personnel refuse to allow disposal, Patrol Kit item/disposable gloves should be secured in the plastic bags supplied for such purpose and transported to the precinct/command of occurrence for disposal.

The Health and Hospitals Corporation has granted permission for members of the service to dispose of used Patrol Kit items/disposable gloves in the contaminated waste containers in the emergency rooms of designated municipal hospitals in those situations where Patrol Kit items/disposable gloves have been worn while transporting a patient to that hospital for treatment. These designated hospitals are:

Members of the service are not to bring contaminated Patrol Kit items/disposable gloves to an emergency room for disposal if not transporting a patient for treatment at that hospital. Where a patient has not been transported to a participating hospital or, if the emergency room staff refuses to allow disposal, members of the service will secure the Patrol Kit items/disposable gloves in the plastic bag supplied for such purpose and transport to precinct/command of occurrence for disposal. Commanding officers should seek to establish a relationship with non-municipal hospitals within their commands to which ambulances respond, in an effort to obtain authorization for disposal of Patrol Kit items/disposable gloves in the hospital's emergency room.

REVISION NUMBER:

PAGE:
1 of 3

PURPOSE

To address emergency power outages in a timely and efficient manner, and to ensure that non-essential equipment is removed from emergency electrical receptacles when a power outage occurs.

SCOPE

The Building Maintenance Section is responsible to test, maintain and repair the Department's emergency generator systems (Housing and Transit Bureau facilities will be maintained by the Housing and Transit Authorities as per existing Memorandums of Understanding). Each command's generator system is tested and preventive maintenance performed by the Building Maintenance Section on a regular basis.

PROCEDURE

When a Department facility loses electrical power (regardless of whether or not the emergency generator system is activated):

**DESK OFFICER
/SUPERVISORY
OFFICER**

1. Immediately notify the Building Maintenance Section, twenty-four hours a day, seven days a week.
 - a. Record notification in Telephone Record.

NOTE

If necessary, the Building Maintenance Section will dispatch generator mechanics and electricians to correct any conditions and monitor the system. Only qualified Building Maintenance Section personnel should attempt to start or repair the emergency generator system. Absent exigent circumstances, other members of the service or personnel from outside agencies are not permitted to start or repair the generator system without the approval of a Building Maintenance Section supervisor.

IF THE EMERGENCY GENERATOR HAS BEEN ACTIVATED:**DESK OFFICER
/SUPERVISORY
OFFICER**

2. Immediately survey the command to ensure that only essential emergency equipment and critical computer systems are operating on emergency power.
3. Have all non-essential equipment disconnected from emergency electrical receptacles.

NOTE

All non-essential equipment (air conditioners, vending machines, refrigerators, microwaves, etc.) should be immediately disconnected from emergency electrical receptacles. Emergency electrical receptacles are commonly identified by a red cover plate over the receptacle or raised lettering on the outlet receptacle.

**ADDITIONAL
DATA**

If a command has a single fuel tank for both the heating system and the emergency generator, it is the command's responsibility to maintain the proper fuel level. Commands that have a single fuel tank (see Appendix "A") will ensure that the fuel level remains above the fifty percent level. Commands with two fuel tanks (separate tanks for the heating system and emergency generator system) are responsible for maintaining the fuel level in the tank that supplies the heating system. The Building Maintenance Section will be responsible for maintaining the proper fuel level in the emergency generator fuel

tank. If command personnel require training on how to properly determine the fuel level of the command's fuel tank, a work order should be submitted to the Building Maintenance Section via the on-line work order system. Include in the request for training a contact person, contact phone number and times when the member of the service will be available.

Commanding officers are responsible to conduct a quarterly survey to ensure that all generator rooms, mechanical rooms, and electrical rooms are being utilized only for their intended purpose and not as locker rooms, storage rooms, etc. Items placed within these locations may create a fire hazard, which could endanger all members of the command.

When a member of the service applies for a Restricted Parking Permit, it is permissible to have a Post Office (P.O.) box listed on the member's driver's license, registration and/or insurance card. However, in all cases the member of the service's address of record with the DMV for his/her license and registration, as well as the address on record with the insurance company for the auto insurance all must match the primary residence the member of the service has on record with the Department.

If the mailing address on the registration of the vehicle is a P.O. box, the requesting member MUST attach to the application proof that the insurance policy of the vehicle is issued to the same address as the member's primary residence on record with the Department.

ADDITIONAL DATA

On Election Days, uniformed members of the service assigned to election duty, are permitted to display their valid NYPD Restricted Parking Permits, in authorized vehicles, to park in close proximity to their assigned election posts.

LICENSE PLATE READER DEVICES

DATE EFFECTIVE:

REVISION NUMBER:

PAGE:

PURPOSE

To provide for control, use, maintenance and accountability of License Plate Reader (LPR) devices installed in selected Department vehicles.

DEFINITION

LICENSE PLATE READER DEVICE (LPR) – A specialized camera and computer that is capable of quickly capturing license plate numbers on passing vehicles and then converting them into text that is automatically compared against a “hot list” of license plates of interest (e.g., stolen, wanted, suspended registration or insurance coverage, etc.). An LPR device can identify a target plate within seconds. LPR devices may read each license plate passed and alert the LPR operator when there is a match to a list of specific or partial license plate numbers. The LPR device is not automatically connected to NYSPIN, is not programmed to scan the state of registration on a license plate and will activate upon a partial scan match. Therefore, it is absolutely essential that the LPR operator verify the current status of a vehicle through NYSPIN prior to initiating any law enforcement action (e.g., arrest, summons, etc.).

PROCEDURE

When a License Plate Reader (LPR) device is installed in selected Department vehicles of assigned command:

MEMBER UTILIZING LPR SYSTEM

1. Inspect LPR device for operability and serviceability in assigned vehicle at beginning of tour and report results to desk officer.
2. Activate LPR device and record in digital **Activity Log** the last time LPR device received an updated “hot list.”
 - a. Do not utilize an LPR device if it has not been updated within the last twenty-four hours.
3. Notify patrol supervisor and desk officer if LPR system becomes inoperable during tour.

DESK OFFICER

4. Account for the condition of each LPR device in Department vehicles assigned to the command at beginning of each tour.
 - a. Record results of member’s inspection for each LPR device in the Command Log.
5. Enter on **ROLL CALL (PD406-144)** the assignment of each Department vehicle equipped with an LPR device assigned to the command (e.g., sector “A,” traffic safety, etc.).
6. Contact the Information Technology Bureau (ITB) Service Desk for repairs and maintenance to an LPR device.
 - a. Record notification in the Telephone Record.

UPON THE ACTIVATION OF AN ALARM FROM THE LPR SYSTEM

MEMBER UTILIZING LPR SYSTEM

7. Verify by checking NYSPIN through radio dispatcher or Department mobile device (e.g., smartphone, tablet, etc.) that alarm or vehicle status remains active.

NOTE

The LPR device is not automatically connected to NYSPIN, is not programmed to scan the state of registration on a license plate and will activate upon a partial scan match. Therefore, it is absolutely essential that the LPR operator verify the current status of a vehicle through NYSPIN prior to initiating any law enforcement action, unless there are additional reasons for a lawful stop such as an observed Vehicle and Traffic Law infraction or if circumstances provide sufficient reasonable suspicion to justify a Terry Stop/level 3 encounter, as described in P.G. 212-11, "Investigative Encounters: Requests for Information, Common Law Right of Inquiry and Level 3 Stops."

MEMBER UTILIZING LPR SYSTEM (continued)

8. Take necessary law enforcement action (e.g., arrest, summons, Rotation Tow, etc.).
 - a. Members shall be guided by P.G. 221-15, "Vehicle Pursuits," whenever they are in pursuit of a vehicle due to activation of an alarm from the LPR system.

ADDITIONAL DATA

The LPR system allows for the proactive entry of license plate numbers and partial plate numbers, enabling the system to activate when the wanted vehicle's license plate has been read by the LPR device.

The Real Time Crime Center can be contacted to conduct a search of past records of license plate numbers searched.

LPR devices are intended to provide access to stolen and wanted files and may also be used in furtherance of a criminal investigation. The use of an LPR device for any other purpose is strictly prohibited.

The camera lens of an LPR device may be cleaned only with a glass cleaner that is applied with a soft cloth. Other types of maintenance or manipulation by members of the service are strictly prohibited. The LPR equipment must not be moved from its mounting location under any circumstances.

If the LPR is inoperable or requires maintenance, the ITB Service Desk will be contacted. A Department vehicle does not have to be placed out of service while waiting for the repair of the LPR device.

CIMS: ORGANIZATIONAL STRUCTURE

DATE ISSUED:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
08/01/13	08/01/13		1 of 2

PURPOSE

To outline the CIMS Organizational Structure.

SCOPE

The CIMS organizational structure begins with the establishment of a Command Element. The Command Element must create an incident management organization that will successfully resolve the incident. Because the CIMS organizational structure is modular, it may be expanded as necessary by the Command Element to manage any type of incident or planned event, irrespective of its nature, size, scope, duration, location or complexity. Consequently, the incident management organization may be very small, e.g., the Command Element and several Single Resources; or, it may be very large, e.g., the Command Element, three Command Staff positions and five General Staff Sections.

As the number and complexity of the tasks / functions that the Command Element must perform and / or manage increases, the Command Element will begin establishing an incident management organization. The Command Element may activate the appropriate Sections to manage the major CIMS functional areas, i.e., Operations, Planning, Logistics, Finance / Administration and optional Intelligence / Investigations, and designate Section chiefs. The Command Element may also activate the appropriate Command Staff positions.

Section chiefs may delegate management authority for their assigned functions / tasks, as required. The Operations Section chief may activate Sectors and / or Groups, and if necessary, Branches. The Intelligence / Investigations Section chief may activate Groups. The Logistics Section chief may activate Units, and if necessary, Branches. The Planning Section chief and Finance / Administration Section chief may activate Units.

COMMAND ELEMENT

In determining how to structure the incident management organization, the Command Element should consider the following:

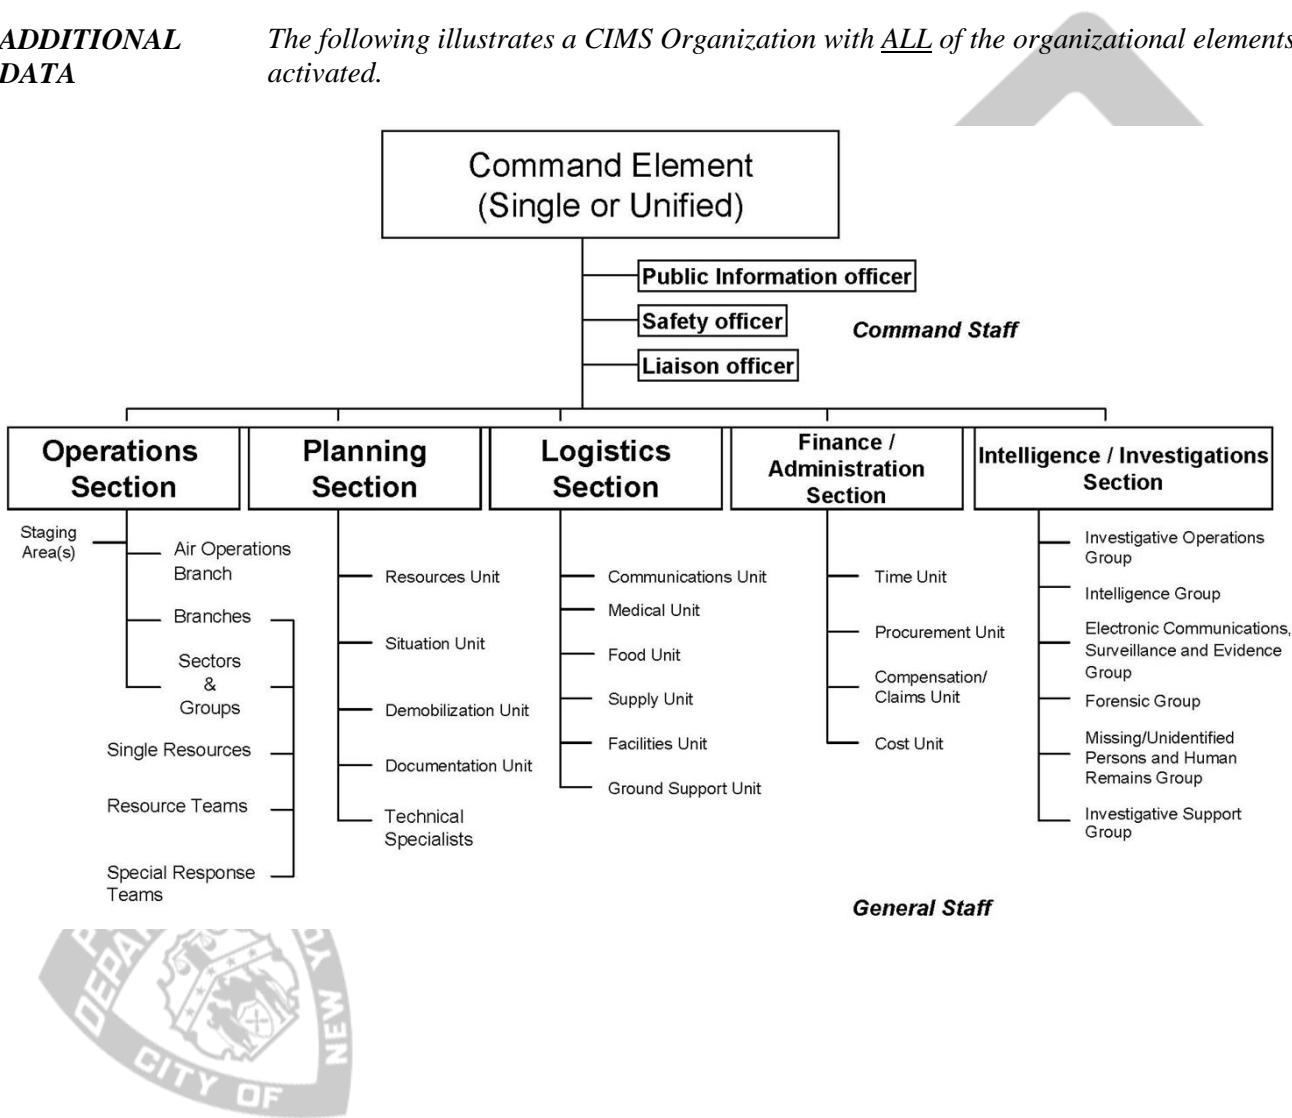

1. Observe recommended Span of Control guidelines.
2. When necessary, delegate authority and assign personnel to **perform** one or more incident related tactical and / or support tasks / functions.
3. When necessary, delegate authority and assign personnel to General Staff Sections and / or Command Staff positions to **manage** the performance of the tasks / functions that have been delegated and supervise the personnel to whom the tasks were assigned.
4. When determining whether to activate a General Staff Section or Command Staff position, activate and staff only the organizational elements that are necessary to manage the required functions / tasks;
 - a. If one individual can simultaneously **manage** all major functions / tasks, no further organization is required.

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:

- COMMAND ELEMENT (continued)**
- b. If one or more of the functions / tasks requires independent management, an individual or individuals are assigned to manage those functions / tasks.
 - 5. Deactivate organizational elements no longer required.
 - 6. The functions / tasks of any non-activated or deactivated subordinate organizational element will be managed by the overhead supervising organizational element.

NYPD will be the Primary Agency (Incident Commander) at CBRN / HazMat incidents. If NYPD determines there is no actual or suspected criminal activity or terrorism, a Unified Command will be implemented.

The Operations Section will be a Unified Operations Section based on agency Core Competencies in all circumstances, with NYPD responsible for overall site management, and assessment and investigations for criminal activity or terrorism, and with FDNY responsible for Life Safety Operations (search for and rescue injured; and provide pre-hospital emergency medical care and transport; and address immediate life safety hazards to the public) and mass decontamination. For chemical incidents, DEP will make a final assessment of the hazard, adjust or set “hot”, “warm” and “cold” zones, and direct all mitigation efforts. For biological or radiological incidents, DOHMH will make a final assessment of the hazard, adjust or set “hot”, “warm” and “cold” zones, and direct all mitigation efforts.

CIMS: AGENCY CORE COMPETENCIES AND UNIFIED OPERATIONS SECTION

DATE ISSUED:

DATE EFFECTIVE:
08/19/13

REVISION NUMBER:

PAGE:

PURPOSE To define and describe Agency Core Competencies at an incident.

DEFINITIONS CIMS AGENCY “CORE COMPETENCIES” AND UNIFIED OPERATIONS SECTION -

Core Competencies are functional areas of expertise that are implemented at incidents, and relate specifically to tactical operations that are managed by the Operations Section; or if not activated, the Command Element.

Core Competencies have been identified for agencies with incident management responsibilities identified in the Primary Agency Matrix. **Although multiple agencies may be capable of performing similar tactical operations, CIMS assigns the Core Competency to only one specific agency.**

Agencies have the authority to direct tactical operations related to their Core Competencies at incidents. **If more than one agency is capable of performing the same tactical operations at an incident, the agency with the Core Competency will give tactical direction, by the ranking officer, to other agencies performing operations within that Core Competency.**

In a Unified Command-Command Element, Agency Incident Commanders from the Primary Agencies with tactical operations responsibility and a relevant “Core Competency” will each designate an Agency Operations Section chief to direct tactical operations in a Unified Operations Section. However, if Agency Incident Commanders agree, they may select one single Operations Section chief to direct tactical operations.

If there is a Single Command – Command Element at a CBRN / HazMat incident, the NYPD Incident Commander; and FDNY Supporting Agency / Agency Representative; and DEP Supporting Agency / Agency Representative; and DOHMH Supporting Agency / Agency Representative will each designate an Agency Operations Section chief to direct tactical operations in a Unified Operations Section. However, if the NYPD Incident Commander; and FDNY Supporting Agency / Agency Representative; and DEP Supporting Agency / Agency Representative; and DOHMH Supporting Agency / Agency Representative agree, they may select one single Operations Section chief to direct tactical operations.

CIMS: AGENCY ROLES

DATE ISSUED:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
08/01/13	08/01/13		1 of 1

PURPOSE To define and describe CIMS Agency Roles.

PROCEDURE When responding to an incident, Agency Roles will be defined and described as follows:

DEFINITIONS **PRIMARY AGENCY** - Based upon the incident type, the CIMS Primary Agency Matrix will designate one agency as the Primary Agency to command a Single Command - Command Element. The Primary Agency will designate one single Incident Commander who will have overall command responsibility for managing the incident.

NOTE *The Primary Agency, Incident Commander will designate the Operations Section chief. However, for a CBRN / HazMat incident there will be a Unified Operations Section. In a Unified Operations Section the NYPD Incident Commander, the FDNY Supporting Agency / Agency Representative, the DEP Supporting Agency / Agency Representative, and the DOHMH Supporting Agency / Agency Representative will each designate an Agency Operations Section chief. However, the NYPD Incident Commander and the FDNY and DEP and DOHMH Supporting Agency / Agency Representatives may all agree to designate only one Operations Section chief.*

The Primary Agency, Incident Commander will coordinate with the Supporting Agencies to successfully achieve the Incident Objectives.

PRIMARY AGENCIES - Based upon the incident type, the CIMS Primary Agency Matrix will designate more than one Primary Agency, called Primary Agencies, to command a Unified Command - Command Element. Each of the Primary Agencies will designate an Agency Incident Commander. All Agency Incident Commanders will **co-locate and remain** at one single Incident Command Post, will jointly set Incident Objectives and create one single Incident Action Plan.

NOTE *The Agency Incident Commanders in the Unified Command – Command Element will each designate an Agency Operations Section chief. However, the Agency Incident Commanders may all agree to designate only one Operations Section chief. The Agency Incident Commanders in the Unified Command – Command Element will coordinate with the Primary Agencies and the Supporting Agencies to successfully achieve the Incident Objectives.*

POTENTIAL PRIMARY AGENCIES - Potential Primary Agencies are state and federal Agencies that have functional, political, or geographic / administrative jurisdictional authority / responsibility at an incident under specific conditions. For example, incidents occurring at airports, national parks, railway facilities, military facilities; or, terrorism related incidents; or, aviation incidents. If these state and federal Agencies have jurisdictional authority / responsibility, they will be included in the Unified Command – Command Element and the Unified Operations Section.

SUBJECT MATTER EXPERT AGENCIES – Agencies that do not have personnel deployed to tactical assignments involving an incident; but, do have specific scientific, engineering or other technical expertise involving incident related tactical operations.

PROCEDURE

Upon arriving at the scene of an incident, the responsibilities of the Command Element are:

COMMAND ELEMENT

1. Assume responsibility for overall incident management; and, assume command of all strategic, tactical, investigative and support incident management functions, operations, activities, etc.
 - a. In a Single Command – Command Element, assume the position of Incident Commander.
 - b. In a Unified Command – Command Element, assume the position of Agency Incident Commander for the NYPD; and, work collaboratively with the other Agency Incident Commander(s) designated by each of the Primary Agencies that have command responsibility in the Unified Command – Command Element.

If there is a CBRN / HazMat incident, until the NYPD determines that there is no actual or suspected criminal activity or terrorism, assume the position of Incident Commander in a Single Command – Command Element. If the NYPD determines that there is no actual or suspected criminal activity or terrorism then assume the position of Agency Incident Commander for the NYPD in a Unified Command – Command Element. When determining if there is actual or suspected criminal activity or terrorism, comply with the appropriate Department procedures.

5. Establish incident management priorities including Life Safety Operations (**immediate #1 priority**); Site Management Operations; Investigative Operations and Recovery / Restoration Operations.
6. Ensure Life Safety Operations, Site Management Operations, Investigative Operations, Recovery / Restoration Operations and any other necessary operations, activities, functions, etc., are expeditiously and properly conducted in a coordinated manner; and, are implemented and conducted concurrently and / or consecutively in whatever sequence is deemed appropriate.
- a. Life Safety Operations are the immediate #1 priority. Absent extraordinary emergency circumstances, Life Safety Operations supersede all other incident management operations.
 - b. Ensure the first properly trained and equipped emergency responder personnel assess / evaluate the incident and, if capable, initiate Life Safety and Site Management Operations.
 - c. Consult with the Primary Agency(ies), Supporting Agency(ies) and Coordinating Agency regarding the implementation of Site Management Operations.
 - d. If approved by the Command Element, Investigative Operations may be initiated concurrently with Life Safety Operations.
 - e. In order to avoid interfering with Investigative Operations, particularly the processing of Crime Scenes and Investigative Scenes, Recovery / Restoration Operations usually will not be commenced until Investigative Operations have concluded. However, if approved by the Command Element, Recovery / Restoration Operations may be initiated concurrently with Investigative Operations and / or Life Safety Operations.
 - f. Depending upon the circumstances, different incident management operations / activities may be initiated and conducted concurrently and / or consecutively in whatever sequence is deemed appropriate by the Command Element.
7. Utilize "Management by Objectives" principles, and determine Incident Objectives, Strategies and Tactical Direction.
- a. The Incident Objectives identify what must be accomplished in order to successfully resolve the incident.
 - (1) All Incident Objectives must be:
 - (a) Attainable considering the existing incident management related limitations and constraints.
 - (b) Measurable in order to determine whether they are being effectively, efficiently and expeditiously achieved.
 - (c) Adaptable / flexible to provide for alternative Strategies and Tactical operations.
 - (2) The time required to successfully resolve the incident and the length of the Operational Period(s) should be considered when determining the Incident Objectives.

COMMAND ELEMENT (continued)

- b. Strategy describes the general method or methods that should be used, either singly or in combination and either consecutively or simultaneously, to effectively, efficiently and expeditiously achieve the Incident Objectives. One or more appropriate Strategies should be identified for each Incident Objective; and if possible, there should be an alternative Strategy(ies) for each Incident Objective. Strategies should be feasible, practical, effective, efficient and ensure safety / security. When identifying Strategies, the time required to successfully resolve the incident and the length of the Operational Period(s) should be considered.
- c. Tactical Direction is provided by the Command Element. However, the Operations Section chief, if that position has been activated, is responsible for formulating and executing the specific tactical operations / activities required to accomplish the Incident Objectives. Tactical Direction involves:
- (1) Identifying the tactics / actions appropriate to the selected Strategy(ies) that must be performed in order to achieve the Incident Objectives.
 - (2) Identifying the required resources / support and determining availability.
 - (3) Ensuring there is sufficient logistics service and support.
 - (4) Deploying the required resources and maintaining appropriate reserves.
 - (5) Monitoring the performance of the organization and the resources in order to measure whether the Incident Objectives are being effectively, efficiently, and expeditiously achieved.
 - (6) Identifying and implementing necessary modifications.
 - (7) Considering the time required to successfully resolve the incident and the length of the Operational Period(s).
- Determine the required number, *Kind* and *Type* of resources; and, request that those resources promptly respond to the appropriate location, i.e., Staging Area(s).
- Ensure arriving resources, and resources that initially responded directly to the incident scene, properly “Check-In”, and are appropriately organized, e.g., Single Resources, Resource Teams, Special Response Teams.
- Ensure arriving resources, and resources that initially responded directly to the incident scene are assigned and deployed to appropriate incident related tactical, investigative, support, supervisory, etc., operations, functions and activities; and / or, are retained at the Staging Area(s) in an “Available” status awaiting assignment.
- a. Ensure there are adequate reserves maintained.
11. Work collaboratively and coordinate with the Primary Agency(ies), Supporting Agency(ies), Coordinating Agency; and, other appropriate governmental agencies, non-governmental organizations, private entities /individuals.

COMMAND ELEMENT (continued)

- a. The NYC Office of Emergency Management (OEM) is New York City's Coordinating Agency. OEM may respond to multi-agency incidents and participate in a Unified Command or Single Command incident management organization.
- b. **Do NOT wait for a representative from OEM to arrive on the scene to begin inter-agency coordination. The Command Element must immediately begin coordinating the activities of all of the involved governmental agencies, non-governmental organizations, private entities / individuals, etc.**
12. Select an appropriate location and establish the Incident Command Post (ICP). If there is a Unified Command - Command Element, Agency Incident Commanders will jointly select an appropriate location to establish the Incident Command Post.
- a. Initially, the Incident Command Post will be wherever the Command Element is located.
- b. The Incident Command Post can be any type of facility that is available and appropriate, e.g., vehicle, trailer, tent, open area, room in a building. The Incident Command Post should be large enough to provide adequate work space for the assigned personnel. The Incident Command Post should contain situation information and resource status displays and other planning related information.
- c. **There is only one single Incident Command Post for an incident** irrespective of whether there is a Single Command - Command Element or a Unified Command – Command Element. The Incident Command Post will be identified by the name of the incident.
- d. Choose a location that is a reasonable and appropriate distance from the incident; and, will provide for safety, health, security and force protection; and, will provide easy and expeditious access and egress; and, is sufficiently large and will allow for expansion; and, will permit continuous operations; and, will provide adequate workspace and utility / communications service. Generally, the Incident Command Post will be located within the Site Access Control / Outer Perimeter. Ensure adequate safety, health, security and force protection measures are implemented regarding the Incident Command Post. Whenever possible, the Incident Command Post should not be relocated. However, it may be necessary to relocate the Incident Command Post if the incident evolves / progresses and circumstances or conditions change. For example, during the initial stages of an incident the situation may rapidly change and the Incident Command Post may have to be relocated one or more times; or, the Incident Command Post may have to be relocated if an Operations Section Post is activated; or, a change in incident size / location may require relocation of the Incident Command Post in order to improve command, operations, communications, etc.; or, relocation of the Incident Command Post may be required in order to resolve safety, health, security or force protection issues.

13. Manage the incident from the Incident Command Post (ICP).
- a. The Incident Command Post is the location where the Command Element, i.e., Single Command, Incident Commander or Unified Command, Agency Incident Commanders, will remain and perform the command function. The Incident Command Post provides a central coordination point from which the Command Element, Command Staff, each appropriate Supporting Agency / Agency Representative, Coordinating Agency, General Staff planning functions and certain General Staff support functions will normally operate.

- b. The Command Element, necessary members of the Command Staff, necessary members of the General Staff, each required Supporting Agency / Agency Representatives and Coordinating Agency, will report to the Incident Command Post as soon as possible; **remain together**; develop the Incident Objectives, Strategies, Tactical Direction, tactics, assignments, priorities, etc.; and, **formulate one single Incident Action Plan**.

- c. Depending upon the nature, size, complexity, location, duration, etc., of the incident, some members of the General Staff and Command Staff may be situated / operating at other locations. However, they will attend planning meetings conducted at the Incident Command Post and will remain in close contact with the Command Element.

14. Establish an appropriate organizational structure and continuously monitor the operation and effectiveness of that organization. In determining how to structure the incident management organization, the Command Element should consider the following:

- a. Comply with recommended Span of Control principles.
- b. When necessary, delegate authority and assign personnel to **perform** one or more incident related tactical and / or support tasks / functions.

- e. Deactivate organizational elements no longer required.
- f. The functions / tasks of any non-activated or deactivated subordinate organizational element will be managed by the overhead supervising organizational element.
15. Perform the duties and retain responsibility for the functions of any General Staff Sections and Command Staff positions that are not activated or are deactivated.
16. When appropriate, activate required Command Staff positions i.e., Public Information, Safety, Liaison, other required position(s); and designate qualified personnel as Command Staff “officers”.
- a. May assign one person to more than one Command Staff position. However, do not combine the functions of different Command Staff positions into a “hybrid” Command Staff position.
 - b. The number of Assistants assigned to a particular Command Staff position will be determined by the respective Command Staff officer after conferring with the Command Element, and will depend upon the nature, size, complexity, location, duration, etc., of the incident.
 - c. Based upon the nature, complexity, location, size, duration, etc., of the incident; and, the specific capabilities, limitations, needs, requirements, etc., of the Command Element, additional Command Staff positions other than the Public Information, Safety, and Liaison positions may be activated; and, qualified personnel may be designated as the additional Command Staff officers, e.g., Attorney-Legal officer, Epidemiologist-Medical officer, Structural Engineer-Engineering officer, Chemist-Science officer.
 - d. If there is a Unified Command – Command Element, all of the Agency Incident Commanders will jointly designate the one Public Information officer and the one Liaison officer. However, the Mayor’s Press Office has the authority and may designate the one Public Information officer; and, the NYC Office of Emergency Management (OEM) has the authority and may designate the one Liaison officer.
 - e. When the NYPD is one of the Primary Agencies in a Unified Command – Command Element, if the Liaison officer position and / or the Public Information officer position is activated, absent unusual circumstances, the NYPD Agency Incident Commander should make every effort to have a member of the NYPD designated as the Liaison officer and have a member of the NYPD designated as the Public

- f. If there is a Single Command – Command Element, the Incident Commander may designate the one Liaison officer; however, OEM has the authority and may designate the one Liaison officer.
 - g. If there is a Single Command – Command Element, the Incident Commander may designate the one Public Information officer; however, the Mayor’s Press Office has the authority and may designate the one Public Information officer.
 - h. If there is a Unified Command – Command Element, each of the Agency Incident Commanders will designate an Agency Safety officer. However, if all of the Agency Incident Commanders agree, they may jointly designate one Safety officer.
 - i. If there is a Single Command – Command Element at a CBRN / HazMat incident, the NYPD Incident Commander; and FDNY Supporting Agency / Agency Representative; and DEP Supporting Agency / Agency Representative will each designate an Agency Safety officer. However, if the NYPD Incident Commander; and FDNY Supporting Agency / Agency Representative; and DEP Supporting Agency / Agency Representative; and DOHMH Supporting Agency / Agency Representative all agree, they may jointly designate one Safety officer.
 - j. If there is a Single Command – Command Element, except for a CBRN / HazMat incident, the Incident Commander will designate the one Safety officer.
17. When appropriate, activate required General Staff Sections, i.e., Operations, Planning, Logistics, Finance / Administration, Intelligence / Investigations; and, assign qualified personnel as Section “chiefs”.

COMMAND ELEMENT (continued)

- e. If there is a Unified Command – Command Element, all of the Agency Incident Commanders will jointly designate one Section chief for each activated General Staff Section with the exception of the Operations Section. When the NYPD is one of the Primary Agencies in a Unified Command – Command Element, absent unusual circumstances, the NYPD Agency Incident Commander should make every effort to have a member of the NYPD designated as the one Section chief for each activated General Staff Section; or if that is not possible, have a member of the NYPD designated as a Deputy to each non NYPD General Staff Section chief.
18. Activate a “Unified Operations Section” when there is a Single Command – Command Element at a CBRN / HazMat incident; *or*, anytime there is a Unified Command – Command Element.
- a. If there is a Unified Command – Command Element, the Agency Incident Commanders from each of the Primary Agencies with tactical operations responsibility and a relevant “Core Competency” will each designate an Agency Operations Section chief to direct tactical operations in a Unified Operations Section. However, if all of the Agency Incident Commanders agree, they may jointly designate one Operations Section chief.
 - b. If there is a Single Command – Command Element at a CBRN / HazMat incident, the NYPD Agency Incident Commander; and FDNY Supporting Agency / Agency Representative; and DEP Supporting Agency / Agency Representative; and DOHMH Supporting Agency / Agency Representative will each designate an Agency Operations Section chief to direct tactical operations in a Unified Operations Section. However, if the NYPD Incident Commander; and FDNY Supporting Agency / Agency Representative; and DEP Supporting Agency / Agency Representative; and DOHMH Supporting Agency / Agency Representative all agree, they may jointly designate one Operations Section chief.
 - c. Core Competencies are functional areas of expertise that are implemented at incidents, and relate specifically to tactical operations that are managed / directed by the Operations Section, or the Command Element if the Operations Section has not been activated. Core Competencies have been identified for Agencies with incident management responsibilities identified in the Primary Agency Matrix. Although multiple Agencies may be capable of performing similar tactical operations, CIMS assigns the Core Competency to one single Agency.
 - d. Agencies have the authority to direct tactical operations related to their Core Competencies at incidents. If more than one agency is capable of performing the same tactical operations at an incident, the agency with the Core Competency will give tactical direction, by the ranking officer, to other agencies performing operations within that Core Competency.

21. Coordinate and direct the activities of the Command Staff and General Staff.
22. When necessary, implement an appropriate organizational structure, i.e., incident management "Expansion Option," to manage an extremely complex, severe and extensive incident; or, more than one incident; or, one extremely large incident. Incident Management Expansion Options include:

23. When appropriate, coordinate incident management operations and activities with other associated incident management organizations, entities, systems, facilities, etc., i.e., Area Command, Multi-Agency Coordination (MAC) Group, Emergency Operations Center (EOC) and / or Joint Information Center (JIC). Continually monitor/evaluate the incident management organizational structure; and, the performance of the Deputy(ies), General Staff Section "chiefs," Command Staff "officers," and as appropriate, other incident management personnel.
 - a. Make appropriate modifications when necessary.
24. Ensure that Command Staff and General Staff understand:

 - c. Ensure that all incident personnel use clear text for inter-agency communications and communicate using CIMS nomenclature / terminology.
 - d. Ensure all incident personnel observe strict radio and telephone communications discipline and limit communications to essential information.
 - e. When necessary, ensure radio and mobile phone interconnect systems are used to enhance interoperable communications.

When there is a considerable investigative or intelligence component to the management or resolution of an incident, the Command Element should establish an Intelligence / Investigations Section as part of the General Staff. In unusual situations, when the Intelligence / Investigations function is not a considerable component of the management or resolution of an incident, it may be organized as a Branch or Group within the Operations Section rather than as a separate General Staff Section. In extremely unusual situations when the Intelligence / Investigations function is minimal, it may be organized as a Command Staff position or Planning Section / Situation Unit function.

ADDITIONAL DATA

The Command Element may be structured in one of two ways:

1. Single Command:

- a. When the CIMS “Primary Agency Matrix” specifies a Single Command - Command Element, **the one Primary Agency in the Single Command – Command Element will designate one single Incident Commander.**
 - (1) A Primary Agency is defined as the Agency authorized by CIMS to have overall responsibility for an incident, including overall management of strategic and tactical operations.
- b. The designated Incident Commander has overall incident management responsibility; develops the Incident Objectives; formulates and implements one single Incident Action Plan; manages all operational and support activities; and, approves all requests pertaining to the ordering and release of incident resources. The Incident Commander is responsible for working collaboratively with the Supporting Agency(ies) and Coordinating Agency.

2. Unified Command:

- a. When the CIMS “Primary Agency Matrix” specifies a Unified Command - Command Element, **each of the Primary Agencies in the Unified Command – Command Element will designate an “Agency Incident Commander.”**
 - (1) Incidents managed by a Unified Command – Command Element will have more than one Primary Agency called Primary Agencies.
- b. The Agency Incident Commanders will co-locate and **remain** at one single Incident Command Post and jointly establish a common set of Incident Objectives, Strategies, Tactical Direction and priorities. They will manage one integrated organizational structure, a joint planning process and a joint resource management process. The Agency Incident Commanders will formulate and implement one single Incident Action Plan that includes an inter-agency integrated Communications Plan. They will jointly execute integrated tactical operations, implement interoperable communications technological and procedural measures when required and maximize the use of assigned resources. The Agency Incident Commanders are responsible for working collaboratively with the Primary Agencies, Coordinating Agency and Supporting Agency(ies).
- c. When a Unified Command - Command Element is established, all Agency Incident Commanders are at an equal level of authority in the Command Element regardless of their designated Agency rank, i.e., Fire Captain, Police Sergeant, EMS Lieutenant, etc.

SCOPE

ORGANIZATION OF INTELLIGENCE / INVESTIGATIVE FUNCTIONS

The investigative and intelligence aspects of incident management are significantly different from the tactical aspects and are not adequately addressed by the traditional Incident Command System (ICS) organizational model. Therefore, when there is a considerable investigative or intelligence component to the management or resolution of an incident, the Command Element should activate an Intelligence / Investigations Section as part of the General Staff.

In unusual situations, when the Intelligence / Investigations function is not a considerable component of the management or resolution of an incident, it may be organized as a Branch or Group within the Operations Section rather than as a separate General Staff Section. In extremely unusual situations when the Intelligence / Investigations function is minimal, it may be organized as a Command Staff position or Planning Section / Situation Unit function.

The Intelligence / Investigations function should be organized as a Section when the NYPD is the Primary Agency in a Single Command – Command Element, or when the NYPD is one of the Primary Agencies in a Unified Command – Command Element.

DATE ISSUED:
08/01/13

DATE EFFECTIVE:

REVISION NUMBER:

PAGE:
1 of 1

PURPOSE

To understand the role of the Coordinating Agency in CIMS.

SCOPE

The New York City Office of Emergency Management (OEM) is the designated Coordinating Agency. OEM may respond to multi-agency incidents and participate in a Unified Command or Single Command incident management organization.

PROCEDURE

At multi-agency incidents OEM will:

**OFFICE OF
EMERGENCY
MANAGEMENT**

1. Ensure a CIMS incident management organization is implemented.
2. Coordinate resources supplied by Agencies involved in incident related response and recovery operations, functions and activities.
3. Provide information to the OEM Emergency Operations Center and to the Mayor.
4. Support logistics and communications needs.
5. Obtain subject matter expertise.
6. Facilitate transition of command.
7. Facilitate resolution of interagency differences.
8. Coordinate and support Recovery / Restoration Operations.

**ADDITIONAL
DATA**

DO NOT wait for a representative from OEM to arrive at the incident site to begin inter-agency coordination.

In complex incidents where the Primary Agency designation is unclear, or the incident is not listed in the Primary Agency Matrix, or the Primary Agency designation changes as some or all of the Incident Objectives are achieved, OEM, based upon the CIMS Protocol, will identify the appropriate Primary Agency or Agencies.

CIMS: INTEGRATED COMMUNICATIONS

DATE ISSUED:
08/01/13

DATE EFFECTIVE:

REVISION NUMBER:

PAGE:
1 of 2

PURPOSE

To ensure proper communications integration takes place between this Department and other agencies at an incident.

SCOPE

Effective, efficient, integrated communications are essential in order to successfully resolve emergency incidents. Agencies participating in emergency response in New York City have implemented several procedural and technological measures to ensure that effective, efficient and integrated on-scene inter-agency communications can be achieved. Agencies will continue to evaluate communications best practices and evolving voice, image, text and data communications technologies to improve tactical and citywide inter-agency communications.

MEASURES

Procedural Measures

1. Ensuring that all ranking Agency members manage the incident from one single Incident Command Post;
2. Ensuring that Agency personnel operating at an incident use clear text for inter-agency communications, i.e., no agency-specific codes or jargon; and, communicate using standard CIMS terminology;
3. Ensuring that all incident personnel observe strict radio / telephone communications discipline and limit communications to essential information only;
4. Establishing criteria for implementing Borough / Citywide “repeated” interoperable radio frequencies and tactical “point-to-point” interoperable radio frequencies for coordination at the incident scene.

Technological Measures

1. Ensuring that all Agencies participating in emergency responses in NYC may utilize the NYC Agencies’ Citywide “repeated” interoperable 800 MHz radio frequency;
2. Ensuring that first responder Agencies have other first responder Agencies’ Borough / Citywide “repeated” interoperable radio frequencies in their command vehicles and their aviation and marine assets; and, that the Borough / Citywide “repeated” interoperable radio frequencies are appropriately utilized.
3. Utilizing tactical “point-to-point” interoperable radio frequencies for coordination at the incident scene; and
4. Deploying radio / mobile phone interconnect systems to incidents requiring additional support to ensure interoperable / shared communications.

MEASURES (continued)

Communications Plan

The Command Element will implement a Communications Plan that will identify the tactical “point-to-point” interoperable radio frequencies and Borough / Citywide “repeated” interoperable radio frequencies that will be used to manage the incident. The plan may be written or verbal depending upon the nature, location, size, complexity and duration of the incident.

The Communications Plan will be part of the Incident Action Plan for each Operational Period and will be disseminated / distributed to all Agencies participating in the response. When applicable, CIMS ICS form 205 may be used to assist in the formulation of the Communications Plan.

DATE EFFECTIVE:
02/04/15

REVISION NUMBER:

PAGE:

PURPOSE To describe the formal Transfer of Command process at an incident.

PROCEDURE Upon arriving at the scene of an incident, the ranking member of the service will either:

- RANKING MEMBER OF THE SERVICE**
1. Assume command if there is no Command Element; or,
 2. Assume command from the current Command Element; or,
 3. Make no change regarding the current Command Element; or,
 4. Designate a third party to assume command from the current Command Element

NOTE *When there is a change in the Command Element, there must be a formal Transfer of Command process.*

- TRANSFER OF COMMAND**
5. “*Transfer of Command*” may take place:
 - a. When a higher ranking person arrives at the scene and elects or has been appropriately designated to assume command. This is often associated with an expanding incident that recently occurred and is still in its initial stages of development. In this situation, because of the outgoing Command Element’s specific knowledge / experience regarding the incident, the incoming Command Element may assign the outgoing Command Element to perform / manage a different incident related function, e.g., Operations Section chief.
 - b. By transferring command to a less senior or less experienced person when an incident is stabilized, or has been reduced in size or severity, or is close to final mitigation, or will demobilize after a short period of time.
 - c. When needed because personnel have been appropriately designated to assume command for a new Operational Period(s).
 - d. To allow the Command Element to be dismissed at the end of the designated tour.
 6. Over the course of an incident, as emergency conditions change or Incident Objectives are completed, the Primary Agency designation may also change and there may be a *Transfer of Command* from one or more Primary Agencies to a different Primary Agency or Agencies. The Primary Agency Matrix will be used to identify the appropriate Agency or Agencies to which command will be transferred.
 7. *Transfer of Command* also involves the replacement of the General Staff Section chiefs and Command Staff officers, e.g., Operations Section chief, Planning Section chief, Public Information officer.

TRANSFER OF COMMAND

(continued)

Transfer of Command Process

8. The *Transfer of Command* process must include a briefing that captures all of the essential information required to ensure continuing effective and efficient command. This information should be recorded and displayed for easy retrieval and subsequent briefings.
9. A *Transfer of Command* checklist should be used and it should include at least the following:
 - a. Has an appropriate CIMS incident management organization been implemented, and is appropriate CIMS terminology being used at the incident?
 - b. Has one single Incident Command Post been established?
 - c. If possible, will *Transfer of Command* take place face-to-face?
 - d. If possible, will the incoming Command Element personally perform a detailed assessment of the incident situation with the outgoing Command Element?
 - e. Will the outgoing Command Element provide a comprehensive briefing to the incoming Command Element?
 - f. Has an appropriate time been chosen for the formal *Transfer of Command* to occur?
 - g. Has the incoming Command Element formally accepted command?
 - h. Have notifications been made to the appropriate entities, i.e., General Staff, Command Staff, Primary Agencies, Coordinating Agency, Supporting Agencies, Communications Section dispatcher and / or supervisor, all incident supervisors, etc.?
10. The *Transfer of Command* briefing should include:
 - a. Concise history of the incident.
 - b. Current incident situation status.
 - c. Incident Objectives, Strategy and priorities.
 - d. Incident Action Plan.
 - e. Current organizational structure.
 - f. Resource assignments.
 - g. Resources enroute, ordered and / or required.
 - h. Status of current and planned tactical operations / activities.
 - i. Status of current and planned investigative operations / activities.
 - j. Current incident related intelligence including any threat information and / or risk assessments.
 - k. Status of Incident Facilities.
 - l. Status of communications and Communications Plan.
 - m. Any operational constraints or limitations.
 - n. Current concerns, problems, issues, etc.
 - o. Estimate / prediction of the future progress of the incident and potential concerns, problems, issues, etc.
 - p. “Delegation of Authority” issues.

CIMS: INCIDENT SEQUENCE

DATE ISSUED:
08/01/13

DATE EFFECTIVE:
08/01/13

REVISION NUMBER:

PAGE:
1 of 3

PURPOSE

To describe the general CIMS Incident Sequence.

PROCEDURE

When responding to an incident, generally, the following Incident Sequence will occur:

CIMS INCIDENT SEQUENCE

1. Depending upon the incident type, one or more Agencies will respond. The first arriving units assess the scene and, if capable, initiate Life Safety and Site Management Operations. The Command Element (Single or Unified) is established with the Primary Agency or Agencies determined by the Primary Agency Matrix. The Command Element assumes overall incident management responsibility; establishes an Incident Command Post at a safe and secure location near the incident site; and establishes General Staff Sections (Operations, Planning, Logistics, etc.) and / or Command Staff positions as needed.
2. If an Operations Section is activated, an Operations Section Post is established to direct tactical operations including Life Safety Operations and Site Management Operations.
3. If a Unified Command - Command Element is managing the incident, then a Unified Operations Section is established. At every CBRN / HazMat incident a Unified Operations Section will be established.
4. If there is a CBRN / HazMat incident, until the NYPD determines that there is no actual or suspected criminal activity or terrorism, the NYPD will be the Primary Agency and will establish a Single Command – Command Element. If the NYPD determines that there is no actual or suspected criminal activity or terrorism, then a Unified Command – Command Element will be established, and the NYPD will designate an Agency Incident Commander. When determining whether there is actual or suspected criminal activity or terrorism, comply with the procedures contained in Patrol Guide 212-101, “Processing Unknown Substances Suspected of Being Chemical, Biological, Radiological, Nuclear (CBRN) / Hazardous Materials Evidence.”
5. Absent extraordinary emergency circumstances including unacceptable personnel safety risks, operating personnel will continue rescue operations to completion, or until relief is required due to fatigue, equipment failure or need for additional resources.

NOTE

The Coordinating Agency will ensure that the Incident Command Post and Operations Section Post are established and appropriately staffed.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
220-18	08/01/13		2 of 3

CIMS INCIDENT SEQUENCE (continued)

6. Investigative Operations may be initiated concurrently with Life Safety Operations. However, absent extraordinary emergency circumstances, life safety concerns will take precedence over investigative considerations until Life Safety Operations are concluded.
7. During Investigative Operations, Recovery / Restoration Operations may be delayed to minimize disturbance to Investigative Scenes, Crime Scenes and other investigative / intelligence operations, activities, functions, etc. However, with the approval of the Command Element, in consultation with the Investigating Agency, Recovery / Restoration Operations may be initiated concurrently with Investigative Operations.
8. As part of Site Management Operations, the NYPD will consult with the Primary Agency(ies) directing Life Safety Operations and / or Investigative Operations. Based upon that consultation, the NYPD will establish appropriate perimeters as needed, and will exclude non-essential personnel from the incident site.
9. Recovery / Restoration Operations include final mitigation of the incident, and a return to non-emergency conditions. Recovery / Restoration Operations can be initiated concurrently with Life Safety and / or Investigative Operations with the approval of the Command Element.

NOTE

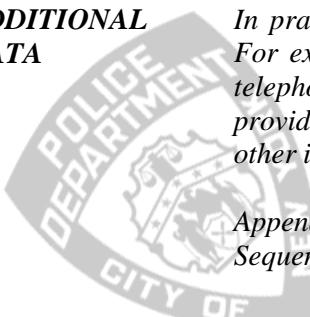

The Coordinating Agency will facilitate and support Recovery / Restoration Operations.

10. Upon completion of Recovery / Restoration and Site Management Operations, the Operations Section Post and the Incident Command Post are demobilized and the incident is concluded.

ADDITIONAL DATA

In practice, there may be further overlap between the various phases of the incident. For example, some Recovery / Restoration activities, such as restoration of power or telephone service, may begin concurrently with Life Safety and Investigative Operations, provided that the Recovery / Restoration Operations support and do not conflict with other incident site operations.

REVISION NUMBER:

PAGE:
1 of 5

PURPOSE

To define and describe CIMS Incident Facilities.

PROCEDURE

When responding to an incident where CIMS has been implemented, Incident Facilities will be defined and described as follows:

DEFINITIONS

INCIDENT COMMAND POST

The Incident Command Post is the location where the Command Element, i.e., Single Command, Incident Commander or Unified Command, Agency Incident Commanders, will remain and perform the command function. The Incident Command Post provides a central coordination point from which the Command Element, Command Staff, each appropriate Supporting Agency / Agency Representative, Coordinating Agency, General Staff planning functions and certain General Staff support functions will normally operate.

The Command Element, necessary members of the Command Staff, necessary members of the General Staff, each required Supporting Agency / Agency Representative and Coordinating Agency, will report to the Incident Command Post as soon as possible; remain together; develop the Incident Objectives, Strategies, Tactical Direction, tactics, assignments, priorities, etc.; and, formulate one single Incident Action Plan.

Depending upon the nature, size, complexity, location, duration, etc., of the incident, some members of the General Staff may be situated / operating at other locations. However, they will attend planning meetings conducted at the Incident Command Post and will remain in close contact with the Command Element.

There is only one single Incident Command Post for an incident irrespective of whether there is a Single Command – Command Element or a Unified Command – Command Element. The Incident Command Post will be identified by the name of the incident.

The Command Element will select an appropriate location to establish the Incident Command Post (ICP). If there is a Unified Command - Command Element, Agency Incident Commanders will jointly select an appropriate location to establish the Incident Command Post.

Initially, the Incident Command Post will be wherever the Command Element is located. The Incident Command Post can be any type of facility that is available and appropriate, e.g., vehicle, trailer, tent, open area, room in a building. The Incident Command Post should be large enough to provide adequate work space for the assigned personnel. The Incident Command Post should contain situation information and resource *status* displays and other planning related information. Adequate safety, health, security and force protection measures will be implemented regarding the Incident Command Post.

DEFINITIONS (continued) The Incident Communications Center is often located within or adjacent to the Incident Command Post.

A location will be chosen for the Incident Command Post that is a reasonable and appropriate distance from the incident site; and, will provide for safety, health, security and force protection; and, will provide easy and expeditious access and egress; and, is sufficiently large and will allow for expansion; and, will permit continuous operations; and, will provide adequate workspace and utility / communications service. Generally, the Incident Command Post will be located within the Site Access Control / Outer Perimeter.

Whenever possible, the Incident Command Post should not be relocated. However, it may be necessary to relocate the Incident Command Post if the incident evolves / progresses and circumstances or conditions change. For example, during the initial stages of an incident the situation may rapidly change and the Incident Command Post may have to be relocated one or more times; or, the Incident Command Post may have to be relocated if an Operations Section Post is activated; or, a change in incident size / location may require relocation of the Incident Command Post in order to improve command, operations, communications, etc.; or, relocation of the Incident Command Post may be required in order to resolve safety, health, security or force protection issues.

Outside of NYC, under NIMS ICS, the Incident Command Post may be located at the Incident Base. However, absent extraordinary circumstances, in NYC an Incident Base will not be established.

Once the Incident Command Post is established, appropriate notifications will be made regarding the location of the Incident Command Post. Additionally, a flag, banner, beacon, sign or other distinctive marker will be used to identify the location of the Incident Command Post.

OPERATIONS SECTION POST

The Operations Section Post is the location where the Operation Section chief / Agency Operations Section chiefs, Deputy(ies) and appropriate staff will remain and manage / direct all of the tactical functions, operations and activities.

If there is a Unified Operations Section, Agency Operations Section chiefs will jointly select an appropriate location to establish the Operations Section Post

The Operations Section Post can be any type of facility that is available and appropriate, e.g., vehicle, trailer, tent, open area, room in a building. Adequate safety, health, security and force protection measures will be implemented regarding the Operations Section Post.

Generally, the Operations Section Post will be located within the Site Access Control / Outer Perimeter.

If necessary, the Operations Section Post may be relocated.

INTELLIGENCE / INVESTIGATIONS SECTION POST

The Intelligence / Investigations Section Post is the location where the Intelligence / Investigations Section chief, Deputy(ies) and appropriate staff will remain and manage / direct all of the intelligence and investigative functions, operations and activities.

The Intelligence / Investigations Section Post can be any type of facility that is available and appropriate, e.g., vehicle, trailer, tent, open area, room in a building. Adequate safety, health, security and force protection measures will be implemented regarding the Intelligence / Investigation Section Post.

DEFINITIONS (continued)

INCIDENT BASE

Absent extraordinary circumstances, an Incident Base will not be activated in NYC. However, an Incident Base might be activated during an extremely large incident that will continue for an extended period of time.

Outside of NYC, under NIMS ICS, the Incident Base is the central location where all incident primary logistic service and support activities are situated and performed. Normally, the Incident Base is the facility where all uncommitted *Out-of-Service* personnel, equipment and tactical resources are located; and, support operations are situated.

If activated, there is only one Incident Base established for an incident. Adequate safety, health, security and force protection measures will be implemented regarding the Incident Base. The Incident Base will be identified by the name of the incident.

Absent unusual circumstances, the Incident Base will not be relocated.

When appropriate, the Incident Base may be deactivated.

If an Incident Base is activated, an Incident Base Manager will be designated. The Incident Base Manager will ensure that appropriate sanitation and facility management services are being provided at the Incident Base; and, that adequate safety, health, security and force protection measures have been implemented regarding the Incident Base.

The Incident Base Manager reports to the Facilities Unit Leader, or if that position is not activated, to the Logistics Section chief.

CAMP

Absent extraordinary circumstances, a Camp(s) will not be activated in NYC. However, one or more Camps might be activated during an extremely large incident that will require incident personnel to be lodged for an extended period of time in the vicinity of the incident.

Outside of NYC, under NIMS ICS, a Camp is a temporary location within the general incident area that is equipped and staffed to provide food, water, sanitation, shower and related lodging services to incident personnel. A Camp is separate and distinct from and will not be located at the Incident Base. However, all CIMS functional Unit activities that may be performed at the Incident Base may also be performed at a Camp.

There may be more than one Camp. If activated, each Camp will be identified by a geographic name or a number. Adequate safety, health, security and force protection measures will be implemented regarding each of the Camps.

DEFINITIONS (continued)

A Camp(s) may be at the same location for several days or for the entire duration of the incident. When necessary and depending upon the circumstances of the incident, a Camp(s) may be relocated.

When appropriate, a Camp(s) may be deactivated.

If activated, each Camp will have a Camp Manager assigned. Each Camp Manager is responsible for managing the activities occurring in the Camp, providing non-technical coordination, and coordinating the actions of all of the organizational Units situated within the Camp. Additionally, each Camp Manager will ensure that adequate safety, health, security and force protection measures have been implemented regarding the Camp.

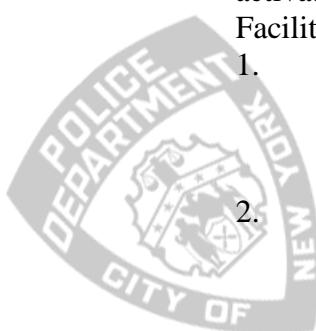

One or more Logistics Section Units may be situated at one or more Camps. If a Logistics Section Unit(s) is situated at a Camp(s), it would be managed by an Assistant. Initially, personnel required to staff one or more Logistics Section Units situated at one or more Camps will be determined by the General Staff based upon the nature, size, complexity, location, duration, etc., of the incident and anticipated operations at the involved Camp(s). However, after a Camp(s) is activated, additional required personnel and support will be determined by the Camp Manager.

The Camp Manager(s) reports to the Facilities Unit Leader, or if that position is not activated, to the Logistics Section chief.

OTHER INCIDENT FACILITIES

Depending upon the circumstances, other additional Incident Facilities may be activated and situated within the incident area. These other additional Incident Facilities may be used for:

1. Conducting appropriate support and / or service functions and activities, e.g., Mass Care (Triage / Treatment / Transportation), Mass Casualty Management, Mass Fatality Management / Temporary Morgue, Family Assistance, Mass Decontamination.
2. Providing food, water, lodging, shower, sanitation, etc., services to incident personnel.

CIMS: INCIDENT FACILITIES - STAGING AREA

DATE ISSUED:
08/01/13

DATE EFFECTIVE:
08/01/13

REVISION NUMBER:

PAGE:
1 of 4

PURPOSE

To define and describe CIMS Incident Facilities – Staging Area.

PROCEDURE

When responding to an incident where CIMS has been implemented, Incident Facilities - Staging Area will be defined and described as follows:

DEFINITIONS

STAGING AREA

A Staging Area is a temporary location / facility for situating and organizing resources that are in *Available status* and may be deployed to incident assignments. It may contain temporary fueling and sanitation facilities.

NOTE

A Staging Area was formerly referred to as a Mobilization Point.

Pursuant to CIMS, there may be more than one Staging Area. However, absent unusual circumstances, there should be only one NYPD Staging Area for NYPD resources. Nevertheless, there may be more than one NYPD Staging Area if:

1. Specialized units, personnel, vehicles, equipment or other specialized resources are required at the incident, e.g., Emergency Services Unit, Mounted Unit, Highway District; or,
2. The incident area is extraordinarily large; or,
3. An extremely large number of personnel, vehicles, equipment or other resources are required at the incident; or,
4. A significant amount of large specialized equipment is required at the incident; or,
5. Confidential / sensitive resources are required at the incident; or,
6. There have been several Operational Periods and the incident has not been resolved and incident operations will continue for a prolonged period of time; or,
7. There are other circumstances that require the activation of more than one Staging Area.

Pursuant to CIMS, depending upon the circumstances, different Agencies may have one or more separate Staging Areas; or, different functional / Core Competency Branches may have one or more separate Staging Areas.

If more than one Staging Area is required then the Operations Section chief, or Command Element if the Operations Section is not activated, will ensure that an appropriate number of Staging Areas are activated; and, that the activities / functions occurring at each of the Staging Areas are performed in a coordinated manner.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:

DEFINITIONS (continued)

Resources situated at a Staging Area(s) may be in *Available status* awaiting a tactical and / or investigative assignment, and should be prepared for assignment / deployment within three minutes. A Staging Area(s) should be used to organize Single Resources into Resource Teams and / or Special Response Teams. *Out-of-Service* resources should not be situated at a Staging Area(s). Logistics functions should not be performed at a Staging Area(s).

A Staging Area(s) can be situated at any appropriate location in the incident area. The following factors should be considered when choosing a location to situate a Staging Area(s):

1. The need to be a reasonable and appropriate distance from the incident.
2. The need to have staged resources prepared for expeditious deployment to the incident and / or area of expected assignment. Absent unusual conditions and depending upon the circumstances of the incident, generally, a Staging Area(s) should be located approximately five minutes travel time to an area of anticipated need, assignment, deployment, etc.
3. The need to have a sufficiently large area in order to accommodate the responding resources and the required reserves; and, to have sufficient space to allow for expansion; and, if possible, to have sufficient space for expansion in order to accommodate a Level 3 or Level 4 mobilization.
4. The need to provide adequate workspace and utility / communications service.
5. The need to permit continuous operations.
6. The need to have sufficient access and egress routes and to be easily accessible.
7. The ability to effectively and efficiently implement safety, health, security and force protection measures.

When a Staging Area(s) is activated it must be clearly marked and be readily identifiable. Adequate safety, health, security and force protection measures will be implemented regarding the Staging Area(s).

A Staging Area(s) will be given a name that describes its general location.

A Staging Area(s) may be in the vicinity of or adjacent to other Incident Facilities; but, must have its own separate location and name.

The initial boundaries of the Staging Area(s) should be identified and communicated to the Command Element, Communications Section dispatcher and / or supervisor, Command Staff positions, General Staff Sections and each appropriate Supporting Agency / Agency Representative. Additionally, response routes / directions to the Staging Area(s) should be communicated to the responding resources by the Communications Section dispatcher and / or supervisor; or, when necessary, directly by the appropriate incident management organizational element / personnel; or, in any other appropriate manner.

PURPOSE

To define and describe CIMS Incident Facilities – Air Operations.

PROCEDURE

When responding to an incident where CIMS has been implemented, Incident Facilities – Air Operations will be defined and described as follows:

DEFINITIONS

HELIBASE

The main location within the general incident area that will be utilized for:

1. Parking, fueling, repairing, servicing, storing, maintaining, safeguarding / securing, etc., helicopters; and,
2. Loading and unloading helicopters with personnel, equipment, supplies and / or other resources required for incident operations, functions and activities; and,
3. Filling helicopters with water, insecticides, retardants, pesticides, chemicals and / or other substances required for incident operations, functions and activities.

The NYPD will activate and manage all Helibases. Absent extraordinary circumstances, only one Helibase will be activated; and, it will be situated at the NYPD Chief of Special Operations, Aviation Unit facility located at Floyd Bennett Field, Brooklyn. However, pursuant to CIMS and depending upon the circumstances, more than one Helibase may be activated, e.g., very large incidents; incidents with a significant number of aviation / aircraft resources; incidents that require a substantial number of tactical and logistical / support air operations. The NYPD will ensure that an appropriate number of Helibases are activated; and, that the activities / functions occurring at each Helibase are performed in a coordinated manner. The NYPD will ensure that each Helibase is properly situated at an appropriate location and that adequate health, safety, security and force protection measures are implemented regarding each Helibase.

PURPOSE

To describe the "*Check In*" process at an event.

PROCEDURE

When responding to an incident, the following "*Check In*" process will be followed:

DEFINITION

"CHECK-IN" PROCESS-

1. The "*Check-In*" process formally records personnel and equipment as being present at and assigned to the incident; and, provides important basic information that will be used for tracking the number, location and *status* of the resources. The *Check-In* process assists the Command Element by enhancing the incident management organization's ability to easily:
 - a. Ensure resource accountability.
 - b. Track and identify the number, location and *status* of resources.
 - c. Assign and reassign resources.
 - d. Locate personnel for emergency notifications.
 - e. Prepare accurate time and overtime records.
 - f. Plan for demobilization.
 - g. Demobilize and release resources.
2. The Resources Unit will perform the *Check-In* function at designated incident locations. If the Resources Unit has not been activated, the Planning Section chief will perform the *Check-In* function. If the Planning Section has not been activated, the Command Element will perform the *Check-In* function.
3. A "*Check-In Recorder*" will be assigned to each location where Resources will *Check-In*. The *Check-In Recorder*:
 - a. Must have an adequate supply of *Check-In* forms / **DETAIL ROSTER / ASSIGNMENT SHEETS (PD406-141)**, or other appropriate *Check-in* forms, logs, records, etc.
 - b. Must be informed regarding the frequency and schedule for providing / reporting *Check-In* information to the Resources Unit.
 - c. Should determine if resources that *Check-In* can be electronically recorded / documented.
4. Within NYC pursuant to CIMS, there are four locations where *Check-In* may occur:
 - a. Staging Area(s)
Resources should *Check-In* with the Resources Unit at the Staging Area(s). If the Resources Unit is not activated, resources should *Check-In* with the Staging Area Manager.

PATROL GUIDE

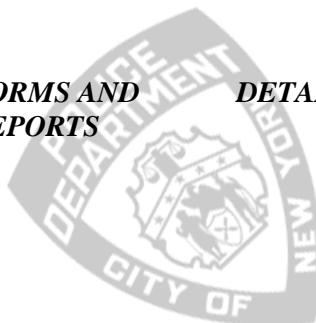

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:

DEFINITION (continued)

- b. Incident Command Post
Resources should *Check-In* with the Resources Unit at the Incident Command Post.
 - c. When applicable, Intelligence / Investigations Section Post.
When applicable, investigative resources will *Check-In* at the Intelligence / Investigations Section Post with the Resources Unit that will be co-located with the Investigative Support Group, if activated. If the Resources Unit is not activated, investigative resources will *Check-In* at the Intelligence / Investigations Section Post with the Investigative Support Group, if activated, if neither the Resource Unit nor the Investigative Support Group are activated, investigative resources should *Check-In* with the Intelligence / Investigations Section chief.
 - d. Helibase(s)
In NYC, *Check-In* may be performed at a Helibase(s); however absent extraordinary circumstances, *Check-In* will not occur at a Helibase(s).
5. Outside NYC, under NIMS ICS, there are an additional two locations where *Check-In* may occur:
- a. Incident Base
Absent extraordinary circumstances an Incident Base will not be activated in New York City.
 - b. Camp(s)
Absent extraordinary circumstances a Camp(s) will not be activated in New York City.
6. Pursuant to CIMS, absent extraordinary circumstances, resources must formally *Check-In* before reporting to the Operations Section or Sectors or Groups or Branches for assignment.

--------------------------	-----------------------------	------------------	-----------------

PURPOSE

To define and describe CIMS Resources.

PROCEDURE

When responding to an incident, Resources will be defined and described as follows:

DEFINITIONS

RESOURCES - personnel, teams, equipment, supplies, vehicles, aircraft, watercraft and facilities that are available or potentially available for assignment or allocation to support incident management and emergency response activities.

NOTE

Non-law enforcement resources, particularly firefighting resources, have been formally categorized by “Kind” and “Type.” Law enforcement resources have NOT been formally categorized by “Kind” and “Type.” However, an effort currently is underway to develop appropriate metrics and to formally categorize law enforcement resources by Kind and Type.

- a. **“Kind”:** Kind refers to broad classes that characterize similar resources, such as teams, personnel, equipment, supplies, vehicles, watercraft, facilities and aircraft. The term may also be used to specifically categorize a particular resource, e.g., marked patrol car, unmarked car, nondescript car, undercover car, van, truck, tractor trailer, two wheeled scooter, three wheeled scooter or motorcycle.
- b. **“Type”:** Refers to the level of resource capability based upon its power, size or capacity. Resource Type is designated by a Roman numeral with I representing the greatest capability and IV representing the least capability. The Type assigned to a resource or a Component is based on a minimum level of capability described by the identified metric(s) for that resource. In some cases, a resource may have less than or more than four Types; and, additional Types will be identified or the Type will be described as “not applicable.”

Resources are categorized as:

SINGLE RESOURCE – A Single Resource may perform a particular assignment and includes:

Single resources include:

- a. A single vehicle including the operator / crew;
- b. A single watercraft including the operator / crew;
- c. A single aircraft including the operator / crew;
- d. A single item of equipment including the operator / crew;
- e. Single personnel;
- f. Single personnel and an animal, i.e., dog, horse;

**DEFINITIONS
(continued)** RESOURCE TEAM - a combination of the same "Kinds" and "Types" of Single Resources assembled to perform a particular tactical assignment.

A Resource Team must have:

- a. A designated Leader; and,
- b. Appropriate transportation if necessary; and,
- c. Common communications between:
 - (1) The respective resources, and
 - (2) The respective resources and the Leader, and

NOTE When assembling a Resource Team, CIMS Span of Control principles should not be violated.

SPECIAL RESPONSE TEAM - any combination and number of different "Kinds" and "Types" of Single Resources assembled to perform a particular tactical assignment.

A Special Response Team must have:

- a. A designated Leader; and,
- b. Appropriate transportation if necessary; and,

 - (1) The respective resources, and
 - (2) The respective resources and the Leader, and
 - (3) The Leader and the Leader's designated supervisor, e.g., Group Supervisor, Sector Supervisor, Branch Director, Section chief.

NOTE When assembling a Special Response Team(s), CIMS Span of Control principles should not be violated.

STATUS CONDITIONS

In order to maintain accurate current information regarding resource utilization and resource needs, all resources must be assigned a specific defined "status" condition. The three specific *status* conditions that are used for tracking resources at an incident are:

1. Assigned: Resources (personnel that have *Checked-In* and equipment that has been received for) assigned to an incident that are performing work tasks at the incident under the direction of a supervisor; or, in the case of equipment and facilities, resources that are performing a function supporting incident operations.
2. Available: Resources (personnel that have *Checked-In* and equipment that has been received for) assigned to an incident that are ready for an assignment / deployment; or, in the case of equipment and facilities,

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:

DEFINITIONS (continued)

resources that are ready for a specific function. Resources in “Available” status awaiting a tactical or investigative assignment should be ready for deployment within three minutes.

3. **Out-of-Service**: Resources (personnel that have *Checked-In* and equipment that has been received for) assigned to an incident, that are not able to be assigned to a work task / function or *Available* for assignment to a work task / function due to mechanical, rest, illness, injury, staffing, environmental, financial, etc., reasons; or, because their condition makes them unusable. An *Out-of-Service* resource is not ready / capable of being in the *Available* or *Assigned* status.

RESOURCE STATUS CHANGES - Resource *status* is maintained and changed by the supervisor to whom the respective resource is assigned. Changes in resource *status* may be made by:

1. Command Element
2. Operations Section chief(s)
3. Branch Director(s)
4. Sector Supervisor(s)

6. Resource Team and / or Special Response Team Leader(s)
7. When applicable Intelligence / Investigations Section chief
8. When applicable Intelligence / Investigations Section Group Supervisor(s)
9. Unit Leader(s)
10. Manager(s)

NOTE

Any change in resource status that is longer than several minutes must be communicated to the appropriate CIMS organizational element. Absent extraordinary circumstances, the individual changing the status of the resource will ensure that the status change is promptly communicated through the appropriate chain of command to the individual or incident management organizational element responsible for maintaining / tracking the status of resources assigned to the incident.

RESOURCE STATUS TRACKING SYSTEMS

- a. Manual Records / Forms
- b. Pre-formatted Resource Information Cards
- c. Magnetic Symbols and Maps
- d. Magnetic Symbols and Status Boards
- e. Electronic Status Boards
- f. Computer Applications, i.e., Spreadsheets, Databases, etc.

PLANNING SECTION / RESOURCES UNIT - All changes in the number, location and *status* of resources are promptly reported to the Resources Unit; or if not activated, the Planning Section chief; or if not activated, the Command Element.

PURPOSE	To specify where arriving resources will initially be assigned at an incident.

STAGING AREA	<p><u>Assignment to a Staging Area(s)</u></p> <ol style="list-style-type: none">1. Single Resources may be organized into Special Response Teams and / or Resource Teams prior to assignment / deployment.2. As part of the planning process, the Operations Section chief will decide what number, <i>Kinds</i> and <i>Types</i> of resources will be situated at the Staging Area(s). This decision is based upon the need to retain and maintain adequate reserves to meet current needs and / or anticipated demands and / or unanticipated contingencies.3. This is particularly true regarding expensive equipment and personnel that have been rented / leased from private entities and resulting significant costs may possibly be incurred.

STAGING AREA (continued)

6. After Check-In at a Staging Area, Single Resources will often be organized into Resource Teams and / or Special Response Teams, and deployed / assigned to incident related functions, operations and activities. The number, composition and deployments / assignments of the Resource Teams and Special Response Teams may continue for the entire incident, or they may change based upon incident needs.
7. Resource Teams and Special Response Teams created / organized at the incident should always be disassembled prior to release from the incident. In order to ensure proper resource accountability, each resource should be demobilized and leave the incident with the same resource designation, configuration and organization that the resource had upon arrival.

SECTORS OR GROUPS

Assignment to Sectors or Groups or Branches

1. After formal *Check-In*, during rapidly expanding incidents, tactical resources may immediately be assigned to the Operations Section; or, if activated, Sectors or Groups or Branches. In these situations, the tactical resources must always immediately report to the Operations Section chief or a designated Sector Supervisor or designated Group Supervisor or designated Branch Director to be given a specific assignment.
2. Outside of NYC, under NIMS ICS, during rapidly expanding incidents, prior to formal Check-In, tactical resources may be assigned directly to the Operations Section; or, if activated, directly to Sectors or Groups or Branches. In these situations, the tactical resources must report directly to a designated Sector Supervisor or designated Group Supervisor or designated Branch director to be given a specific assignment; and, formal *Check-In* will occur at a later time when the resource is assigned to a Staging Area or is in *Out-of Service status*. NIMS ICS acknowledges that this is not the preferred way of deploying arriving additional resources.

INCIDENT BASE

Assignment to the Incident Base

1. Absent extraordinary circumstances, an Incident Base will not be activated in New York City.
2. Outside of NYC, under NIMS ICS, after formal *Check-In*, tactical resources are often assigned to the Incident Base when the resources are not scheduled for use during the current Operational Period.
3. Outside of NYC, under NIMS ICS, for resources that have traveled a significant distance, are assigned to the Incident Base in an *Out-of-Service status* in order to provide time for briefings and rest / rehabilitation prior to being deployed to an assignment during the subsequent Operational Period.

CITYWIDE INCIDENT MANAGEMENT SYSTEM (CIMS) - 201 INCIDENT BRIEFING FORM (ICS FORM 201)

DATE ISSUED:
08/01/13

DATE EFFECTIVE:

REVISION NUMBER:

PAGE:
1 of 7

PURPOSE

To properly document the response and summarize the actions taken at the scene of an emergency incident in which the Citywide Incident Management System (CIMS) has been implemented.

SCOPE

Proper preparation of the **CIMS 201 Incident Briefing Form** (see Appendix "A" and form attached) provides basic information regarding the emergency incident and the resources allocated to the emergency incident. The Form will serve as a reference document for the initial emergency incident response, summarize the actions taken at the scene and will be the source document that will be used to prepare a written Incident Action Plan (IAP), if a written IAP is necessary. The Incident Briefing Form will not be a component of the IAP for preplanned events.

PROCEDURE

When managing an emergency incident under *Patrol Guide 220 Series, "Citywide Incident Management System"*:

INCIDENT COMMANDER

1. Direct and ensure the **CIMS 201 Incident Briefing Form** is prepared on all emergency incidents when:
 - a. Directed by a captain or above based on the magnitude, type, severity and duration of the emergency incident
 - b. It is likely that the emergency incident will extend beyond one "Operational Period"
 - c. The response to emergency incident exceeds four hours and results in the allocation of significant resources and or personnel
 - d. A Unified Command-Command Element is established
 - e. The NYPD is the Incident Commander in a Single Command-Command Element; and several Supporting Agencies are significantly involved in the emergency incident management efforts
 - f. An Incident Management Team (IMT) is activated to manage the emergency incident.

Attach a copy of the **CIMS 201 Incident Briefing Form** to the **UNUSUAL OCCURRENCE REPORT (PD370-152)** or **Typed Letterhead**, if prepared.

- a. If **UNUSUAL OCCURRENCE REPORT** or **Typed Letterhead** is not prepared, file **CIMS 201 Incident Briefing Form** at the precinct of occurrence.

NOTE

The information from the **CIMS 201 Incident Briefing Form** can be used as a reference or source document for the preparation of a written **Incident Action Plan (IAP)**.

The following describes how the four pages of the **CIMS 201 Incident Briefing Form** can be used in future forms or documents:

FORCE GUIDELINES

DATE ISSUED:
07/17/20

DATE EFFECTIVE:
07/17/20

REVISION NUMBER:

PAGE:
1 of 4

SCOPE

The primary duty of all members of the service (MOS) is to protect human life, including the lives of individuals being placed in police custody. Force may be used when it is reasonable to ensure the safety of a member of the service or a third person, or otherwise protect life, or when it is reasonable to place a person in custody or to prevent escape from custody. In all circumstances, any application or use of force must be reasonable under the circumstances. All members of the service at a police incident must use reasonable force, employ less lethal alternatives, and prioritize de-escalation, whenever possible. If the force used is unreasonable under the circumstances, it will be deemed excessive and in violation of Department policy.

When appropriate and consistent with personal safety, members of the service will use de-escalation techniques to safely gain voluntary compliance from a subject to reduce or eliminate the necessity to use force. In situations in which this is not safe and/or appropriate, MOS will use only the reasonable force necessary to gain control or custody of a subject. The use of deadly physical force against a person can only be used to protect MOS and/or the public from imminent serious physical injury or death.

In determining whether the use of force is reasonable, members of the service should consider the following:

- a. The nature and severity of the crime/circumstances
- b. Actions taken by the subject
- c. Duration of the action
- d. Immediacy of the perceived threat or harm to the subject, members of the service, and/or bystanders
- e. Whether the subject is actively resisting custody
- f. Whether the subject is attempting to evade arrest by flight
- g. Number of subjects in comparison to the number of MOS
- h. Size, age, and condition of the subject in comparison to the MOS
- i. Subject's violent history, if known
- j. Presence of hostile crowd or agitators
- k. Subject apparently under the influence of a stimulant/narcotic which would affect pain tolerance or increase the likelihood of violence.

All MOS are responsible and accountable for the proper use of force. The application of force must be consistent with existing law and with the New York City Police Department's policies, even when Department policy is more restrictive than state or federal law. Depending upon the circumstances, both federal and state laws provide for criminal sanctions and civil liability against MOS when force is deemed excessive, wrongful, or improperly applied.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-01	07/17/20		2 of 4

**SCOPE
(continued)** Excessive force will not be tolerated. MOS who use excessive force will be subject to Department discipline, up to and including dismissal.

Failure to intervene in the use of excessive force, or report excessive force, or failure to request or to ensure timely medical treatment for an individual is serious misconduct that may result in criminal and civil liability and will result in Department discipline, up to and including dismissal. If a member of the service becomes aware of the use of excessive force or failure to request or to ensure timely medical treatment for an individual, the member must report such misconduct to the Internal Affairs Bureau Command Center. This report can be made anonymously.

NOTE *Obtaining a Confidential Identification Number from the Command Center investigator will satisfy the member's reporting responsibility, if the information is accurate and complete. Subsequent or ongoing reporting is encouraged to ensure the information is timely and complete and may be made by referencing the Confidential Identification Number.*

DEFINITIONS **DE-ESCALATION** - Taking action in order to stabilize a situation and reduce the immediacy of the threat so that more time, options, and/or resources become available (e.g., tactical communication, requesting a supervisor, additional MOS and/or resources such as Emergency Service Unit or Hostage Negotiation Team, etc.). The goal is to gain the voluntary compliance of the subject, when appropriate and consistent with personal safety, to reduce or eliminate the necessity to use force.

OBJECTIVELY REASONABLE STANDARD - The reasonableness of the use of force is based upon the totality of the circumstances known by the MOS at the time of the use of force. The Department examines the reasonableness of force viewed from the perspective of a member with similar training and experience placed into the same circumstances as the incident under investigation.

EXCESSIVE FORCE - Use of force deemed by the investigating supervisor as greater than that which a reasonable officer, in the same situation, would use under the circumstances that existed and were known to the MOS at the time force was used.

PROHIBITED METHODS OF RESTRAINT - Sitting, kneeling, or standing on the chest or back of a subject in a manner that compresses the diaphragm, thereby reducing the subject's ability to breathe.

CHOKEHOLD - A chokehold shall include, but is not limited to, any pressure to the throat, carotid artery or windpipe, which may prevent or hinder breathing, or reduce intake of air or blood flow.

VEHICLE RAMMING ATTACK (VRA) – A form of attack in which a perpetrator deliberately rams a motor vehicle into a crowd of people or building.

PROCEDURE To provide members of the service with the Department's force/restraint and firearm prohibitions:

PROHIBITIONS

UNIFORMED MEMBER OF THE SERVICE

1. Uniformed members of the service are authorized under New York State law to discharge a firearm to prevent or terminate the unlawful use of force that may cause death or serious physical injury, taking into account the below prohibitions imposed by the Department.
Members of the service **SHALL NOT**:
 - a. Discharge a firearm when, in the professional judgment of a reasonable member of the service, doing so will unnecessarily endanger innocent persons
 - b. Discharge firearms in defense of property
 - c. Discharge firearms to subdue a fleeing felon who presents no threat of imminent death or serious physical injury to the MOS or another person present
 - d. Fire warning shots
 - e. Discharge firearm to summon assistance, except in emergency situations when someone's personal safety is endangered and no other reasonable means to obtain assistance is available
 - f. Discharge their firearms at or from a moving vehicle unless deadly physical force is being used against the member of the service or another person present, by means other than a moving vehicle
 - g. Discharge firearm at a dog or other animal, except to protect a member of the service or another person present from imminent physical injury and there is no opportunity to retreat or other reasonable means to eliminate the threat
 - h. Cock a firearm. Firearms must be fired double action at all times.

NOTE

Drawing a firearm prematurely or unnecessarily limits a uniformed member of the service's options in controlling a situation and may result in an unwarranted or accidental discharge of the firearm. The decision to display or draw a firearm should be based on an articulable belief that the potential for serious physical injury is present. Members of the service, when feasible, should issue an appropriate verbal warning, consistent with personal safety, to the intended subject and other members of the service present prior to discharging a firearm. When a uniformed member of the service determines that the potential for serious physical injury is no longer present, the uniformed member of the service will holster the firearm as soon as practicable.

2. Members of the service **SHALL NOT**:
 - a. Use a prohibited method of restraint
 - b. Use a chokehold
 - c. Use any level of force to punish, retaliate or coerce a subject to make statements
 - d. Use any level of force on handcuffed or otherwise restrained subjects unless necessary to prevent injury, escape or to overcome active physical resistance or assault

NOTE *A Conducted Electrical Weapon (CEW) should never be used in CARTRIDGE or DRIVE STUN mode on a rear-cuffed prisoner as per P.G. 221-08, "Use of Conducted Electrical Weapons (CEW)."*

**UNIFORMED
MEMBER OF
THE SERVICE
(continued)**

- e. Connect or tie rear-cuffed hands to cuffed or restrained ankles or legs
- f. Transport a subject facedown
- g. Use force to prevent a subject from swallowing alleged controlled substance or other substance, once a subject has placed suspected controlled substance in his or her mouth, or forcibly attempt to remove substance from subject's mouth or other body cavity.

NOTE

Members who are subject to investigation, the subject of disciplinary action, civil action, or a civilian complaint related to a violation of the above prohibitions may submit a request for review of the circumstances to the Use of Force Review Board. The Use of Force Review Board will review the facts and circumstances and make a final determination of whether the force used was reasonable under the circumstances and within guidelines. The review may find that under exigent or exceptional circumstances, the use of the prohibited action may have been justified and within guidelines (e.g., a "vehicle ramming attack" is a type of extraordinary event that this clause is intended to address. The objectively reasonable use of deadly physical force to terminate a mass casualty terrorist event would be legally justified and within Department guidelines).

When a uniformed member of the service observes or suspects that a prisoner has ingested a narcotic or other dangerous substance, the prisoner will be transported from the place of arrest DIRECTLY to the nearest hospital facility.

PURPOSE

To provide guidelines for members of the service (MOS) regarding the use of force, and ensure that each use of force is properly reported and documented.

DEFINITIONS

DE-ESCALATION - Taking action to stabilize the situation and reduce the immediacy of the threat so that more time, options, and/or resources become available (e.g., tactical communication, requesting a supervisor, additional MOS and/or resources such as Emergency Service Unit or Hostage Negotiation Team, etc.). The goal is to gain the voluntary compliance of the subject, when appropriate and consistent with personal safety, to reduce or eliminate the necessity to use force.

ACTIVE RESISTING - Includes physically evasive movements to defeat a member of the service's attempt at control, including bracing, tensing, pushing, or verbally signalling an intention to avoid or prevent being taken into or retained in custody.

ACTIVE AGGRESSION - Threat or overt act of an assault (through physical or verbal means), coupled with the present ability to carry out the threat or assault, which reasonably indicates that an assault or injury to any person is imminent.

PASSIVE RESISTANCE - Minimal physical action to prevent a member from performing their lawful duty. For example, a subject failing to comply with a lawful command and stands motionless and/or a subject going limp when being taken into custody.

RESISTING ARREST (NYS PENAL LAW) - A person is guilty of resisting arrest when he intentionally prevents or attempts to prevent a police officer or peace officer from effecting an authorized arrest of himself or another person.

PROHIBITED METHODS OF RESTRAINT - Sitting, kneeling, or standing on the chest or back of a subject in a manner that compresses the diaphragm, thereby reducing the subject's ability to breathe.

PROCEDURE

When a member of the service must gain compliance, control, or custody of an uncooperative subject, the member should comply with *P.G. 221-01, "Force Guidelines"* and:

UNIFORMED MEMBER OF THE SERVICE

1. Take necessary action to protect life and personal safety of all persons present, including subjects being placed into custody.
2. Utilize de-escalation techniques when appropriate and consistent with personal safety, which may reduce or eliminate the need to use force, and increase the likelihood of gaining the subject's voluntary compliance.
3. Isolate and contain the subject, if appropriate.

- UNIFORMED MEMBER OF THE SERVICE (continued)**
4. Immediately request a supervisor to respond, as soon as appropriate and safety permits.
 5. Request additional members, as necessary, to control situation.
 6. Request the response of the Emergency Service Unit, if appropriate.

NOTE *MOS should consider whether a subject's lack of compliance is a deliberate attempt to resist, or alternatively, an inability to comply, resulting from factors including, but not limited to, medical condition, mental impairment, developmental disability, physical limitation, language barrier, and/or drug interaction.*

7. Comply with P.G. 221-13, "Mentally Ill or Emotionally Disturbed Persons," if the subject is acting in a manner that would lead the member of service to believe that the subject is emotionally disturbed or under the influence of a mind-altering substance.

- SUPERVISOR ON SCENE**
8. Assume command of the incident and coordinate the use of de-escalation techniques, if appropriate and consistent with officer safety.
 9. Direct tactics to minimize the possibility of injury to members of the service, the subject, or bystanders.

- UNIFORMED MEMBER OF THE SERVICE/ SUPERVISOR ON SCENE**
10. If the use of de-escalation and conflict negotiation techniques fail to persuade an uncooperative subject to cooperate, the supervisor/members of the service present should, if appropriate and consistent with officer safety:
 - a. Advise the offender that he/she will be charged with the additional offense of resisting arrest
 - b. Devise a tactical plan with members present to restrain the subject while minimizing the possibility of injury to members of the service, the subject, and bystanders
 - c. Advise the offender that physical force or other devices (e.g., O.C. pepper spray, shield, baton/asp, etc.) will be used to handcuff/restrain him/her before applying such force, if appropriate.

NOTE *Members of the service should not use O.C. Pepper Spray, Conducted Electrical Weapon, or impact weapons on persons who are passively resisting.*

11. Apply no more than the reasonable force necessary to gain control.
 - a. Sitting, kneeling, or standing on the chest or back of a subject in a manner that compresses the diaphragm, thereby reducing the subject's ability to breathe, is strictly prohibited.
12. Assess the situation continually and adjust the use of force as necessary.

NOTE *All members of the service must intervene to stop another member of the service from using excessive force. Failure to intervene in the use of excessive force, or report excessive force, or failure to request or to ensure timely medical treatment for an individual is serious misconduct that may result in criminal and civil liability and will result in Department discipline, up to and including dismissal. If a member of the*

(continued)** *service becomes aware of the use of excessive force or failure to request or to ensure timely medical treatment for an individual, the member must report such misconduct to the Internal Affairs Bureau Command Center. This report can be made anonymously.*

Obtaining a Confidential Identification Number from the Command Center investigator will satisfy the member's reporting responsibility, if the information is accurate and complete. Subsequent or ongoing reporting is encouraged to ensure the information is timely and complete and may be made by referencing the Confidential Identification Number.

UNIFORMED MEMBER OF THE SERVICE

13. Rear-cuff the subject, when practical.
 - a. If it is safer for the member of the service and the subject, the member of the service may front-cuff the subject initially, and then rear-cuff as soon as it is practical and safety allows.
 - b. If members of the service are having difficulty rear-cuffing a subject, Department issued leg restraints or Velcro straps to immobilize the legs of a subject may be used as an effective tactic to gain control, limit the subject's ability to flee or harm other individuals, and allow the subject to be safely rear-cuffed with minimal force.

NOTE *If available, Department issued alternative restraining devices should be used to restrain, or further restrain, subjects whose actions may cause injury to themselves or others.*

14. Position the subject to promote free breathing, as soon as safety permits, by sitting the person up or turning the person onto his/her side.
15. Observe the subject closely for injuries, signs of serious illness, or difficulty breathing.
16. Whenever any level of force is used, inquire if subject requires medical attention and document response to inquiry in digital **Activity Log**.
17. If the subject is injured or ill, ensure subject receives proper medical attention.
18. Ensure subject receives immediate medical attention and provide first aid, if appropriate and properly trained, if subject is having difficulty breathing or demonstrates any potentially life-threatening symptoms or injuries.
19. If the location of the police action is poorly lit, use a flashlight or other source of illumination to maintain a clear view of the subject at all times.
20. Notify immediate supervisor regarding the type of force used, the reason force was used, and injury to any person involved.
21. Document use of force in digital **Activity Log**.

IMMEDIATE SUPERVISOR

22. Perform duties of the "immediate supervisor" as per P.G. 221-03, "*Reporting and Investigation of Force Incident or Injury to Persons During Police Action,*" when notified or after becoming aware of any use of force incident.

FIREARMS DISCHARGE BY UNIFORMED MEMBERS OF THE SERVICE

If a person is killed as a direct result of police action, the uniformed member of the service involved will not be assigned to identify the body at the morgue. Another uniformed member of the service, who can identify the body, will be assigned.

*While a firearms discharge into a safety station within a New York City Police Department facility, Department of Correction facility, or Health and Hospital Corporation facility is not considered a firearm discharge, it does require a report on **Typed Letterhead** by the uniformed member's commanding officer to the Police Academy, Firearms and Tactics Section outlining circumstances of the discharge. A **THREAT, RESISTANCE OR INJURY (T.R.I.) INCIDENT REPORT** will not be completed in these instances.*

All uniformed members of the service who discharge a firearm, on or off duty, at other than an approved firing range or while lawfully engaged in target practice or hunting, will attend a tactics review session conducted by the Firearms and Tactics Section. The dates, times, locations, required equipment, and other provisions governing the review sessions will be the subject of a yearly Department directive.

DEPARTMENT POLICY

The Force Investigation Division is responsible for all investigations when a person dies or is likely to die while in police custody or immediately prior to police custody.

The Commanding Officer, Force Investigation Division may utilize investigators from other bureaus (e.g., Detective Bureau, Internal Affairs Bureau, etc.) to assist in the investigation (i.e., canvass for video, conduct interviews, etc.), as necessary.

When, in the course of an investigation (i.e., investigate DOA), a member of the Detective Bureau becomes aware that a death or serious injury was, or may have been in connection with a police action, the precinct/police service area/transit district commanding officer/duty captain, the Internal Affairs Bureau Command Center, and the Force Investigation Division will be immediately notified.

The New York State Correction Law Section 47(2) mandates that a report be made to the New York State Commission of Correction whenever a death occurs while a prisoner is in police custody while lodged in a detention or holding cell, being transported to the borough courthouse for arraignment after having been in a detention or holding cell, or at the hospital after having been lodged in a detention or holding cell. If a death occurs prior to a prisoner having been in a detention or holding cell, a notification to the New York State Commission of Correction is not necessary.

*Whenever a reportable death occurs while in custody, the Commanding Officer, Force Investigation Division will ensure the form entitled, “**Report of Inmate Death to State Commission of Correction (SCOC M187)**” is prepared. Only items “one through thirty-six” will be completed on the form. Whenever a question does not apply or an answer is not available, the letters “DNA” will be entered in the allotted space on the form. The FID supervisor will then fax the form directly to the New York State Commission of Correction within six hours of the death, and immediately follow-up with the New York State Commission of Correction to confirm receipt of the faxed copy of the **Report of Inmate Death to State Commission of Correction (SCOC M187)**. The Commanding Officer, Force Investigation Division will ensure the form is also mailed within ten days of the death to the New York State Commission of Correction, Attention: Medical Review Board.*

MEMBER OF THE SERVICE SUBJECTED TO FORCE WHILE PERFORMING LAWFUL DUTY

DATE ISSUED:
01/13/21

DATE EFFECTIVE:
01/13/21

REVISION NUMBER:

PAGE:
1 of 5

PURPOSE

To record and evaluate incidents when a member of the service is subjected to force while performing lawful duty, either on or off-duty, or auxiliary members that are subjected to force while on duty.

DEFINITIONS

FORCE - When used against a member of the service, for the purpose of this procedure, is defined as any physical harassment, assault, reckless endangerment, or menacing, including shots fired at a member, the brandishing of a weapon directed at a member, and the throwing of items at members of the service, whether or not it resulted in injury.

ACTIVE RESISTING - Includes physically evasive movements to defeat a member of the service's attempt at control, including bracing, tensing, pushing, or verbally signaling an intention to avoid or prevent being taken into or retained in custody.

NOTE

A THREAT, RESISTANCE OR INJURY (T.R.I.) INCIDENT REPORT will not be prepared when a subject merely verbally signals an intention to avoid or prevent being taken into or retained in custody.

IMMEDIATE SUPERVISOR - An available supervisor, who was not involved in the incident, from the same command as member(s) of the service involved in use of force/injury incident. The immediate supervisor must be at least one rank higher than all involved members. If no supervisor in an appropriate rank is available, the duty captain will determine who will fulfill the role of immediate supervisor.

PROCEDURE

When a member of the service is subjected to force while performing lawful duty, or sustains an injury that results from attempting to apprehend a subject or control an individual or individuals, or encounters active resistance from a subject, either on or off-duty:

MEMBER OF THE SERVICE

1. Take appropriate action to stabilize situation and/or apprehend perpetrators.
2. Obtain medical attention for any person injured.
3. Request response of immediate supervisor.
4. Make appropriate entry in digital **Activity Log**.
5. Complete **THREAT, RESISTANCE OR INJURY (T.R.I.) INTERACTION REPORT** prior to completion of tour, unless exceptional circumstances exist.

NOTE

Each incident will be assigned one Threat, Resistance or Injury (T.R.I.) incident number in the FORMS – T.R.I. application, regardless of the number of members of the service involved, or the number of subjects or civilians involved.

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-06	01/13/21		2 of 5

IMMEDIATE SUPERVISOR

6. Respond to scene and conduct preliminary investigation.

NOTE

Immediate supervisors must distinguish between an injury that results from a member being subjected to force, or is sustained while attempting to apprehend a subject, rather than an injury sustained during other police operations. Supervisors will be guided by P.G. 205-05, "Line of Duty Injury or Death Occurring Within City" or P.G 205-06, "Line of Duty Injury or Death Outside City in Residence Counties," rather than this procedure, in the latter circumstance.

7. Notify desk officer of facts.
 - a. If member is seriously injured or dies, or removed to a hospital for medical treatment, request the desk officer to notify the commanding officer/executive officer or the patrol borough command to request the duty captain to respond, if commanding officer/executive officer is not available.
8. Notify precinct detective squad to respond and investigate, if there are any outstanding suspects or further investigation is required.
9. Ensure **COMPLAINT REPORT (PD313-152)** is prepared for offense committed against member, and/or additional charge is added to an arrested subject's **ON-LINE BOOKING SYSTEM ARREST WORKSHEET (PD244-159)**.
10. Ensure that **LINE OF DUTY INJURY REPORT (PD429-154)** is completed by designated supervisor(s), and ensure duties are performed as per P.G. 205-05, "Line of Duty Injury or Death Occurring Within City" or P.G. 205-06, "Line of Duty Injury or Death Outside City in Residence Counties," if necessary.
11. Perform duties of "immediate supervisor" as per P.G. 221-03, "Reporting and Investigation of Force Incident or Injury to Persons During Police Action," as appropriate.

NOTE

If a member of the service sustains a serious injury, is likely to die, or dies, the commanding officer/executive officer/duty captain will assume control of the situation and ensure all responsibilities of the immediate supervisor are completed.

Injuries sustained by members of the service are independent of the criteria used to categorize a force incident as outlined in P.G. 221-03, "Reporting and Investigation of Force Incident or Injury to Persons During Police Action," (e.g., level 1 force incident, level 2 force incident, etc.). Force incident levels, as found in P.G. 221-03, "Reporting and Investigation of Force Incident or Injury to Persons During Police Action," will not be applied to injuries sustained by members of the service. Instead, this procedure, along with P.G. 205-05, "Line of Duty Injury or Death Occurring Within City" will be adhered to regarding the determination of the appropriate investigating supervisor.

12. Prepare **THREAT, RESISTANCE OR INJURY (T.R.I.) INCIDENT REPORT** and recommend appropriate follow-up, as necessary.

- IMMEDIATE SUPERVISOR (continued)**
- 13. Instruct members involved to complete **THREAT, RESISTANCE OR INJURY (T.R.I.) INTERACTION REPORT** for every subject/civilian interaction being reported.
 - a. If member is incapacitated, complete **THREAT, RESISTANCE OR INJURY (T.R.I.) INTERACTION REPORT** using information known at time.
 - 14. Make digital **Activity Log** entry of details of the incident including **THREAT, RESISTANCE OR INJURY (T.R.I.) INCIDENT REPORT** number (once obtained).

- 15. Ensure arresting officer charges defendant with appropriate below listed charges when force is used against member of the service:
 - a. Resisting Arrest (Section 205.30, Penal Law),
 - b. Assault 2nd degree (Section 120.05, Penal Law, sub.3),
 - c. Assault on a Peace Officer, Police Officer, Fireman, or Emergency Medical Services Professional (Section 120.08, Penal Law), or
 - d. Aggravated Assault Upon a Police Officer or a Peace Officer (Section 120.11, Penal Law).
 - 16. Have criminal history check completed for every prisoner arrested for the above charges.
 - a. If prisoner has been arrested for any charge listed in step “15” more than once within the past five years (i.e., a prisoner arrested for the second time within five years for any charge listed in step “15”), the prisoner shall be deemed a “Resisting Recidivist.”
 - (1) Request detective squad supervisor to enhance arrest, interview subjects, and canvass for video and witnesses.
 - 17. Notify commanding officer/duty captain and patrol borough command without waiting for details, if member is seriously injured, or removed to a hospital for medical treatment.
- DETECTIVE SQUAD SUPERVISOR**
- 18. Ensure detective squad members are performing duties related to enhancing arrests, interviewing subjects, and canvassing for video and witnesses.
 - a. Ensure all arrests involving a “Resisting Recidivist” are enhanced by the precinct detective squad and that the District Attorney’s Office puts forth all efforts towards a successful prosecution.
 - b. Process any prisoner that has assaulted a member of the service in accordance with D.G. 502-30, “*Electronic Recording of Custodial Interrogations.*”
- COMMANDING OFFICER/EXECUTIVE OFFICER/DUTY CAPTAIN**
- 19. Respond and conduct an investigation, if member sustains a serious physical injury, is likely to die, or dies.

ADDITIONAL DATA

The **THREAT, RESISTANCE OR INJURY (T.R.I.) INCIDENT REPORT** is the primary method used by the Department to gather intelligence information regarding subjects who actively resist custody and incidents that are life threatening for members of the service. The effectiveness of tactics training in identifying dangerous new criminal practices and in promoting best practices by members depends upon the accuracy and completeness of these reports.

USE OF OLEORESIN CAPSICUM PEPPER SPRAY DEVICES

DATE ISSUED:
10/07/19

DATE EFFECTIVE:
10/08/19

REVISION NUMBER:

PAGE:
1 of 4

PURPOSE

To inform uniformed members of the service of circumstances under which Oleoresin Capsicum (O.C.) pepper spray may be intentionally discharged and to record instances where O.C. pepper spray has been discharged, intentionally or unintentionally.

SCOPE

Use of O.C. pepper spray constitutes physical force under the New York State Penal Law. Use of O.C. pepper spray is proper when used in accordance with Article 35 of the Penal Law and Department procedures. O.C. pepper spray may be used to gain or maintain control of persons who are actively resisting arrest or lawful custody or exhibiting active aggression, or to prevent individuals from physically injuring themselves, members of the service, or other persons. O.C. pepper spray may be used in arrest or custodial restraint situations where physical presence and/or verbal commands have not been, or would not be, effective in overcoming physical resistance. O.C. pepper spray shall not be used in situations that do not require the use of physical force.

In many cases, O.C. pepper spray will reduce or eliminate the need for physical force to effect an arrest or gain custody. It will often reduce the potential for injuries to members and suspects that may result from physical restraint and it should be regarded as a possible alternative to such force and restraint, where practical.

DEFINITIONS

PASSIVE RESISTANCE – Minimal physical action to prevent a member from performing their lawful duty. For example, a subject failing to comply with a lawful command and stands motionless and/or a subject going limp when being taken into custody.

ACTIVE RESISTING – Includes physically evasive movements to defeat a member of the service's attempt at control, including bracing, tensing, pushing, or verbally signaling an intention to avoid or prevent being taken into or retained in custody.

ACTIVE AGGRESSION – Threat or overt act of an assault (through physical or verbal means), coupled with the present ability to carry out the threat or assault, which reasonably indicates that an assault or injury to any person is imminent.

PROCEDURE

When necessary to use O.C. pepper spray device:

NOTE

In an effort to gain voluntary compliance, members of the service should advise the offender that O.C. pepper spray will be used to handcuff/restrain him/her before applying such force, if feasible.

UNIFORMED MEMBER OF THE SERVICE

1. Hold O.C. pepper spray in an upright position, aim and discharge O.C. pepper spray into a subject's eyes for maximum effectiveness, using two, one second bursts, at a minimum distance of three feet, and only in situations when the uniformed member of the service reasonably believes that it is necessary to:
 - a. Gain or maintain control of persons who are actively resisting arrest or lawful custody or exhibiting active aggression
 - b. Prevent individuals from physically injuring themselves, members of the service, or other persons
 - c. Establish physical control of a subject attempting to flee from arrest or custody
 - d. Establish physical control of an emotionally disturbed person (EDP)
 - e. Control a dangerous animal, by deterring an attack, to prevent injury to persons or animals present.
2. Effect arrest of criminal suspect against whom O.C. pepper spray was used and charge with crime which initiated use of the O.C. pepper spray.
 - a. Add resisting arrest charge, when appropriate.
 - b. Comply with P.G. 210-13, "*Release Of Prisoners - General Procedure*," if it is determined that arrested person did not commit the crime or that no crime was committed.
 - c. Comply with P.G. 221-13, "*Mentally Ill Or Emotionally Disturbed Persons*," when appropriate.

NOTE

Do not use O.C. pepper spray on subjects who passively resist (i.e., minimal physical action to prevent a member from performing their lawful duty). If possible, avoid using O.C. pepper spray on persons who appear to be in frail health, young children, women believed to be pregnant, or persons with known respiratory conditions. Avoid discharging O.C. pepper spray indiscriminately over a large area for disorder control. (Members who are specifically trained in the use of O.C. pepper spray for disorder control may use O.C. pepper spray in accordance with their training, and within Department guidelines, and as directed by supervisors.). In addition, avoid using O.C. pepper spray in small contained areas such as automobiles and closets.

3. Request response of Emergency Medical Service (EMS) once the situation is under control.
 - a. Advise person sprayed that EMS is responding.
4. Remove the subject from the contaminated area and expose to fresh air while awaiting the arrival of EMS, or transportation to hospital/stationhouse, if tactically feasible.
 - a. Determine whether the person sprayed is wearing contact lenses. (It is strongly recommended that contact lenses be removed as soon as possible after exposure to O.C. pepper spray.)
5. Position subject on his/her side or in a sitting position to promote free breathing.
 - a. The subject should never be maintained or transported in a face down position.
 - b. Avoid actions which may result in chest compression, such as sitting, kneeling, or standing on a subject's chest or back, thereby reducing the subject's ability to breathe.

UNIFORMED MEMBER OF THE SERVICE (continued)

6. Provide assistance to subject as follows:
 - a. When consistent with member's safety, and provided a source of water is readily available, the uniformed member should flush the contaminated skin area of a subject with profuse amounts of water
 - b. Repeat flushing at short intervals, if necessary, until symptoms of distress subside
 - c. Continue flushing the contaminated skin of the subject in custody at the stationhouse, as needed
 - d. Commence the flushing of a subject's contaminated skin upon arrival at the stationhouse, if this has not already been done.

NOTE

Do not rub or touch skin of contaminated person, as the initial effect of O.C. pepper spray does not dissipate for 15-30 minutes. Also, do not use salves, creams, ointments, commercial eyewashes or bandages.

7. Transport prisoner immediately to the emergency room of the nearest hospital if he/she is demonstrating difficulty breathing, or exhibiting signs of severe stress, hyperventilation, etc.
 - a. Windows of transport vehicle should be kept open.
 - b. Members who come in contact with persons who have been exposed to O.C. pepper spray must thoroughly wash their hands afterward and avoid having any contaminated clothing make contact with their face.
 - c. Advise hospital staff that O.C. pepper spray has been used on prisoner/EDP.
8. Prepare **ON LINE BOOKING SYSTEM ARREST WORKSHEET (PD244-159)** and **MEDICAL TREATMENT OF PRISONER (PD244-150)** in arrest situations.
9. Complete the **AIDED REPORT** in non-arrest situations (e.g., EDP) and:
 - a. Check box "O.C. Spray Used"
 - b. List the time, doctor's name, and diagnosis under "Details" caption, when applicable.
10. Notify immediate supervisor regarding the use of O.C. pepper spray.
11. Complete **THREAT, RESISTANCE OR INJURY (T.R.I.) INTERACTION REPORT**, and comply with P.G. 221-03, "Reporting and Investigation of Force Incident or Injury to Persons During Police Action."
12. Perform duties of the "immediate supervisor" as per P.G. 221-03, "Reporting and Investigation of Force Incident or Injury to Persons During Police Action."
13. Ensure prisoners who have been sprayed with O.C. pepper spray receive appropriate first aid, if needed, upon arrival at stationhouse.
14. Ensure prisoners who have been sprayed with O.C. pepper spray are properly observed throughout the arrest process, and that they receive prompt medical attention if they need or request it.

**COMMANDING OFFICER,
FIREARMS
AND TACTICS
SECTION** 16. Analyze situations where O.C. pepper spray was utilized to evaluate its effectiveness.
a. As appropriate, modify existing training/tactics relative to the use of O.C. pepper spray.
17. Compile a list of O.C. pepper spray usage on a monthly basis and forward a report on usage to the First Deputy Commissioner (through channels).
18. Incorporate relevant information into tactical training.

ADDITIONAL DATA *The only O.C. pepper spray authorized for use is the type issued to all uniformed members through the Firearms and Tactics Section.*

Current authorized O.C. pepper spray uses technology where the O.C. pepper spray solution is contained in a bag within the metal canister. This allows it to be sprayed at any angle and it is no longer necessary to shake the O.C. pepper spray to mix the solution. O.C. pepper spray contains approximately ten one-second bursts and should be replaced when half empty or after five one-second bursts have been used.

O.C. pepper spray will not automatically stop all subjects, and even when it does incapacitate, the effects are temporary. Members should therefore be ready to use other appropriate force options and tactics.

When performing duty in uniform, the O.C. pepper spray shall be carried in its holster attached to the non-shooting side of the gun belt. When performing enforcement duty in civilian clothes the O.C. pepper spray must be carried in the holster attached either to a belt or in another appropriate manner. Undercover members may opt not to carry the O.C. pepper spray.

Members of the service may carry the O.C. pepper spray device during off duty hours.

USE OF CONDUCTED ELECTRICAL WEAPONS (CEW)

DATE ISSUED:
07/01/20

DATE EFFECTIVE:
07/01/20

REVISION NUMBER:

PAGE:
1 of 10

PURPOSE

To inform members of the service (MOS) of circumstances under which a Conducted Electrical Weapon (CEW) may be intentionally used and to record instances when a Conducted Electrical Weapon has been used.

SCOPE

A Conducted Electrical Weapon (CEW) can be an effective means of subduing aggressive suspects and emotionally disturbed persons (EDPs). A CEW is classified as a less lethal device and is intended to augment and provide a greater margin of safety for MOS who might otherwise be forced to physically subdue a dangerous subject. The use of a CEW is classified as a significant intermediate use of force option such as O.C. pepper spray or impact techniques.

A CEW should only be used against persons who are actively resisting, exhibiting active aggression, or to prevent individuals from physically injuring themselves or other person(s) actually present. It will often reduce the potential for injuries to members and suspects that may result from physical restraint and should be regarded as a possible alternative to such force and restraint, where practical. It is prohibited to use a CEW in situations that do not require the use of physical force.

DEFINITIONS

CONDUCTED ELECTRICAL WEAPON (CEW) – A hand held device designed to use propelled wires and/or direct contact to conduct an electrical charge which primarily affects motor functions and/or the sensory nervous system.

SPARK TEST – The mandatory function check of a CEW issued by the desk officer or designated supervisor. CEWs must be unloaded (without a cartridge in the loading bay) when the test is performed. Upon assignment of a CEW, a spark test must be conducted into a firearms safety station that is under direct observation of a supervisor.

ACTIVATE (ACTIVATION) – To arm the CEW by releasing the safety. When the safety switch is shifted up, the laser and LED illuminators turn on (depending on illumination status), the Central Information Display (CID) will show the calculated percentage of battery life and the CEW will discharge when the trigger is depressed.

LASER WARNING – Pointing and placing the laser dot of an activated CEW on a subject in order to attempt to achieve voluntary compliance. When feasible, a verbal warning, consistent with personal safety, should be given to the intended subject in conjunction with a laser warning.

DISCHARGE – Depression of a CEW's trigger resulting in the flow of an electric charge. A Discharge will result in arcing (no cartridge in loading bay) or probes being fired (cartridge is present).

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-08	07/01/20		2 of 10

DEFINITIONS (continued)

WARNING ARC – The activation and discharge of a CEW with the cartridge removed that displays a visible and audible arcing of electricity between the front electrodes of the CEW. The purpose of a warning arc is to receive voluntary compliance from an intended subject. When feasible, and consistent with personal safety, a verbal warning should be issued to the intended subject in conjunction with a warning arc.

CARTRIDGE – Refers to the Department authorized extended probe cartridge, specifically for use with an approved Department CEW.

CARTRIDGE PROBES – Two barbed probes designed to penetrate the skin that are connected to copper clad steel, insulated from the replaceable cartridge attached to the loading bay of the CEW.

CARTRIDGE MODE/PROBE DEPLOYMENT – The primary mode of operation that utilizes compressed nitrogen gas to propel two probes on copper clad steel insulated wires from the replaceable cartridge attached to the front of the CEW.

DRIVE STUN – When the front electrodes on the CEW, or an expended cartridge attached to the front of the CEW, are brought into immediate, direct, or close proximity contact with a subject's body or clothing. The drive stun mode may be used to supplement the effectiveness of a close probe spread (Three Point Contact), or to complete the circuit in the event of a single probe contact, or as a countermeasure to gain separation between officers and the subject so that officers can consider another force option. Drive stun mode should not be the primary method of use unless exceptional circumstances exist.

ACTIVE RESISTING – Includes physically evasive movements to defeat a member of the service's attempt at control, including bracing, tensing, pushing, or verbally signalling an intention to avoid or prevent being taken into or retained in custody.

ACTIVE AGGRESSION – Threat or overt act of an assault (through physical or verbal means), coupled with the present ability to carry out the threat or assault, which reasonably indicates that an assault or injury to any person is imminent.

PASSIVE RESISTANCE – Minimal physical action to prevent a member from performing their lawful duty. For example, a subject failing to comply with a lawful command and stands motionless and/or a subject going limp when being taken into custody.

CEW EFFECTIVENESS – Any immediate reaction, even if momentary, that causes a change in an actively aggressive subject's or emotionally disturbed person's physical actions and/or psychological behavior as the result of a pre-deployment verbal warning, activation, laser warning, warning arc, or discharge of a CEW.

 - c. One CEW should be assigned to an authorized UMOS in each RMP.
 - d. One CEW should be assigned to an authorized UMOS per foot post location.
 - e. Any remaining CEWs should be assigned to a second authorized UMOS in an RMP.

NOTE

Any CEW that becomes available during the tour of duty will be immediately reassigned using the priority listed above, issuing supervisors will ensure the exchange of CEWs between incoming and outgoing platoons does not interfere with adequate distribution. Operable CEWs should never remain unassigned if authorized UMOS on patrol remaining unequipped, unless those devices are being held for odd-tour personnel.

9. Observe authorized uniformed member of the service perform mandatory spark test without a cartridge in the loading bay.
 - a. CEW cartridges will not be issued until the mandatory spark test has been completed by the assigned member and observed by platoon commander, desk officer, or designated supervisor.
10. Assign primary CEW cartridge to authorized uniformed member of the service and observe its proper placement in the CEW cartridge bay.
11. Assign secondary CEW cartridge to authorized uniformed member of the service.

NOTE

CEWs will only be issued by the platoon commander, desk officer, or designated supervisor.

A CEW may be assigned with a single cartridge while the replacement of a discharged cartridge is pending. If a CEW is assigned with a single cartridge in this manner, a command log entry will be made noting that the issued CEW is “pending cartridge replacement.”

The command log entry must include the CEW serial number, T.R.I. incident number (if applicable), as well as the date and time the cartridge was discharged.

14. Be responsible for CEW while in your custody and control.
 15. Carry CEW only when authorized by the Firearms and Tactics Section.
 - a. CEW holster must be attached to the duty belt on the support side, opposite the firearm.
 - b. Cross drawing of a CEW is prohibited.
 - c. Emergency Service Unit members and canine handlers will carry CEW in a holster and in a manner approved by Commanding Officer, Firearms and Tactics Section.

NOTE

Only CEWs authorized by the Commanding Officer, Firearms and Tactics Section will be carried by members of the service. Carrying or use of any other unauthorized CEW may result in disciplinary action.

MOS who have been issued a Department CEW holster are required to maintain their holster and replace it, at their own expense, when it is no longer serviceable. CEW holsters and belt clips are available for purchase at the Equipment Section.

16. Upon assignment of CEW, perform a full five (5) second spark test to ensure operability.
 - a. Spark tests will only be performed into a firearms safety station, under the observation of a supervisor.
 - b. The cartridge is not to be held in either hand, nor placed in the immediate vicinity of the safety station while performing the spark test.
 - c. Notify desk officer/immediate supervisor if CEW has low battery percentage, a fault icon, or is inoperable.

NOTE

Unintentional discharges will occur if a cartridge is inserted into the CEW's cartridge bay while conducting a spark test or warning arc. Cartridges must be removed and secured away from the CEW prior to conducting a spark test. Unintentional discharges resulting in injuries may occur if a cartridge is left attached to the CEW while conducting a spark test.

Members are reminded that the time, date, temperature, duration and remaining battery percentage are recorded in the CEW's internal memory. Therefore, whenever a CEW is discharged (including a spark test), such discharge must be recorded in the member's digital Activity Log, Command Log, or other appropriate Department record.

17. Upon completion of spark test, request cartridge from platoon commander/desk officer/designated supervisor.
18. Inspect and insert cartridge into CEW's cartridge bay and holster CEW.
 - a. Ensure secondary cartridge is secured, as appropriate.
19. Make digital **Activity Log** entry and include:
 - a. Results of inspection.

21. Assess situation and determine if use of a CEW would be appropriate.
22. Consider totality of circumstances when deciding the reasonable amount of force necessary to overcome resistance when effecting an arrest or when taking a mentally ill or emotionally disturbed person into custody. Some factors to consider when determining the appropriate use of force include, but are not limited to:
- The nature and severity of crime/circumstances,
 - Actions taken by subject,
 - Duration of action,
 - Immediacy of perceived threat or harm to subject, members of the service, and/or bystanders,
 - Whether the subject is actively resisting custody,
 - Whether the subject is attempting to evade arrest by flight,
 - Number of subjects in comparison to number of MOS,
 - Size, age, and condition of subject in comparison to MOS,
 - Subject's violent history, if known,
 - Presence of hostile crowd or agitators, and/or
 - Subject apparently under influence of a stimulant/narcotic which would affect pain tolerance or increase the likelihood of violence.

NOTE

CEWs should only be used against persons who are actively resisting, exhibiting active aggression or to prevent individuals from physically injuring themselves or other person(s) actually present. Members of the service are reminded of the availability of Emergency Service Unit.

23. When feasible, issue an appropriate verbal warning, consistent with personal safety, to the intended subject and other members of the service present prior to discharging CEW.
- The verbal warning may be used in conjunction with laser/arc warnings in order to gain voluntary compliance and prevent the need to use force.

NOTE

The recommended point of aim is lower center mass for frontal discharges (below the chest) and below the neck area for discharges at a suspect's back. Avoid discharging at an individual's head, neck, and chest, if possible. When practical, discharge the CEW at the subject's back. The CEW should not be intentionally aimed at an individual's groin.

Members should not intentionally discharge two CEWs simultaneously on a subject.

Fleeing should not be the sole justification for using a CEW against a subject. Members should consider the severity of the offense, the subject's threat level to others, and the

(continued)** *risk of serious injury to the subject before deciding to use a CEW on a fleeing subject. Members should use a CEW for one standard cycle (five seconds) while constantly assessing the situation to determine if subsequent cycles are necessary. Members should consider that exposure to the CEW for longer than fifteen seconds (whether due to multiple applications or continuous cycling) may increase the risk of death or serious injury. All applications must be independently justifiable, and the risks should be weighed against other force options.*

A CEW should never be used in CARTRIDGE or DRIVE STUN mode on a rear-cuffed prisoner.

It is strictly prohibited to use the CEW on persons as a form of coercion or punishment and on persons who passively resist (e.g., going limp, offering no active physical resistance).

The CEW should generally not be used on children, the elderly, obviously pregnant females, the frail, against subjects operating or riding on any moving device or vehicle (e.g., motorists, bicyclists, skateboarders) where the subject may fall while it is in motion or in situations where the subject may fall from an elevated surface.

The CEW should not be used when combustible gases or flammable liquids are present.

 - a. Effect arrest of criminal suspect against whom CEW was used.
 - b. Comply with P.G. 210-13, "Release of Prisoner – General Procedure," if arrested person did not commit the crime or no crime was committed.
 - c. Comply with P.G. 221-13, "Mentally Ill or Emotionally Disturbed Persons," when appropriate.
25. Request response of FDNY Emergency Medical Service (EMS), if person received a CEW discharge.
 - a. Any person who has been struck by a CEW probe or who has had a CEW used on him or her in drive stun mode must be examined at a medical facility.
26. Render reasonable aid as necessary.
27. Break CEW cartridge wire by hand approximately four to six inches from probe, taking into account circumstances, including status of subject.
 - a. Any probe that has penetrated the skin of any person will only be removed by medical personnel.

NOTE *If a CEW was discharged and the probe did not make any contact with subject (e.g., skin, clothing, etc.), the wire connecting probe to the cartridge may be broken by hand. The probe portion shall be disposed of in a "sharps" container and the spent cartridge may be disposed of in the trash and not invoiced. An investigation will still be conducted by the investigating supervisor regarding the use of the CEW.*

28. Safeguard CEW cartridge.

NOTE *Spent CEW cartridges used by Emergency Service Unit personnel will be safeguarded and invoiced, when appropriate, by command of record for subject on whom CEW was used.*

USE OF TEAR GAS

DATE ISSUED:
06/01/16

DATE EFFECTIVE:
06/01/16

REVISION NUMBER:

PAGE:
1 of 2

PURPOSE

To provide for the use of tear gas.

SCOPE

Tear gas is an effective device when used judiciously in selected tactical situations. Its use by the Emergency Service Unit is designed to minimize, rather than increase, the potential for serious physical injury. However, such use carries with it the danger of physical injury or material damage regardless of the care exercised in its application. Therefore, it is imperative that measures be established for the judicious use of tear gas by members trained for this purpose while at the same time providing for the decontamination of those affected, whether civilian or police personnel.

PROCEDURE

When circumstances indicate the use of tear gas may be warranted:

**RANKING
UNIFORMED
MEMBER OF
THE SERVICE
AT SCENE**

1. Notify radio dispatcher and request the following to respond to the scene:
 - a. Precinct commander/duty captain
 - b. Borough commander or designee
 - c. Emergency Service REP Unit and truck
 - d. Emergency Service Unit supervisor.

NOTE

The ultimate decision concerning use of tear gas rests with the patrol borough commander or designee. Technical decisions concerning amount of gas and method of application will be made by the ranking member of the Emergency Service Unit at the scene.

**BOROUGH
COMMANDER/
DESIGNEE AND
EMERGENCY
SERVICE UNIT
SUPERVISOR**

2. Prior to use of tear gas, develop an operational plan to include, but not be limited to, the following:
 - a. Establish a designated mobilization point.
 - b. Station all police personnel not actively engaged in using the gas at a safe distance from its contaminating effects.
 - c. Evacuation of all civilians from premises and away from areas likely to be affected by police operations, if such can be accomplished safely.
 - d. Request Communications Section to direct the following to respond to the designated mobilization point and stand by thereat:
 - (1) Fire Department company
 - (2) Emergency Medical Service ambulance
 - (3) Emergency Medical Service borough supervisor
 - (4) Hazardous Material Decontamination Trailer and Support Vehicle
 - (5) Department Patrol Wagon.

**ADDITIONAL
DATA**

The use of tear gas generally will result in contamination of persons and clothing to varying degrees. Since tear gas adheres to clothing, persons exposed to the gas may contaminate others in their proximity. Therefore, ALL persons exposed to the gas should be isolated from public contact, if possible, and afforded necessary treatment, including medical evaluation, when indicated.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-09	06/01/16		2 of 2

ADDITIONAL DATA *(continued)*

First aid procedures call for the immediate removal of persons from the contaminated area to an open and upwind position. Eyes should be kept open and facing the wind and, if feasible, flushing the face, eyes and exposed skin with copious amounts of fresh, cool water is recommended. As noted above and if time allows, the Decontamination Trailer should be activated and brought to the mobilization point for this purpose. When the decision is made to use tear gas, the Decontamination Trailer should be made operative and positioned so that affected individuals can be decontaminated immediately. This method can be used to remove virtually all tear gas residue and should prevent unnecessary contamination of hospital emergency rooms if further treatment is necessary. Contaminated clothing should be removed at the scene, if practicable, and replaced by a disposable poly-laminated tyvex suit, supplied by the Emergency Medical Service, or, if unavailable, a loosely draped blanket. Tight clothing should not be worn. Contaminated clothing or uniforms should be thoroughly aired and washed with soap and water before being worn. Dry cleaning will NOT remove tear gas residue.

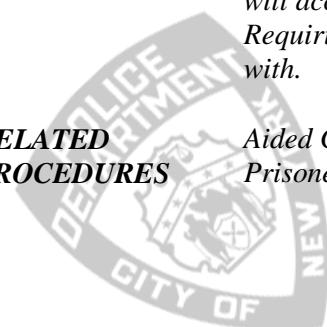

If discomfort persists, the person affected should be removed to a New York City hospital designated by the Emergency Medical Service supervisor on the scene for medical attention.

When a person contaminated with tear gas is seriously ill or injured and hospital treatment is indicated, the Emergency Medical Service borough supervisor will direct the ambulance crew to respond to the designated city hospital. As directed by the Emergency Medical Service borough supervisor, on-scene decontamination procedures should be performed to the extent that such are medically feasible. Emergency Medical Service supervisors will be responsible for establishing liaison with the designated hospital administrator or deputy. Members of the service will comply with the directions of the Emergency Medical Service supervisor PRIOR to entering the facility with contaminated persons. If immediate medical attention is necessary, the Emergency Medical Service supervisors may designate any nearby medical facility. The final determination on which medical facility to use rests with the Emergency Medical Service borough supervisor.

If the injured person being removed is under arrest, a uniformed member of the service will accompany the prisoner to the hospital. Patrol Guide procedure 210-04, "Prisoners Requiring Medical/Psychiatric Treatment" and related procedures will be complied with.

ADDITIONAL DATA

Uniformed members of the service should not unnecessarily display special weapons. Their use should be limited to those situations where the officer would ordinarily carry his firearm in his hand for the purpose of safety and the tactical situation indicates use of a special weapon clearly outweighs the use of the handgun. The actual use of the special weapon should only be in a situation where the circumstances spell out a potential case of justifiable use of deadly physical force, as a last resort after all other means have been exhausted. All provisions of the Patrol Guide and other Department directives regarding the use of firearms are also applicable use of special weapons.

The following additional guidelines regarding the issuance and utilization of special weapons for various Department units are to be complied with in addition to the preceding procedures:

DETECTIVE BUREAU:

Detective Bureau personnel shall utilize the special weapons and tactical expertise of Emergency Service personnel for pre-planned events. If there is insufficient time or other compelling factors are present, a captain or above may authorize the issuance of special weapons when all the following circumstances exist:

- a. A tactical plan is formulated
- b. It is a potential arrest situation
- c. An arrest or search warrant has been issued.
- d. There is a history of violence on the part of the perpetrator.

Special weapons may be issued when other circumstances would lead a reasonable person to believe that the use of special weapons would be prudent and necessary. A captain or above must accompany those members issued such weapons on their assignments and maintain firearms control. A captain or above will insure that all members are wearing a protective vest and the special weapon is unloaded, opened and encased while being transported to scene and upon conclusion of assignment. The special weapon will not be loaded until arrival at scene of incident. Special weapons shall not be used without the direction of the captain or above except in those situations which require immediate action to prevent serious bodily injury or death and then only if the lives of innocent people are not unnecessarily endangered.

When services of Emergency Service Unit are utilized in connection with a pre-planned tactical operation, only members of Emergency Service Unit will carry shotguns/special weapons.

EMERGENCY SERVICE UNIT/HARBOR UNIT:

The use of special weapons will be limited to specific instances as outlined below:

- a. When a barricaded criminal, hostage taker or emotionally disturbed person possesses a firearm or the member has reasonable grounds to believe such person possesses a firearm.
- b. When a hostage taker is armed with a weapon and is threatening the life of a hostage and it may become necessary to use deadly physical force to protect the life of the hostage.
- c. When conducting searches for armed perpetrators or when it is believed such perpetrators are armed, including the executions of warrants.
- d. When engaged in VIP escorts and protection.

PATROL GUIDE

ADDITIONAL DATA (continued)

- e. When guarding dangerous criminals in conjunction with the New York City Department of Corrections.
- f. When guarding payrolls, narcotics or weapons transfers.
- g. When a captain or above deems a special weapon appropriate for the situation at hand.
- h. When a spontaneous incident takes place which requires immediate action to prevent serious bodily injury or death, and then only if the lives of innocent people are not unnecessarily endangered.
- i. Special weapons shall not be utilized in restraining an emotionally disturbed person unless the circumstances of sub-division "a" exist.

Authorized members of the service assigned to Highway Units can be issued special weapons under circumstances described in sub-divisions "d" and "e" above.

A special weapon is issued to a member for his own protection and will, as a general rule, only be employed in the defense of his own life, another officer's life, or the life of an innocent civilian.

Uniformed members of the service that have not been trained in specialized tactics utilized by Emergency Service Unit personnel should not be used as their replacements.

GUIDELINES AND APPROVAL PROCESS PERTAINING TO THE USE OF DISTRACTION DEVICES

DATE ISSUED:
01/13/21

DATE EFFECTIVE:
01/13/21

REVISION NUMBER:

PAGE:
1 of 2

1. A distraction device is a less lethal hand-held apparatus which generates startling sound and light energy when deployed into a confined area. Its purpose is to provide short-term tactical cover for officers making high risk tactical entries. These devices are less lethal and are only authorized for use by trained members of the Emergency Services Unit to minimize the risk of physical injuries to all persons present. Use of these devices may be considered during a search warrant execution tactical plan meeting, or may develop ad hoc at the scene of an emotionally disturbed person, a perpetrator search, etc. Circumstances which may support the use of these devices include but are not limited to; the possible presence of firearms, dangerous animals, known violent subjects, multiple subjects and/or the history of the location.

2. Effective immediately, distraction devices may only be utilized upon the specific approval of the Chief of Department. There are NO exceptions to this requirement.

3. A distraction device will not ordinarily be employed during search warrant executions or similar tactical entries, except in those situations where its use is clearly necessary. When the Captain or above concerned believes that ensuring the safety of all persons concerned requires the use of a distraction device, the following approval process will be adhered to:

4. Situations involving the execution of Search Warrants:

a. The Captain or above concerned will contact the Borough Executive Officer and request permission to utilize the device.

NOTE

If the Borough Executive Officer is unavailable, information will be forwarded to the Borough Commanding Officer. When exigent circumstances exist, the Duty Chief may be contacted for approval.

MENTALLY ILL OR EMOTIONALLY DISTURBED PERSONS

DATE ISSUED:
09/10/20

DATE EFFECTIVE:
09/10/20

REVISION NUMBER:

PAGE:
1 of 7

PURPOSE

To safeguard a mentally ill or emotionally disturbed person who does not voluntarily seek medical assistance.

SCOPE

The primary duty of all members of the service is to preserve human life. The safety of all persons involved is paramount in cases involving emotionally disturbed persons. If such person is dangerous to himself or others, force may be used when it is reasonable to prevent serious physical injury or death. Members of the service will use only the reasonable force necessary to gain control or custody of a subject. When there is time to negotiate, all the time necessary to ensure the safety of all individuals will be used.

DEFINITIONS

EMOTIONALLY DISTURBED PERSON (EDP) - A person who appears to be mentally ill or temporarily deranged and is conducting himself in a manner which a police officer reasonably believes is likely to result in serious injury to himself or others.

ESTABLISHING/MAINTAINING FIREARMS CONTROL – Uniformed members of the service (UMOS) will not discharge firearms against a person except to protect UMOS and/or the public from imminent serious physical injury or death. Utilize situational awareness to recognize and take immediate action to communicate and correct tactical concerns related to the use of firearms. Ensure muzzle and trigger finger discipline at all times. When possible, avoid crossfire situations and mass reflexive response while maintaining distance and cover from the threat(s).

CROSSFIRE – The unintentional placement of any person, including members of the service and bystanders, who are not the lawful subject of deadly physical force, in a position where they may be injured as the result of a firearms discharge. When faced with a threat of deadly physical force, members of the service must be cognizant of their own position and the position of other responding officers, the possibility that they may misidentify another member of the service or that they may be misidentified, and the possibility of mass reflexive response, and take all reasonable steps to mitigate these risks. Members of the service will not discharge a firearm when doing so will unnecessarily endanger innocent persons.

CROSSFIRE AWARENESS – Being aware of the location of a threat(s) and what is in front of, around, and behind it. Upon arrival at the scene of an incident, and throughout the encounter, UMOS should always attempt to take a position that limits the chances of placing themselves, other UMOS, or innocent bystanders in the line of fire. Upon becoming aware of crossfire circumstances, immediately communicate that awareness to other UMOS at the scene by stating “crossfire.”

**DEFINITIONS
(continued)** ZONE OF SAFETY - The distance to be maintained between the EDP and the responding member(s) of the service. This distance should be greater than the effective range of the weapon (other than a firearm), and it may vary with each situation (e.g., type of weapon possessed, condition of EDP, surrounding area, etc.). A minimum distance of 20 feet is recommended. An attempt will be made to maintain the “zone of safety” if the EDP does not remain stationary.

PROCEDURE When a uniformed member of the service reasonably believes that a person who is apparently mentally ill or emotionally disturbed, must be taken into protective custody because the person is conducting himself in a manner likely to result in a serious injury to himself or others:

- UNIFORMED MEMBER OF THE SERVICE**
1. Request “EDP location history” from dispatcher prior to arrival on scene, when responding to a call for service involving a possible EDP.
 - a. Request “EDP location history” when receiving a pick-up of a possible EDP, if time allows.

NOTE *Communications Section will automatically alert responding units if location has prior EDP history that resulted in Emergency Service response and support.*

2. Request Communications Section to contact the complainant while enroute to location, if possible, to obtain additional information.
3. Transmit radio code signal “10-84” upon arrival on scene.

NOTE *A “10-84” requirement extends equally to patrol personnel, as well as, members assigned to specialty units (e.g., Emergency Service Unit [ESU], Hostage Negotiation Team [H.N.T.J, Technical Assistance Response Unit [T.A.R.U.J, etc.).*

4. Comply with P.G. 212-123, “Use of Body-Worn Cameras,” if assigned a Body-Worn Camera.

VEHICLE CHECKPOINTS

DATE ISSUED:
01/28/21

DATE EFFECTIVE:
01/28/21

REVISION NUMBER:

PAGE:
1 of 4

PURPOSE

To establish the criteria by which members of the service can conduct a safe, legal, and effective vehicle checkpoint program.

SCOPE

Authorized checkpoints must be designated by the commanding officer of a patrol borough, Traffic Operations District, precinct, police service area, transit district, highway district/unit, or Strategic Response Group, and overseen by uniformed personnel. Motor vehicle operators are to be stopped in a non-arbitrary manner (e.g., every third vehicle, etc.), as directed by the commanding officer concerned, and appropriately documented on a **VEHICLE CHECKPOINT FORM (PD371-143)**. Unauthorized or non-compliant checkpoints are prohibited.

Vehicle checkpoints must be set up to include adequate warnings to motorists of their existence. Uniformed members of the service assigned to the checkpoint may lawfully establish reasonable temporary restrictions on movement of vehicles in order to facilitate the flow of vehicular traffic through the checkpoint (e.g., prohibit parking, standing, stopping, or turning, etc.) by such means as signs, barriers, traffic cones, etc. A motorist who violates these temporary restrictions or any other traffic rule may similarly be stopped. An example would be a motorist, who after entering a checkpoint, attempts to avoid it by backing their vehicle out.

It should be emphasized that motorists who avoid a checkpoint by lawful means may not be stopped. If police have not blocked off a side street within a checkpoint, and a motorist turns down it, the motorist may not be stopped unless another lawful reason exists to stop the motorist.

DEFINITION

VEHICLE CHECKPOINT – A vehicle checkpoint is a temporary site on a roadway that impedes the normal flow of traffic for the systematic stop and inspection of driven vehicles. Unlike routine car stops, uniformed members of the service are not required to articulate an individualized suspicion for each vehicle stopped pursuant to a vehicle checkpoint. Checkpoints are only to be used for inquiry into vehicle and/or driver documentation, driving under the influence, or for any emergency exceptions.

PROCEDURE

Whenever a vehicle checkpoint is to be established:

COMMANDING OFFICER CONCERNED

1. Establish vehicle checkpoints for the primary purpose of a DWI check or vehicle safety check. Vehicle checkpoints for all other purposes other than in emergency circumstances cannot be conducted without prior written approval from the Deputy Commissioner, Legal Matters.
2. Prepare **VEHICLE CHECKPOINT FORM**.
3. Ensure the **VEHICLE CHECKPOINT FORM** is affixed to the interior right side of a legal size manila file folder.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-16	01/28/21		2 of 4

- COMMANDING OFFICER CONCERNED (continued)**
4. Give the directive and file folder to the supervisor in charge of the checkpoint and discuss tactics and safety concerns.
 5. Ensure that safety equipment is utilized when warranted and ordered from the Quartermaster Section, when necessary.

NOTE *If the vehicle checkpoint is established by a command other than a precinct, the commanding officer concerned shall confer with the precinct concerned before implementing the checkpoint.*

- SUPERVISOR IN CHARGE OF CHECKPOINT**
6. Comply with the captions on the **VEHICLE CHECKPOINT FORM** as completed by the commanding officer.
 7. Discuss tactics, including appropriate and lawful questioning techniques, and apprise personnel of the primary purpose of the operation.
 8. Ensure personnel are familiar with and have reviewed the contents of the **VEHICLE CHECKPOINT FORM** as provided by the commanding officer.
 9. Remain at the checkpoint location for the entire operation.

NOTE *Supervisors in charge of vehicle checkpoints are reminded that the safety of the public and members of the service is paramount. Reflective vests or luminous traffic belts are to be worn during hours of darkness. Additionally; safety equipment, including turret lights, flares, traffic cones, signs, and/or barriers will be utilized to enhance safety and to warn motorists of the existence of the checkpoint.*

10. Utilize at least two Department vehicles while conducting the checkpoint and employ appropriate safety equipment.
11. Assign a “point person”, in the rank of police officer, whose sole responsibility is to maintain the commanding officer's established procedure for stopping vehicles and to advise the vehicle operators that their vehicles are being stopped, and the reason why.

- UNIFORMED MEMBER OF THE SERVICE ASSIGNED TO CHECKPOINT**
12. Stop vehicles as directed by the supervisor in charge of the vehicle checkpoint.
 13. Courteously and clearly identify yourself by stating your rank, name, shield number and command.
 14. Provide explanation of the purpose of the vehicle checkpoint, unless such explanation will impair investigation.

NOTE *After stopping a vehicle, it is permissible to request the driver's license, registration, and insurance card. It is also permissible to conduct a license and VIN check. The VIN check must be conducted from the outside of the car. Reaching inside the car to uncover the VIN plate is not permitted even if the VIN plate is covered or obstructed; however, the member may request that the motorist uncover the VIN plate. Additionally, the driver's failure to produce a license or insurance card does not provide the basis to enter the car and conduct a further search. However, the driver's failure to produce a license or insurance card does allow for the issuance of a summons or other appropriate enforcement action. If the documentation produced is appropriate, the driver must be allowed to proceed unless reasonable suspicion is developed during the stop.*

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-16	01/28/21		3 of 4

NOTE (continued) *Do not request consent to search unless you have at least a founded suspicion of criminality (Level 2 Encounter – Common Law Right of Inquiry) in accordance with the provisions of P.G. 212-11, “Investigative Encounters: Requests for Information, Common Law Right of Inquiry and Level 3 Stops.”*

UNIFORMED MEMBER OF THE SERVICE ASSIGNED TO CHECKPOINT (continued)

15. Take summary action, when necessary.
16. Offer vehicle operator a **RIGHT TO KNOW BUSINESS CARD (PD142-012)** or **RIGHT TO KNOW BUSINESS CARD – GENERAL (PD142-013)**.
 - a. Comply with P.G. 203-09, “Public Contact – General,” as appropriate.
17. Record the identity (e.g., name, address, telephone, etc.) and statements of witnesses in digital **Activity Log**, whenever an arrest is made in connection with a vehicle checkpoint.

NOTE

*If as a result of the vehicle checkpoint, an arrest is effected, the **VEHICLE CHECKPOINT FORM** prepared for that particular vehicle checkpoint shall be reproduced for the District Attorney's Office.*

SUPERVISOR IN CHARGE OF CHECKPOINT

18. Ensure that a record is kept:
 - a. The number of summonses issued;
 - b. The number of arrests made;
 - c. The number of vehicles stopped; and
 - d. Any other information relevant to the checkpoint.
19. Complete the remaining sections of the **VEHICLE CHECKPOINT FORM** at the conclusion of the vehicle checkpoint.
20. Record other pertinent information in digital **Activity Log**.
21. Deliver the completed file folder to the commanding officer of command conducting checkpoint.
 - a. Vehicle checkpoints will be sequentially numbered beginning with the number one at the beginning of each calendar year.
 - b. Forward copy of **VEHICLE CHECKPOINT FORM** to commanding officer, precinct concerned.

CLERICAL STAFF

22. Maintain files as per Department retention schedule.

ADDITIONAL DATA

In case of inclement weather the supervisor in charge may cancel the vehicle checkpoint. Furthermore, traffic congestion and other risk factors may also be taken into consideration when determining whether or not a checkpoint should remain in place. In any event, regardless of conditions, a vehicle checkpoint should not exceed two hours at a location. Commanding officers may draft specific procedures for vehicle checkpoints that meet the needs of their command, using this general procedure as a guide. When appropriate, written material such as flyers, or pamphlets related to the purpose of the checkpoint shall be distributed to motorists who are stopped.

Any requests for canine team services from agencies outside this Department will be directed to the Operations Unit.

AUTHORIZED USES: DEPARTMENT BLOODHOUNDS

A bloodhound has the unique ability to discriminate between scents and usually will not be sidetracked by other scents crossing a search path. When a scent is fresh, a patrol canine will normally be sufficient to perform the search and should be utilized first.

When it is determined that a search for a live person(s) requires the unique scent discrimination ability of a bloodhound and the search cannot be handled by a patrol canine, a request will be made to the Operations Unit which will transmit the request to the bloodhound handler. The determination and request will be made by a supervisor from the Office of the Chief of Special Operations or Emergency Service Unit on the scene after consultation with the duty captain and a uniformed member of the Canine Unit.

PATROL GUIDE

PROCEDURE NUMBER:	DATE EFFECTIVE:	REVISION NUMBER:	PAGE:
221-18	08/28/19		3 of 3

ADDITIONAL DATA (continued)

Prior to requesting a Department bloodhound, it must be determined that a good, uncontaminated scent article has been identified and will be safeguarded until the arrival of the bloodhound handler. The article is not to be handled by anyone, including members of the service. If it must be moved or collected, consult with a canine handler for instructions prior to removal. Scent articles can consist of any uncontaminated material (blood, clothing, etc.) that has been recently in contact with the person being sought. Washed clothes are not acceptable.

A bloodhound will only trail from an uncontaminated scent article toward a person (living or dead). They are not trained to trail from a person (living or dead) to the origin of the trail (backtrack).

Uniformed members of the service requesting a bloodhound should be aware that the bloodhound handler does not have the same protection as a patrol canine handler since a bloodhound is trained to track only, and will not defend the handler or assist in apprehending a subject.
